DEPARTMENT OF STATISTICS, INDIA

REVIEW

OF THE

TRADE OF INDIA

IN

1915-16

Published by order of the Governor-General in Council.

CALCUTTA
SUPERINTENDENT GOVERNMENT PRINTING, INDIA
1916

Price Twelve Annas.

[No. 162.]

To

THE SECRETARY TO THE GOVERNMENT OF INDIA,
DEPARTMENT OF COMMERCE AND INDUSTRY.

SIR,

I have the honour to submit the Review of the Trade of India for the year 1915-16. Part I contains a résumé of the extent and direction of India's oversea, frontier, coasting, and inland trade, with special reference to the effects of the war on trade. Charts have been inserted to illustrate the main changes and features in the trade of the year under review. Part II contains statistical tables for a series of years, which could not obviously appear in the body of the Report itself without making it unreadable. These tables contain all the more important statistics of trade, including those relating to the trade with the British Empire (*e.g.*, the United Kingdom, Self-Governing Dominions, and other British Possessions), and foreign countries (*e.g.*, our Allies, Neutrals, and hostile countries), the prices of commodities, shipping, freights, and the course of the wages in important industries. An index, it may be noted, is added for easy reference. Prominence has been given in this year's Review to an analysis of the chief imports (Chapter 3) and exports (Chapter 4) with special reference to the War.

I have the honour to be,

SIR,

Your most obedient servant,

G. FINDLAY SHIRRAS,

Director of Statistics.

DEPARTMENT OF STATISTICS :

The 21st October, 1916.

1. GROWTH OF THE FOREIGN SEA-BORNE TRADE OF INDIA

(a) In a decade

1906-07 to 1915-16

(b) During Half a Century

1867-68 to 1915-16

Note:

1. Each division of the ordinate represents 15 crores equal to Rs. 1,500 lakhs.
2. The curves for 1867-68 and 1914-16 represent averages for two years.
3. Total merchandise includes Imports and Exports, both private and Government.
4. Imports of merchandise are inclusive of Government stores.
5. Exports of merchandise are inclusive of re-exports and Government stores.
6. Net Imports of Treasure are the imports *minus* the exports of Gold and Silver, both private and Government.

2. MONTHLY MOVEMENT OF FOREIGN SEA-BORNE TRADE IN 1915-16, AS COMPARED WITH THAT OF 1914-15 AND 1913-14

(Private Merchandise only)

(i) Imports

(ii) Exports

(iii) Total Imports and Exports

Note:—Imports have not recovered from the shock of war as much as have exports.

REVIEW OF THE TRADE OF INDIA

IN

1915-16.

PART I—REPORT.

CHAPTER I.

General remarks.

GENERAL CHARACTERISTICS OF THE YEAR.

The exceptional circumstances brought about by the war make it difficult to summarise briefly, and at the same time to put in their proper setting, the main features of India's trade during the year under review. The general conclusion is that trade has adjusted itself successfully to the new conditions, and a war equilibrium, although an unstable one, has been established. The cessation of commercial relations with enemy countries, the curtailment of trade with France and Belgium, the restriction of trade with neutral countries, and the dearth of tonnage still continue, and the necessity of Government intervention and control, a legacy of the previous year, has become still more close. "The general policy throughout," as stated by the Hon'ble Finance Member in his Budget speech, "has been (a) to restrict the trade in foodstuffs and articles capable of being turned to warlike uses in the case of countries whence they can pass to the enemy; (b) to stimulate the export of a few articles to the United Kingdom and allied countries, or countries which are making munitions for the Allies; and (c) to restrict the export of a very few articles owing to their being needed in India." The effects of the crisis occasioned by the outbreak of war have largely, if not entirely, died away. Although, with some exceptions, business was throughout the year difficult and anxious, there were none of the difficulties which the outbreak of war immediately caused last year. There was, for example, no recurrence of the great rush on Postal Savings Banks deposits. The total savings bank balances, including accruals of fresh interest, were Rs 36 lakhs in excess of the figure for 1st April, 1915. There was no recurrence of a special demand for the encashment of currency notes. The average active circulation of notes* on the contrary increased by Rs 2.65 lakhs, as compared with the amount in circulation in 1914-15. Railway earnings, a valuable indication of the general movement of trade throughout the country, showed an increase of Rs 3.32 lakhs or 5 per cent over the previous year. The exchange position was, as last year, satisfactorily maintained.

The monsoon, which in a country whose mainstay is agriculture plays such an overwhelming part in the trade prosperity of the year, was, it may be noted, not very favourable. The South-West monsoon arrived late. It was weak and irregular in the northern parts of the Bombay Presidency, especially in Gujarat, in Sind, and in large areas of the Punjab. To quote the words of the Hon'ble Finance Member, "A line drawn from Bombay to Delhi may be said roughly to have divided the area on the east, in which the rainfall was good or excessive, from that on the west in which it was deficient. Excessive rain produced serious, and sometimes disastrous, floods in Assam, where the hill section of the Assam-Bengal Railway was so badly damaged

* That is, excluding notes held in Government treasuries and at the headquarter offices of the Presidency Banks.

that it had to be closed for a time; in the Noakhali and Tipperah districts of Bengal; and in the Cawnpore and Lucknow tracts of the United Provinces. In the west, on the other hand, a continued shortage of rain threatened at one time to have very serious consequences. Fortunately opportune rainfall in September and October greatly improved the prospects of the important *rabi* crops in the Punjab, and changed the position considerably for the better elsewhere, especially in Gujarat where there would otherwise have been famine." The winter rains in December, January, and February proved most inadequate as well as untimely in Northern India, and this has considerably affected the outturn of this year's crops, such as wheat in the Punjab and elsewhere.

Another characteristic of the year has been the expansion in the export trade, which compares very favourably with the slow recovery in the import trade. The increase in the exports of jute, tea, wool, and hides and skins is noteworthy. The exports of tea, gunny bags and cloth, and raw wool have reached a record figure. The variation in the monthly exports and imports is illustrated by the charts in this chapter, and they show clearly that the import trade has not recovered from the sudden drop which occurred at the outbreak of hostilities. The increase in total trade was in exports (including re-exports) of merchandise 9 per cent, and the decrease in imports 5 per cent, as compared with the previous year which contained eight war months. Another noteworthy feature has been the change in values of certain important commodities, and the unparalleled rise in freights during the year. The fluctuations in the price of sugar, salt, wheat, rice, jute, and cotton are referred to in subsequent paragraphs. Freights from Calcutta to London were about 7 times and those from Bombay about 11 times what they were when the war began. The rise in prices and freights at the end of March, 1916, are given in tables 47-52 and 60-65 on pages 99-100 and 106-108 and referred to on pages 9-10 and 59-60 of this Review.

Trade of India as compared with that of other countries.

	Increase (+) or decrease (—) in 1915 as compared with 1914.	
	Imports per cent.	Exports per cent.
British India	-19.6	-13.2
United Kingdom	+22.6	-10.7
Canada	-6.4	+61.9
Australia	-5.7	-8.3
Egypt	-11	+12.3
British South Africa	-10.4	-15
France	+26	-47.2
Russia	-29.3	-63.7
Japan	-10.9	+19.3
Spain	-5	+44
United States of America	-6	+68.3
Brazil	+3.8	+36
Argentine Republic	-16.5	+59.8

country for which figures are available, with the exception of Russia. The United States of America alone very nearly maintained the level of the previous year. As regards the export trade, the American countries, especially the United States of America, Canada, and the Argentine Republic, and also Spain and Japan, showed remarkable increases, while the export trade of India decreased, although not in the same degree, as did that of Russia and France. The percentages in the marginal table are in all cases for the calendar (and not the official) year.

TOTAL SEA-BORNE TRADE.

The total sea-borne trade of British India in 1915-16 amounted to R357 crores† or £238 millions, as against R354 crores or £236 millions in 1914-15, and nearly R491 crores or £327 millions in 1913-14 when the highest figures were attained. These totals include merchandise and treasure, both on private and on Government account.

Total Sea-borne trade of India.

† The values in the sea-borne trade returns are based on wholesale market prices less the trade discount, and in the case of imported and a few exported articles, the duty.

The total imports of merchandise on private and Government account in 1915-16 were $\text{R}137\frac{1}{2}$ crores or $\text{£}91.7$ millions, the total exports of Indian produce, including Government stores, $\text{R}194\frac{1}{4}$ crores or $\text{£}129\frac{1}{2}$ millions, and the re-exports of foreign goods $\text{R}5\frac{1}{4}$ crores or $\text{£}3\frac{1}{2}$ millions. The figures for the last three years are shown in the margin.

	1915-16 R(lakhs)	1914-15 R(lakhs)	1913-14 R(lakhs)
Imports	1,37,52	1,44,93	1,91,31
Exports	1,94,24	1,77,98	2,44,27
Re-exports	5,24	4,19	4,73
Total	3,37,00	3,27,10	4,40,31
Treasure			
Imports—			
Private	11,85	21,77	36,62
Government	9	4	6,82
Total	11,94	21,81	43,44
Exports—			
Private	7,43	3,30	7,05
Government	80	1,99	3
Total	8,23	5,29	7,08
Total of Imports and Exports of treasure	20,17	27,10	50,52
Grand Total (merchandise and treasure)	3,57,17	3,54,20	4,90,83

ment and private account are given in the marginal table.

PRIVATE MERCHANDISE ONLY.

In private merchandise there was an increase of $\text{R}15,79$ lakhs in exports, including re-exports, but a decrease of $\text{R}6,59$ lakhs in imports. The gross figures of this year's imports and exports, as compared with those of the preceding two years, are as follows:—

Private merchandise	This year 1915-16 R(lakhs)	Last year 1914-15 R(lakhs)	Pre-war year 1913-14 R(lakhs)	Increase (+) or decrease (—) in 1915-16, as compared with			
				1914-15		1913-14	
				R(lakhs)	Per cent	R(lakhs)	Per cent
Imports	1,31,34	1,37,93	1,83,25	—6,59	—5	—51,91	—28
Exports	1,92,53	1,77,48	2,44,20	+15,05	+8	—51,67	—21
Re-exports	4,85	4,11	4,68	+74	+18	+17	+4
TOTAL	3,28,72	3,19,52	4,32,13	+9,20	+3	—1,03,41	—24

These figures show that there was an increase of 8 per cent in exports, excluding re-exports, and a decrease of 5 per cent in imports, as compared with last year, and as compared with the year immediately preceding the outbreak of war, a fall of 21 per cent in exports, and of 28 per cent in imports. In making these comparisons the enormous rise in prices on the 1913-14 basis should be remembered.

EFFECTS OF WAR ON FOREIGN COMMERCE.

In last year's Review the year 1914-15 was divided into two periods namely, the pre-war period (April to July), and the war period (August to March). The loss of trade during the latter period was shown to be largely, if not entirely, due to the war, being $\text{R}44$ crores or $\text{£}29$ millions in imports, $\text{R}70\frac{1}{2}$ crores or $\text{£}47$ millions in exports, and $\text{R}62$ lakhs or $\text{£}400,000$ in re-exports. A similar comparison is made in the following table to show how far India has gained or lost in the same periods of 1915-16:—

Private merchandise	1913-14		1914-15		1915-16		Increase + or decrease —, as compared with 1913-14, in			
	1913-14		1914-15		1915-16		1914-15		1915-16	
	April to July	August to March	April to July	August to March	April to July	August to March	April to July	August to March	April to July	August to March
	R(lakhs)	R(lakhs)	R(lakhs)	R(lakhs)	R(lakhs)	R(lakhs)	R(lakhs)	R(lakhs)	R(lakhs)	R(lakhs)
Imports	56,05	1,27,20	54,77	83,16	40,26	91,08	—1,28	—44,04	—15,79	—36,12
Exports	78,12	1,66,08	82,01	95,47	60,04	1,32,49	+3,89	—70,61	—18,08	—33,59
Re-exports	1,54	3,14	1,69	2,52	1,42	3,43	+5	—62	—12	+29
Total	1,35,71	2,96,42	1,38,37	1,81,15	1,01,72	2,27,00	+2,66	—1,15,27	—38,99	—69,42

Comparison with
the pre-war year
1913-14.

Comparison with
previous year
(1914-15).

The actual loss during the latter period (August to March) of 1915-16, as compared with 1913-14, was R36,12 lakhs or 28 per cent in imports, and R33,59 lakhs or 20 per cent in exports, while re-exports improved by R29 lakhs or 9 per cent.

The improvement in the same period of 1915-16 was, however, in marked contrast with 1914-15, namely, R7,92 lakhs in imports, R37,02 lakhs in exports, and R91 lakhs in re-exports. It will be seen from chart 2 at the beginning of this chapter that the falling-off in the value of both imports and exports took place mainly during the earlier months of the year, while in the later months (except in the month of December in the case of imports) the general movement was in an upward direction. The improvement, as already noted, is much more marked in the case of exports than in imports, except in the month of March, 1916.

The more important variations in exports and imports are shown in the

	Imports		Exports	
	Increase (+) or decrease (-) in 1915-16, as compared with		Increase (+) or decrease (-) in 1915-16, as compared with	
	1914-15 R(lakhs)	1913-14 R(lakhs)	1914-15 R(lakhs)	1913-14 R(lakhs)
Grain, pulse, and flour	+34.7	+53.4	Barley	+1.49
Provisions, etc.	+5	-36	Gram	+10.2
Sugar	+6,09.5	+1.66	Pulse	+44.4
Salt	+50.9	+37.3	Rice	-1,70.3

Copper	-2,03.2	-3,37.7	Class II	-5,95.2
Railway plant, etc.	-5,86.4	-5,81.6	Opium	-29.3
Textiles	-5,59.7	-26,84.9	Indigo	+1,17.9
Matches	+25.3	+48.6	Hides, tanned	+65.2
Tea chests	+37.7	+29.9	Cotton yarn	+63.6
Class III	-13,15.6	-51,64.1	" piece goods	+87.9
Class IV	-4	-51.8	Jute bags	+7,56
Total	-6,58.9	-51,90.7	" cloth	+4,56.2
			Class III	+16.63
			Class IV	+27.5
			Total	+15,04.9

marginal table. It will be seen from the table that the decline of R6,59 lakhs under imports is mainly due to the heavy fall in railway plant and rolling-stock, textiles, copper, and machinery; a decline which was partly set off by an increase in the value of the imports of sugar from Java. Exports improved by R15,05 lakhs, chiefly under raw jute, gunny bags and cloth, tea, indigo, hides and skins, and wool, notwithstanding

heavy decreases under rice, seeds, and raw cotton.

IMPORTS OF MERCHANDISE.

Imports.

The value of the import trade in each of the classes under which articles

IMPORTS.	1914-15		1915-16		Increase + or decrease — as compared with 1914-15	
	R (lakhs)	Relative share per cent	R (lakhs)	Relative share per cent	R (lakhs)	Per cent
(Private merchandise)						
Class I Food, drink, and tobacco	19,58	14.2	26,94	20.5	+7,36	+37.6
Class II Raw materials	9,32	6.8	8,53	6.5	-79	-8.5
Class III Manufactured articles	1,06,67	77.3	93,51	71.2	-13,16	-12.3
Class IV Miscellaneous	2,36	1.7	2,36	1.8	—	—
Total	1,37,93	100	1,31,34	100	-6,59	-4.8

are grouped in the trade returns is shown in the marginal table. This table is, perhaps, of more than passing interest. The share of class I (Food, drink, and tobacco) was 20.5 per cent and of class III (Manu-

factured articles) 71.2 per cent of the total import trade, as against 14.2 per cent and 77.3 per cent, respectively, in the previous year. It is important to remember that these percentages refer to values and not to quantities. Class I showed an increase in value of over 37 per cent, while class III a decrease of over 12 per cent. There was no change, as compared with 1914-15, in the percentage share of

class II (Raw materials) in the total import trade, but the value decreased by more than 8 per cent. Under class I the receipts of sugar were, as was to be expected, owing mainly to the rise in price, greater by ₹6.09 lakhs. Imported salt accounted for an increase of ₹51 lakhs, ₹13 lakhs being due to larger quantity and ₹38 lakhs on account of higher prices. In class II noticeable decreases were in coal (—₹54 lakhs), mineral oil (—₹39 lakhs), raw cotton (—₹20 lakhs), raw silk (—₹5½ lakhs), and timber (—₹6 lakhs). Precious stones and pearls, unset, was the only important item which showed an improvement, *viz.*, of ₹27 lakhs. Under class III very large decreases are recorded under machinery (—₹1,20 lakhs) and metals of every description (—₹2,59 lakhs). The decline in railway plant and rolling-stock was no less than ₹5,86 lakhs or 58 per cent. A reduction of ₹5,60 lakhs in the imports of yarn and textile fabrics is noticeable, especially in view of the glut in the piecegoods market referred to in the two previous reports. The receipts of cotton cloth alone accounted for ₹5,28 lakhs of the decrease, woollen goods ₹77 lakhs, and cotton hosiery ₹15 lakhs, but these losses were partly compensated for by increases under silk yarn and piecegoods (+₹73 lakhs) and haberdashery and millinery (+₹11 lakhs). Other minor decreases occurred under boots and shoes (—₹17 lakhs), hardware (—₹18 lakhs), and mineral dyes (—₹30 lakhs). The only noticeable increases in this class were under gold and silver thread (+₹19 lakhs), motor cars and motor cycles (+₹27 lakhs), chemicals (+₹43 lakhs), drugs and medicines (+₹20 lakhs), glass and glassware (+₹10 lakhs), paper and stationery (+₹15 lakhs), matches (+₹25 lakhs), tea chests (+₹38 lakhs), and toys and paints (+₹8 lakhs each).

EXPORTS OF INDIAN MERCHANDISE.

The total exports of Indian merchandise showed an increase of nearly Exports. ₹15.05 lakhs or 8 per cent. The details of the four main groups of this trade are shewn in the following table:—

EXPORTS OF INDIAN MERCHANDISE.	1914-15		1915-16		Increase + or decrease — as compared with 1914-15	
	₹ (lakhs)	Relative share per cent	₹ (lakhs)	Relative share per cent	₹ (lakhs)	per cent
Class I Food, drink, and tobacco	48.97	27.6	53.07	27.6	+4.10	+8.4
„ II Raw materials	80.07	45.1	74.12	38.5	—5.95	—7.4
„ III Manufactured articles	46.58	26.3	63.21	32.8	+16.63	+35.7
„ IV Miscellaneous	1.86	1	2.13	1.1	+27	+14.5
Total	1,77.48	100	1,92.53	100	+15.05	+8.5

The relative position of classes I (Food, drink, and tobacco) and IV (Miscellaneous) remained unchanged, but the share of classes II (Raw materials) and III (Manufactured articles) was 38 per cent and 33 per cent of the total export trade, as against 45 per cent and 26 per cent, respectively, in the previous year. There has, therefore, been a very considerable increase in the value of exports of manufactured articles. While manufactured imports declined this year from ₹106 crores to ₹93 crores, exported manufactures rose to ₹63 crores from ₹46 crores in 1914-15, reducing the net balance of manufactured imports to ₹30 crores as against ₹60 crores in 1914-15 and ₹91 crores in 1913-14. The expansion of trade in class I (Food, drink, and tobacco) was entirely due to larger exports of tea from India, which increased by ₹4.45 lakhs, partly set off by a decrease of over ₹66 lakhs under coffee. Including the amount exported on Government account, the shipments of wheat aggregated ₹8.44 lakhs or ₹12 lakhs in excess of the total for 1914-15. The quantity, however, decreased from 706,383 tons to 652,879 tons. The exports of barley rose by ₹1.49 lakhs, while there was a decrease of over ₹1.70 lakhs under rice. Pulse improved by ₹44 lakhs and gram by ₹10 lakhs. The decline of ₹5.95 lakhs in class II (Raw materials) was made up of heavy decreases under raw cotton (—₹8.56 lakhs) and seeds (—₹4.53 lakhs), which were, on the other hand, partly set off by increases under raw hides and skins (+₹1.98 lakhs), raw jute (+₹2.73 lakhs), raw wool (+₹1.42 lakhs), rubber (+₹33 lakhs), and coal (+₹21 lakhs). Of seeds, linseed showed a decline of ₹2.28 lakhs, cotton seed ₹84 lakhs, sesamum ₹82 lakhs, and copra or coconut kernel ₹66 lakhs, only

Exports of Indian merchandise.

groundnut (which is used for the manufacture of margarine) accounting for an increase of R23 lakhs. The most marked downward movement noticed was that of raw cotton. Other noticeable decreases were under teakwood (-R24 lakhs) and bones for manure (-R13 lakhs). The most remarkable factor in the increase in class III (Manufactured articles) was in the exports of jute manufactures (gunny bags + R7,56 lakhs and gunny cloth + R4,56 lakhs). The total shipments of indigo were valued at R2,08 lakhs against R90 lakhs in 1914-15. Large increases also took place in tanned or dressed hides and skins, amounting to R87 lakhs, in cotton twist and yarn (+R64 lakhs) and piece-goods (+R88 lakhs), and also in saltpetre (+R26 lakhs). Opium, it may be noted, declined in value by R29 lakhs.

RE-EXPORTS.

Re-exports.

The value of foreign merchandise re-exported on private account from India is relatively small, and the trade rose in value to R4,85 lakhs, an increase of nearly R74 lakhs over 1914-15 and R17 lakhs over 1913-14. The trade is carried on mainly through the ports of Bombay and Karachi with the Persian Gulf and East African Coast. The trade also includes imports by land from across the border (*e.g.*, raw wool) and re-exported by sea chiefly, if not entirely, from Calcutta and Karachi. The re-export trade as a whole consists, however, chiefly of manufactured articles, especially cotton manufactures, valued at R1,10 lakhs, raw wool worth R1,02 lakhs, and fruits and vegetables, valued at R48 lakhs. These articles accounted for an aggregate increase of R1,10 lakhs, namely, R24 lakhs in cotton goods, R52 lakhs in raw wool, and R34 lakhs in fruits and vegetables. Aden, Persia, Ceylon, the Straits, Mauritius, and the East African Protectorate had a larger share in the cotton trade than in the previous year. The United Kingdom and the United States of America divided between them the trade in raw wool in the respective shares of 91 per cent and 9 per cent. The United Kingdom took fruits and vegetables, which were chiefly dried fruits other than dates, worth nearly R38 lakhs, as against R7 lakhs in 1914-15. Sugar, it is interesting to note, showed a decrease of R65 lakhs, since there was no re-export in the year under review to the United Kingdom as in 1914-15.

GOVERNMENT STORES.

Imports and Exports of Government Stores.

The stores imported and exported on Government account are shown separately in the trade accounts and are not included in the imports and exports of merchandise referred to in the preceding paragraphs. Goods bought by Government and shipped on Government or chartered vessels are not included in the returns of trade.

Exports.

The special feature of the year as regards exports was the shipment of wheat on Government account. No less than 82 per cent (or 534,461 tons) of the total exports was on Government account. The total exports were valued at R1,71 lakhs, excluding wheat, and at R8,61 lakhs, including wheat. The wheat exported on Government account to the United Kingdom amounted to 507,165 tons, valued at R6,56 lakhs, to Gibraltar 14,447 tons or R18 lakhs, to Holland 5,644 tons or R7 lakhs, to Australia 5,005 tons or R6 lakhs, to Malta and Gozo 1,200 tons or R1½ lakhs, and to Italy 1,000 tons or R1½ lakhs.

Imports.

The imports of Government stores were valued at R6,18 lakhs, as against R7,00 lakhs in 1914-15 and R8,06 lakhs in 1913-14. The chief item, railway plant and rolling-stock, which ordinarily represents about one half of the total imports, fell, as was to be expected, very considerably from R3,41 lakhs to R1,47 lakhs or by 57 per cent. [The railway materials imported on private account, it may be noted, fell almost in the same ratio from R10,08 lakhs to R4,22 lakhs.] Arms, ammunition, etc., declined by R13 lakhs, and machinery and millwork by R12½ lakhs, to R19 lakhs each. The value of metals rose from R72 lakhs to R1,38 lakhs. Other important items, such as hardware and cutlery, instruments, and stationery, almost maintained the level of the previous year.

THE YEAR'S TRADE IN GOLD AND SILVER.

(1) Imports and Exports of Gold.

The private imports of gold bullion and coin showed a very large decrease from R28,23 lakhs in 1913-14 and R10,70 lakhs in

1914-15 to R5,24 lakhs only in 1915-16. The imports decreased by more than half, owing to the restriction on the movement of gold. The United Kingdom contributed R2,87 lakhs, Australia R1,46 lakhs, and Asiatic Turkey, Aden, and China about R26 lakhs each. The exports on private account amounted to R6,39 lakhs, as against R2,25 lakhs in 1914-15 and R4,90 lakhs in 1913-14. Of the total exports 48 per cent was in bullion and 52 per cent in the form of coined gold. Japan received a consignment of R3,18 lakhs and the United Kingdom of R3,04 lakhs. Government imports were valued at R3½ lakhs, but there were no exports on Government account. There was thus a total net export of gold amounting to R1,11 lakhs; only thrice in the previous 40 years has there been a net export of gold from India.

The great decrease in the absorption of gold is shown in table 43 on page 97. In 1915-16 the net absorption was only £3,600,000, as against £12 millions in 1914-15, and £23 millions in 1913-14. The net absorption during the past forty-three years ending 1915-16 amounted to no less than £232 millions.

The following chart shows the net imports of gold on private and Government account and the net absorption of gold in the last ten years:—

In 1915-16 the value of the private imports of silver amounted to R6,61 lakhs and of exports to R1,04 lakhs, while on Government account the exports were valued at R80 lakhs and the imports at R5 lakhs, the net imports, both Government and private, being nearly R4,83 lakhs. The United Kingdom supplied R4,18 lakhs worth of silver, China R1,10 lakhs, and Australia (including New Zealand) R77 lakhs, chiefly in the form of bullion.

The imports of Government of India rupees were valued at R35 lakhs and the exports amounted to R1,79 lakhs, of which R80 lakhs were on Government account to meet special demands in the Persian Gulf, in Egypt (where the rupee has temporarily been made legal tender), in East Africa, and in Aden. Exports of rupees also took place to Arabia, the Bahrein Islands, Ceylon, and the Straits.

BALANCE OF TRADE.

Balance of Foreign
trade and its ad-
justments.

The excess of exports over imports of merchandise and treasure

	EXCLUDING GOVERNMENT TRANSACTIONS.		
	Net exports of merchandise.	Net imports of treasure.	Total net exports.
	R(lakhs)	R(lakhs)	R(lakhs)
1911-12 .	89.28	43.06	46.22
1912-13 .	85.09	44.15	40.94
1913-14 .	65.63	29.50	36.07
1914-15 .	43.66	18.46	25.20
1915-16 .	66.04	4.42	61.62

in 1915-16 was R58,25 lakhs, including Government transactions, and R61,62 lakhs, excluding Government transactions. The corresponding averages of the preceding three years are R23,48 lakhs and R34,07 lakhs. The total net exports in the year under review were, it will be seen, much larger than in previous years. Many factors alluded to in the previous year's Trade Review

should be taken into consideration in determining correctly the balance of trade of India, but exact information and accurate statistics in regard to some

	1914-15 R(lakhs)	1915-16 R(lakhs)
Imports of merchandise .	1,37,93	1,31,34
Net imports of gold .	8.45	—1.15
Net imports of silver .	10.02	5.57
Net enfaced securities .	36	90
Interest on enfaced securities .	34	32
TOTAL IMPORTS .	1,57,10	1,36,98
Exports .	1,51,59	1,97,37
Net exports .	24.49	60.39
Council bills paid in India .	10.79	31.05
Funds supplied by Govern- ment to finance wheat purchases .	—	4.25
Reverse bills paid in London .	—13.06	—7.34
Net Balance of trade in favour of India .	—2.27	27.96
	26.76	32.43

of those factors are not always available. But those items which are usually taken into account in arriving at India's trade balance are shown in the marginal table. Deducting Council bills and telegraphic transfers sold in London and the funds supplied by Government to finance wheat purchases from the net export of merchandise and treasure and enfaced rupee paper, the balance in favour of India is calculated for 1915-16 at R32,43 lakhs, as against R26,76 lakhs in 1914-15. The very large balance in favour of India as compared with last year is of particular interest and importance.*

Exports of wheat
on Government
account.

In order to make the Balance of Trade statement complete so far as wheat transactions during the year are concerned, it is necessary to show on the one hand the exports of wheat on Government account, and on the other the remittance to India of funds to pay for these exports. As is well known, these exports on Government account, which amounted to R6,90 lakhs, were paid for in two ways:—(1) by money provided by agent firms in India to the extent of R2,65 lakhs. These firms were subsequently reimbursed by drafts on the Secretary of State or by direct payments by the Secretary of State. (2) The balance amounting to approximately R4,25 lakhs was paid by funds supplied by the Wheat Commissioner in India. To show these transactions in the statement of Balance of Trade it was considered desirable to show the Government exports of wheat as private exports and the funds supplied by the Wheat Commissioner as an import of funds on the same side of the account as Council bills paid in India are shown. The details of the items included in the Balance of Trade statement will be found in table 44 on page 97 in part II of this Review.

VALUE OF THE TRADE OF 1915-16 AS CALCULATED ON THE PRICES OF THE PREVIOUS YEAR.

Calculated values.

It is important, especially at the present time, to eliminate in an analysis of the trade returns the effect of the variation in prices. The method that has been followed is that universally employed for this problem. The calculated values represent what the value of the trade would have been, if prices had remained on the same level as in 1914-15, the difference between these calculated values of the trade of 1915-16 and the values recorded in 1914-15 representing the variation due to the change in the volume of trade in the year under review, and the difference between the calculated values and the actual value recorded in 1915-16 representing the variation due

* An analysis of this unprecedented balance of trade in favour of India will be found in the "Report upon the Operations of the Currency Department during the year 1915-16."

to the change in prices. The results are given in table 42 on pages 95-96 in part ii of this report and are summarised in the following table:—

	Value recorded in 1915-16.	Re-calculated value of 1915-16 trade at prices of 1914-15.	Value recorded in 1914-15.	Increase (+) or decrease (—) compared with 1914-15 due to variations in		Actual change recorded.
				Quantity.	Value.	
	R(lakhs)	R(lakhs)	R(lakhs)	R(lakhs)	R(lakhs)	R(lakhs)
Imports—						
Food, drink, and tobacco	26.94	22.11	19.58	+ 2.53	+ 4.83	+ 7.36
Raw materials	8.53	8.25	3.32	- 1.07	+ 28	+ 79
Manufactures	93.51	85.10	106.67	- 21.57	+ 8.41	- 13.16
Total imports (including miscellaneous)	131.34	117.48	137.93	- 20.45	+ 13.86	- 6.59
Exports of Indian merchandise—						
Food, drink, and tobacco	53.07	48.83	48.97	- 14	+ 4.24	+ 4.10
Raw materials	74.12	77.11	80.07	- 2.96	- 2.99	- 5.95
Manufactures	63.21	65.72	46.53	+ 19.14	- 2.51	+ 16.63
Total exports (including miscellaneous)	192.53	193.80	177.48	+ 16.32	- 1.27	+ 15.05
Total turnover (imports and exports).	323.87	311.28	315.41	- 4.13	+ 12.59	+ 8.46

Thus, according to the recorded figures, there was an increase in the total turnover, excluding re-exports, of R8.46 lakhs. The actual volume of trade, however, declined by R4.13 lakhs, so that price changes accounted for a rise of R12.59 lakhs. In other words, the volume of trade shrunk by 1.3 per cent, but the average prices were 4 per cent higher. The results of the enquiry.

The table also shows that the volume of imports fell by R20.45 lakhs, while the advance in average prices accounted for an increase of R13.86 lakhs, thus reducing the decrease to R6.59 lakhs. In short, the average import prices rose by 12 per cent and the volume of imports decreased by 15 per cent. Imports.

Again the volume of exports rose by R16.32 lakhs, although the fall in average prices reduced this increase to R15.05 lakhs. In other words, average export prices fell by .7 per cent and the volume of exports increased by 9 per cent. Exports.

An analysis of the individual groups, which will be found in table 42 in Part II of this Review, shows that, while the recorded imports of foodstuffs rose by R7.36 lakhs, R4.83 lakhs or 22 per cent was due to the advance in prices, and R2.53 lakhs or 13 per cent was due to increased volume. The decline in the imports of raw materials was due mainly to reduced quantities. Imported manufactured articles declined, according to the returns, by R13.16 lakhs, which was made up of a decrease of R21.57 lakhs due to reduced volume, set off by an increase of R8.41 lakhs due to higher prices. On the export side, foodstuffs exported rose by R4.24 lakhs due to higher prices, set off by a fall of R14 lakhs due to reduced quantities. Exports of raw materials, chiefly owing to raw cotton and seeds, declined by R5.95 lakhs, of which R2.96 lakhs were due to smaller quantities and R2.99 lakhs to lower prices. Those of manufactures improved by R16.63 lakhs, which was made up of an increase of R19.14 lakhs due to larger quantities set off by a decrease of R2.51 lakhs due to lower prices.

PRICES IN 1915-16.

As will be seen from table 47 on page 99, the wholesale prices of country produce in India at the end of the official year under review, compared with the prices prevailing at the end of the year ending March, 1915, showed no great increases, except in regard to raw jute and raw cotton—the two Indian staples which were so seriously affected immediately after the outbreak of war. The average price of wheat in India, which had increased with such rapidity during the months of January and February, 1915, declined after Government intervention, and the fall continued, with slight fluctuations, till the end of March, 1916, when the average price was actually 5 per cent lower than the price that ruled before the war, and 21 per cent below that which prevailed in the corresponding period of the previous year. The average price of rice in March, 1916, remained the same as in March, 1915, although during the months, September to November, 1915, the Wholesale prices of country produce. Wheat. Rice.

Other food grains.

Salt.

Sugar.

price was considerably higher than in the corresponding months of the previous year. The price in March, 1916, it may be noted, was 12 per cent below the pre-war rate. Of the inferior food grains, the average price of maize declined most, being as much as 25 per cent below last year's prices, while the average prices of jawar, barley, and bajra declined by 9 per cent, 5 per cent, and 2 per cent, respectively. Gram fell 18 per cent and dāl (arhar) 7 per cent below the price that ruled a year ago. Among oilseeds, linseed showed a slight rise of 3 per cent, owing to scarcity of stocks and supplies in the market, and rape and mustard showed no fluctuation, but sesamum declined by 5 per cent. As already stated, it was only in raw jute, owing to the demand for war bags, etc., and raw cotton, owing to good demand on the part of spinners, that prices recorded a marked upward movement. Raw jute rose 25 per cent and raw cotton 39 per cent, as compared with the prices of the corresponding period of the previous year. The prices, however, of raw jute and raw cotton were still 17 per cent and 5 per cent, respectively, below the pre-war rates. Among imported articles the rise

* Relates to the end of February

in the price of Liverpool salt is most noticeable. The wholesale price in Calcutta at the end of March, 1916, was R201 per 100 maunds, as against R105 at the end of March, 1915, and R51 on the 30th July, 1914. The prices of Java sugar (T. M. O. white) during the same periods were R12-6as, R11-12as, and R6-12as per maund, respectively. The rise in the price of salt was, therefore, 294 per cent and in that of sugar 83 per cent, over the pre-war rates, and 91 per cent and 5 per cent, respectively, as compared with prices that ruled at the end of March, 1915. The declared unit values (which are wholesale market prices) of selected imports and exports are given in tables 45-46 on page 98 in Part II of this Report. The marginal table summarises the results for the year under review and for 1914-15, as compared with the preceding year in each case, so far as 61 articles of the import trade and 50 articles of the export trade are concerned. Wholesale prices of imported sugar, raw cotton (Broach), rice, wheat, and raw jute at selected ports are given in Part II (tables 48 to 52 respectively).

In Calcutta, it is interesting to note, wholesale prices showed a rise of 13 per cent as against the corresponding date of last year and 18 per cent as compared with the period just previous to the outbreak of war. The results are briefly summarised in the marginal table.

EARNINGS OF LABOUR.

In 1915-16, as compared with the previous year, there were no fluctuations of importance in the earnings of labour, except in the brewing industry in the Punjab and the tea industry in Assam. Notwithstanding the heavy war orders in the jute and wool industries, there was no great rise in the wages paid, owing to the fact that the mills, especially the jute mills, were on the whole well supplied with labour during the year under review. The wages paid in the paper, mining, and rice industries were similar to those paid in the previous year. In the cotton industry in January, 1916, as compared with the corresponding period of last year, there was also no marked change in the wages, but compared with the pre-war period the rates showed an increase of 3 per cent, the rise being chiefly in the sizing and weaving departments. Tables 53-55 on pages 100-101 show the wages paid for the last three years. It should be noted that returns refer generally to a representative mill in the chief locality of the industry, since returns are not yet received of wages paid in the various mills of each industry. Wages in 1915-16.

CHAPTER II.

Trade with Special Countries.

THE DIRECTION OF FOREIGN COMMERCE.

The importance and the extent of India's foreign trade are sometimes not appreciated. In the calendar year 1915, for example, the imports of merchandise (excluding gold and silver) from India into the United Kingdom were greater than those from any other country except the United States and the Argentine Republic; the exports from the United Kingdom to India were also larger than those to any other country except France. In 1913 and 1914 the imports from India into the United Kingdom were greater than those from any other country except the United States and Germany. The exports to India in 1913 and 1914 from the United Kingdom were, without exception, greater than to any other country. Before the outbreak of war India's trade was the greatest in Asia, and in the World's trade, came next after the United Kingdom, Germany, the United States, France, and the Netherlands. Tables 10 to 12 on pages 81-82 show the value of India's foreign sea-borne trade in private merchandise with the British Empire and foreign countries in the past nine years and also the trade with the allies, enemy countries, and neutrals in the past three years. Table 14 on pages 83-89 contains the chief exports and imports by countries. The direction of Trade.

The share of the British Empire in the total trade was over 60 per cent, and of foreign countries nearly 40 per cent, in the year under review, being approximately on the same level as in 1914-15. As compared with the pre-war year (1913-14), the share of the British Empire improved by nearly 9 per cent. The share of the United Kingdom was in 1915-16 nearly the same as in the previous year, 46·6 per cent of the total, or an increase of 6 per cent over the pre-war year 1913-14. British Empire.

The most noticeable changes, however, brought about by the war are in the shares of trade with countries outside the Empire, namely, in regard to Continental Europe and to countries in Asia outside the Empire, such as Java and Japan. The share of Continental Europe—and by Continental Europe are meant mainly Germany, Austria-Hungary, Belgium, France, Holland, Italy, and Russia—in the aggregate value of imports and exports, including re-exports, fell from 26 per cent in 1913-14, and 17 per cent in 1914-15, to 11 per cent in 1915-16, while the trade with countries in Asia outside the British Empire rose gradually from 14 per cent in 1913-14 and 15 per cent in 1914-15 to 18 per cent in 1915-16. The trade with America, chiefly the United States, also showed a steady and important advance from 8 per cent in 1913-14, and 9 per cent in 1914-15, to 11 per cent in 1915-16. The percentage shares Foreign Countries.

of the chief countries in the total import and export trade (during the last nine years) are shown in the following tables:—

Percentage of total imports.

Others	400	450	12.5	400
Total	5,500	5,900	7.3	5,500

The following table shows the value of the principal exports and imports of India in 1911-12 compared with the value in 1910-11. The figures are in Lakhs of Rupees.

1. Exports of India: The value of the principal exports of India in 1911-12 was Rs. 3,800 lakhs, as compared with Rs. 3,500 lakhs in 1910-11. The increase was 8.6%.

2. Imports of India: The value of the principal imports of India in 1911-12 was Rs. 5,900 lakhs, as compared with Rs. 5,500 lakhs in 1910-11. The increase was 7.3%.

the pre-war year 1913-14 to £15 millions in 1914-15 and to over a million (£1,349,000) in 1915-16. Roughly speaking, half of Germany's trade before the war was with countries which are now her enemies, and only one-tenth of it was with countries which are now her allies. The trade of India with the Allies amounted in 1915-16 to £138 millions and with Neutrals to £80 millions, showing an increase of £6 millions and £14 millions, respectively, as compared with 1914-15. As compared with the pre-war period of 1913-14, the decrease in the trade with the Allies was nearly £30 millions and with Neutrals nearly £2 millions.

The total trade with the United Kingdom showed an increase in value of 1.6 per cent. Imports were valued at £52 millions or 59 per cent of the total import trade in 1915-16. In 1914-15 they were valued at £62 millions or 67.4 per cent of the total import trade. In 1913-14 the value

Trade with the
British Empire.

	1914-15 £(1,000)	1915-16 £(1,000)
Imports—		
Hardware	1,203	1,058
Machinery, etc.	3,722	2,879
Metals	6,349	4,988
Provisions	912	919
Railway plant, etc.	6,286	2,729
Cotton manufactures (including twist)	30,246	26,800
Woollen manufactures (including yarn)	899	478
Exports—		
Grain and pulse	6,717	9,027
Cotton, (raw)	1,411	1,371

Saltpetre	168	382

was £78½ millions or 64 per cent of the total import trade. Exports to the United Kingdom amounted to £50 millions or 38 per cent of the total export trade, as against £38½ millions or 31.7 per cent in 1914-15 and £39 millions or 23.4 per cent in 1913-14. The imports into India, largely owing to the restriction on exports from the United Kingdom, decreased by nearly £10 millions or 16 per cent, but exports increased by £11½ millions or 30 per cent. The

principal articles of the import and export trade are shown in the margin. These articles represent 76 per cent of the import, and 87 per cent of the export trade in 1915-16. From the Empire outside the United Kingdom India imports much less than what is exported thereto, as will be seen from the following table.

	Imports.		Exports.	
	1914-15 £(1,000)	1915-16 £(1,000)	1914-15 £(1,000)	1915-16 £(1,000)

Australia, including New Zealand	568	448	3,036	3,884
Total, including other parts of the British Empire	6,136	7,210	19,405	22,926

The trade with Ceylon, the Straits, Hongkong, Mauritius, and the Self-Governing Dominions will be found in table 14 on pages 83—89.

TRADE WITH FOREIGN COUNTRIES.

The decrease in the trade with Continental Europe was £13 millions as compared with 1914-15, and £52 millions as compared with 1913-14. Imports declined from £19½ millions in 1913-14 and £9 millions in 1914-15 to £5½ millions in 1915-16, and exports from £56 millions and £28 millions to £18 millions in the same periods. This was, of course, largely due to the cessation of exports to Germany, Austria-Hungary, and Belgium, although there were larger exports to Russia, France, Italy, Spain, and Switzerland. There were small increases in the imports from France, Italy, and neutral countries.

France accounted for 3.5 per cent of the total trade. Imports increased by 13 per cent, owing to larger receipts of motor cars and tyres, gold and silver thread, haberdashery, dyes, silk manufactures, and liquors. Exports of Indian produce increased by 6 per cent on account of larger shipments of jute bags and

Continental
Europe.

France.
(Table 14, page 84.)

cloth, groundnuts, raw cow hides, rice, rapeseed, and copra. The exports, however, of coffee, raw cotton, wheat, linseed, and pepper fell off considerably.

Italy
(Table 14, page 84.)

Italy's share in the total trade improved from 2·6 per cent in 1914-15 to 3·4 per cent in 1915-16. Imports increased owing to larger imports of motor cars and tyres, machinery, sulphur, cotton tussos and flannelette, silk manufactures, and haberdashery. The exports to Italy of raw hides and skins, raw jute, indigo, and groundnut oil increased, while raw cotton, pepper, and seeds decreased.

Russia
(Table 14, page 84.)

The trade with Russia increased owing to larger shipments of tea (£1,411,000) and rice (£115,000). Russia supplied tea chests of wood worth £55,000. Her purchases of jute manufactures were very heavy in the year under review (£1,920,000).

Belgium
(Table 14, page 83.)

The only exports to Belgium were 21,600 tons of rice exported from Burma, valued at £154,000, in May, August, and September, 1915, for the Belgium Relief Commission.

Neutral Countries.

The table on margin shows the exports of principal articles of Indian merchandise to certain neutral countries. Taking 1913-14, the year before

Japan (Table 14)

the war for comparison, 1915-16 shows considerable increases in the exports to Sweden of raw cotton, raw hides, and raw jute, and to Norway of raw hides, raw cotton, and especially linseed. The trade of Norway has increased nearly fourfold. There was a large increase in wheat exports to Holland (all of which were on Government account) from 960 tons, valued at £6,500, in 1913-14 to 5,644 tons, valued at £47,000, in 1915-16. Other articles of exports to Holland have been prohibited or curtailed, the total trade falling from £2,941,800 in 1913-14 to £144,800 in 1915-16. Exports to Denmark in 1915-16 consisted principally of linseed (£25,000), and the total exports fell considerably. The exports of raw jute to Spain, as compared with the pre-war year (1913-14), increased.

Japan represented nearly 8 per cent of the total trade against 6·3 per cent in 1914-15. Imports into India increased

by 69 per cent, and exports to Japan by nearly 18 per cent, as compared with the previous year, as will be seen from the following table:—

	Increase (+) or decrease (−) in 1915-16 as compared with							
	1911-12		1912-13		1913-14		1914-15

ed goods. Among the most recent imports from Japan is beer, amounting to 253,505 gallons, valued at £29,000, against 64,000 gallons, valued at £7,000, in 1914-15. It may be of interest to note here that the major portion of the trade in beer had previously been with the United Kingdom, which supplied 86 per cent of the total imports in 1915-16, as against 90 per cent in 1914-15 and 86 per cent in 1913-14. Japan is also competing with the United Kingdom in India for the supply of glass and glassware, which were valued at £400,000 against £131,000 in 1914-15 and £105,000 in 1913-14. The imports prior to the war (1913-14) were 8 per cent from Japan and 41 per cent from the United Kingdom, but the present percentages are 33 and 43 respectively. The trade in matches has also advanced from £260,000 in 1913-14 and £461,000 in 1914-15 to £705,000 in 1915-16. The imports of cotton hosiery declined from £556,000 in 1913-14 and £444,000 in 1914-15 to £376,000 in 1915-16. A detailed list of the chief imports from and exports to Japan will be found on pages 87-88.

The position of Java has been of increasing importance in connexion with Java (Table 14, her sugar trade. Imports of sugar were valued at £8,845,000, as against p. 88.) £5,341,000 in 1914-15, £7,096,000 in 1913-14, and £6,294,000 in 1912-13. There were no appreciable changes in the exports of gunny bags, opium, and rice.

The trade with the United States has made considerable strides, United States (Table 14, p. 86.) as in the case of Japan, in the way of replacing articles hitherto obtained from Continental countries with which India's trade relations have ceased owing to the war. The total trade is nearly 9 per cent of India's foreign trade, as against 6.9 per cent in the previous year. Imports increased by 68 per cent, and exports by 22 per cent, over the year 1914-15, while imports increased by 64 per cent, and exports decreased by 3 per cent, as compared with 1913-14. Iron and steel (sheets and steel bars), cotton piecegoods (Pepperell drills), hardware and cutlery, instruments and apparatus, lubricating oil, and motor cars contributed to the increase under imports, and raw jute, gunny cloth, raw hides and skins, indigo, lac, vegetable oil, tea, and pepper under exports. From the table in the margin it will be seen

* 1907-08 was the first year in which the registration of seaborne trade according to the countries of consignment and final destination was adopted.

that the two directions in which the United States have been making most rapid progress as far as imports are concerned, are the iron and steel trade and motor cars and vehicles. As regards the former the United States of America have taken the place of Germany and Belgium and accounted for 26 per cent of the total import trade, the value being £1,600,000 against £368,000 in 1914-15. In the case of motor cars the number increased from 510 cars with an average value of R2,192 per car in 1914-15 to 2,136 cars with an average value of R2,441. The total number of cars imported and those imported from the United States during the last three years are shown in the margin.

TRADE ACCORDING TO PROVINCES.

Provincial trade.

The share of each maritime province in the total seaborne trade in private merchandise during the last two years is shown in the table below:—

	1914-15				1915-16			
	Import £(1,000)	Export £(1,000)	Total £(1,000)	Share per cent	Import £(1,000)	Export £(1,000)	Total £(1,000)	Share per cent
Bengal	38,109	49,647	87,756	41.2	34,956	61,083	95,939	43.8
Bihar and Orissa	---	34	34	---	---	---	---	---
Bombay	30,735	32,743	63,478	29.8	29,495	31,598	61,093	27.9
Madras	8,349	14,408	22,757	10.7	7,688	16,388	24,076	11
Sind	7,729	13,387	21,116	9.9	8,344	12,548	20,892	9.5
Burma	7,031	10,842	17,873	8.4	7,177	9,970	17,147	7.8
Total	91,953	121,061	213,014	100	87,560	131,587	219,147	100

The following conclusions may be drawn from the table:—(1) The import trade in the case of Bengal, Bombay, and Madras declined as compared with the previous year, while the import trade of Sind and Burma increased. (2) The export trade in the case of Bengal and Madras increased, while it decreased in the case of Bombay, Sind, and Burma. (3) The total trade, imports and exports taken together, increased in the case of Bengal, and Madras, while it decreased in the case of Bombay, Sind, and Burma. (4) Bengal had a larger trade than Bombay; her share was 43.8 per cent, while that

* 1907-08 was the first year in which the registration of seaborne trade according to the countries of consignment and final destination was adopted.

of Bombay 27·9 per cent. The share of Madras and of Sind was practically the same as in the previous year—11 per cent and 9·5 per cent respectively. The share of Burma was 7·8 per cent. It is interesting to note that Bengal does most of the trade with Europe, America, and Australia, while Bombay does the greater part of the trade with Asiatic ports and Africa.

CHAPTER III.

Chief Imports in 1915-16.

In this chapter attempts have been made to analyse in alphabetical order the chief imports of the year under review. Detailed statistics of the quantity and value of the imports will be found in Table 7 on pages 74—78 in Part II of the Report. The following statement shows the chief articles of imports in 1915-16, according to their importance :

	R(lakhs)		R(lakhs)
Cotton goods	39,60	Motor cars and cycles	1,29
„ yarn	3,68	Salt	1,25
Sugar	16,62	Fruits and vegetables	1,24
Metals—iron and steel	9,19	Drugs and medicines	1,23
„ copper	74	Glass and glassware	1,06
„ others, including ores	1,26	Haberdashery and millinery	97
Machinery and millwork, including belting	5,26	Woollen goods, including yarn	96
Railway plant and rolling-stock	4,22	Rubber manufactures	91
Oil, mineral	4,01	Soap	85
Silk (raw)	1,08	Tea chests	82
„ goods, including yarn	2,76	Tobacco	80
Hardware	2,38	Wood and timber, including manufactures of wood	79

Liquors	1,87	Umbrellas	32
Spices	1,87	Coal, coke, etc.	27
Chemicals	1,46		
Paper and pasteboard	1,44		
Apparel	1,39		
Matches	1,38		
Instruments, etc.	1,30		
Dyes and colours	1,30		

Government stores.

Railway plant, etc.	1,47
Metals	1,38

The two main features of the year in regard to carriages and carts, including motor cars and cycles, are, (1) the increase in imports, and (2) the large share of the trade, especially in light cars, enjoyed by the United States, due chiefly to the insatiable demand by the War Office for motor cars in England, and to the demand for light and cheap cars in India. The detailed imports

Carriages and carts, including motor cars and cycles.

	1913-14	1914-15	1915-16
	No. R(lakhs)	No. R(lakhs)	No. R(lakhs)
Carriages and carts	— 25	— 13	— 8
Cycles, other than motor	— 35	— 22	— 21

„ cycles	1,463 11	1,304 9	1,062 8
„ wagons	76 6	47 3	121 10
Parts and accessories	— 23	— 14	— 18

are shown in the margin. The detailed imports of motor cars and cycles from the chief exporting countries will be found in Table 23 on page 91 of the Report. The United Kingdom supplied 25 per cent of

the number of cars, as against 51 per cent in the pre-war year 1913-14; the United States of America 68 per cent, as against 30 per cent; and the share of France remained unchanged at 4 per cent. In wagons the share of the United Kingdom was 26 per cent, Italy 34 per cent, and the United States of America 37 per cent.

Rubber tyres* for motor cars and motor cycles and tubes for motor cars have since October 1913 been recorded separately in the trade returns, and their value amounted to R53½ lakhs in 1915-16 against R24 lakhs in 1914-15. They were imported chiefly from the United Kingdom (35 per cent), Italy (23 per cent), France and Japan (17 per cent each), and the United States of America (5 per cent). The increase in imports from Japan and the United States of America in recent years is noteworthy. The detailed imports of motor tyres and accessories from the chief exporting countries will also be found in Table 23 on page 91 of this Review. The appended table shows the principal countries from

Rubber tyres and tubes.

Other sorts	50,08	43,95	53,09
Total	1,17,07	1,02,70	1,22,95

increased in the year under review by 29 per cent to R2,87 lakhs.* Chemicals accounted for an increase of R43 lakhs and drugs and medicines of R20 lakhs, the total values being, respectively, R1,46 lakhs and R1,23 lakhs. The head “chemicals” includes the large variety of chemicals required by the textile industries. Germany had previously a comparatively large share of the Indian market in these imports, having in the year before the war 12 per cent of the total. Since the outbreak of war, the United Kingdom, Japan, and the United States of America have been the suppliers of textile chemicals to India. About 82 per cent of the total imports of chemicals was supplied by the United Kingdom, 7 per cent by Japan, and 3 per cent by the United States in 1915-16. Japan for the first time exported to India considerable quantities of such chemical products as aluminous sulphates, bleaching materials, copperas, and potassium compounds. The manufacture of chemicals was fraught with great difficulty, owing to the conditions imposed by the war. The continued demands of the Home Government in respect of heavy chemicals and acids for explosives and munitions of war, have, among other causes, brought about very marked advances in selling prices.

Sulphur.

In 1914-15 the imports of sulphur totalled 6,102 tons, valued at R6 lakhs, and in 1915-16, 8,478 tons, valued at nearly R9 lakhs. The bulk of the imports is from Sicily. It is noticeable that Japan has in recent years increased her supplies to this country from 457 tons, valued at R33,120, in 1910-11 to 4,251 tons, valued at R3,37,265, in 1915-16. In connexion with the competition with the local product, it may be noted that there are no deposits of free sulphur known to be worth working in India. In the Quinquennial Review of the Mineral Production of India for the years 1909-13, published by the Geological Survey Department, it is stated that “Pyrite is known in various parts of India and in one place, near Kalabagh on the Indus, it is sufficiently abundant in shales, which have been worked for alum to give rise to frequent cases of spontaneous combustion. An occurrence of this sort is one that, suitably placed, might be of value as a source of sulphur. Otherwise, the only chance of sulphur to compete with the imported article is bound up in the problem of developing the metalliferous sulphides for both metal and sulphur.”

* Inclusive of opium and spirits present in drugs, medicines, or chemicals.

Imports of sulphuric acid from the United Kingdom were greatly reduced owing to war restrictions. The total imports were only 257 tons (of which 251 tons came from the United Kingdom), against 1,231 tons in the preceding year and 3,197 tons in the year before the outbreak of war. This reduction was made good by local production from sulphur, which was imported largely from Japan and Italy. The Indian demand for sulphuric acid continues for industrial purposes, and there are now several factories at work on the manufacture of this acid in different parts of India.

With a few exceptions the increase in the prices of chemicals was striking, for example, in the case of bleaching powder, caustic soda, sulphate of ammonia, and sulphur. The majority of medicinal products also rose considerably in price—in many cases by 100 per cent or over during the year. Quinine prices advanced from 1s. 1½d. in January 1915 to 2s. in September, and to 6s. in October—a price not seen for many decades. Java and American manufacturers sold considerable quantities of their quinine to this market. The Government factories have bought no Java bark since 1913, and are drawing on a large reserve created by their purchases of Java bark prior to that year and the acquisition of liberal quantities of quinine in London. Government factories produce over 1½ million ounces per annum from their own barks.

The quantity of coal, including coke and patent fuel, imported on

	1913-14	1914-15	1915-16
	1,000 R Tons (lakhs)	1,000 R Tons (lakhs)	1,000 R Tons (lakhs)
Coal	532 98	379 74	115 20
Coke	17 6	13 4	10 5
Patent Fuel	10 2	7 2
Total	559 1,06	392 78	132 27

by 284,310 tons or 67 per cent as compared with the pre-war

private account during 1915-16 fell by more than two-thirds to 131,725 tons, valued at R27 lakhs. The imports on Government account also decreased from 28,652 tons, valued at R8½ lakhs, to 4,855 tons, valued at R2½ lakhs. Thus the total imports fell compared with 1914-15, and 82 per cent as compared with the year 1913-14. The principal source of supply was hitherto the United Kingdom. The provincial shares in the imports of coal, coke, etc., are quoted in the margin, and the figures are instructive since it appears that the place of foreign coal is now supplied by local production.

IMPORTS OF COAL, COKE, AND PATENT FUEL.	1913-14	1914-15	1915-16
	Tons	Tons	Tons
Bengal	2,571	178	738
Bombay	448,300	328,275	96,708
Sind	41,985	22,931	1,872
Madras	25,658	2,731	7,761
Burma	40,676	38,123	24,646

COTTON MANUFACTURES.

The value of the imports of cotton manufactures, including twist and yarn, during 1915-16 amounted to R43 crores.

Year ended 31st March

1916	R43 crores (£29 millions).
1915	R49 crores (£33 millions).
1914	R66 crores (£44 millions).

This shows a decrease as against 1914-15 of nearly R6 crores or £4 millions (12 per cent). Cotton manufactures represent 33 per cent of the total imports, and 46 per cent of the import trade in manufactured articles. The share of the United Kingdom in this trade is over 91 per cent. Thus the Indian trade is, to a very large degree, influenced by conditions of the Lancashire market. The Lancashire cotton trade passed through a most critical period. The gradual enlistment of operatives coincided roughly with the shrinkage of demand, and the industry retained its balance, although imperfectly. The year, taken all round, was a bad one for producers of cloth, but spinners of yarn did not fare so badly. The scarcity of labour was a serious problem, and there was much delay in getting goods made up and packed. The shortage in transport and high freights, together with other increased charges in the cost of production, resulted in prices for manufactures being much dearer than in normal times. Lancashire's customers abroad, owing to the rise in rates, were unable to do much fresh business. In connexion with these matters, it may be noted that Lancashire's competitors, notably Japan and the United States, are taking the opportunity of getting into markets previously closed to them.

The total imports of cotton twist and yarn into India during 1915-16 amounted to nearly 40½ million lbs, valued at R3,68 lakhs, against 43 million lbs, valued at R3,85 lakhs, in the previous year. The quantity declined by

5 per cent and the value by 4.6 per cent, there being a very slight improvement in the declared value from 14 annas 5 pies to 14 annas 6 pies. About 97 per cent of the imports of yarn consisted of the counts above No. 25; undyed yarn formed 60 per cent and dyed yarn 40 per cent of the total imports. The United Kingdom supplied 37 million lbs or 91 per cent of the total imports, against 87 per cent in 1914-15, the share of undyed yarn being 22.8 million lbs or 61 per cent and of dyed yarn 14.2 million lbs or 39 per cent. Imports of yarn from other sources, mostly dyed yarn, declined:—Holland 2.2 per cent, Italy 1.4 per cent, Switzerland 1.5 per cent, and Japan 1.7 per cent.

Cotton Piecegoods.

India is the largest market in the world for cotton piecegoods, just as

	1914-15		1915-16	
	Million yds.	R (lakhs)	Million yds.	R (lakhs)
Grey	1,320	21.29	1,148	18.09
White	604	10.86	611	10.68
Coloured	495	10.46	359	8.56
Total	2,419	42.61	2,118	37.33

China is for cotton yarn. The total imports of cotton piecegoods amounted to 2,118 million yards (the equivalent of 1.2 million miles), valued at R37½ crores or £25 millions, against 2,419 million yards, valued at R42½ crores or £28½ millions, in 1914-15. This shows a decrease of 301 million yards or 13 per

cent in quantity and of R5½ crores or 12 per cent in value. There was no appreciable increase in the value of grey or white goods, but prices of coloured goods rose owing to higher prices of dyes required for the manufacture. Grey goods represented 48 per cent, white 29 per cent, and coloured 23 per cent, of the total value. The decline in the imports is, on the one hand, the outcome of overtrading and the stringent money market in recent years, and on the other hand it is due to exceptional circumstances in Lancashire owing to the war.

The United Kingdom supplied 95 per cent of grey goods, Japan 3 per cent, and the United States 2 per cent, of the total, as against 97 per cent, 1.2 per cent, and 1.1 per cent in the preceding year. Japan has, therefore, made a great advance in this branch as in other branches of the piecegoods trade. The shares of the United Kingdom in the imports of white and coloured goods were respectively 98.3 and 90 per cent, as against 98.6 and 93.7 per cent in 1914-15. Holland and Switzerland together supplied 1.3 per cent of whites and 5 per cent of coloured goods. Italy contributed 3.6 per cent of the trade in coloured goods and accounted for an increase of nearly 3 million yards. It may be noted that this increase is the result of Italy's direct trade with India, which was formerly in German hands.

Prices of the following representative chops of Greys and Whites in Calcutta and Bombay at the end of March, 1916, as compared with the corresponding month of 1914 and 1915, are noted below:—

		1916		1915		1914	
		R	A	R	A	R	A
At Bombay—							
No. 2000 'Fari' grey shirtings	per piece	6	0	5	8	5	15

Percentage shares of principal countries and total value of imports of handkerchiefs and shawls.

	1913-14	1914-15	1915-16
United Kingdom	74	90	75
Japan	2	1	6
Italy	3	3	5
Germany	12	2	5
Austria-Hungary	4	1	...
Total value R (lakhs)	89	45	15

imported, the principal descriptions being those shewn in the margin. The United Kingdom supplied handkerchiefs and shawls worth R11 lakhs in 1915-16, as against R40 lakhs in 1914-15. The percentage shares of the principal exporting countries in the last three years are given in the margin. In sewing thread the United Kingdom did 98 per cent of the trade, as against 93 per cent in 1914-15.

The imports of hosiery are interesting as will be seen from the marginal table *Cotton hosiery.*

	From Japan	From the United Kingdom	From Germany	From other countries	Total
	R(lakhs)	R(lakhs)	R(lakhs)	R(lakhs)	R(lakhs)
1911-12	66	6	14	7	93
1912-13	62	6	18	6	92
1913-14	83	7	23	7	120
1914-15	66	6	5	2	79
1915-16	56	6	1	1	64

showing the chief sources of supply. Japan supplied 88 per cent of the total imports, as against 84 per cent in 1914-15. The United Kingdom came next (but much behind Japan) with 9 percent, as compared with 7 per cent in 1914-15.

The imports of dyes obtained from coal tar accounted for a decrease of R30 lakhs or 64 per cent (alizarine R12½ lakhs and aniline R17½ lakhs) and synthetic indigo R4 lakhs. These decreases were set off by increases under saffron (+R4 lakhs), cochineal (+R1 lakh), and other dyes (+R3 lakhs). The decrease in values, however, does not show in the exceptional year under review the real decrease. Reference should, therefore, be made to quantities as well as values :—

	Quantity			Value		
	1913-14	1914-15	1915-16	1913-14	1914-15	1915-16

Alizarine dyes	6,469,739	3,757,123	162,397	28,22	15,34	2,78
Aniline "	9,703,122	4,160,166	552,732	76,77	31,65	14,29
Others	73,034	44,718	1,238	1,02	64	2
Total	16,245,895	7,962,007	716,367	106,01	47,63	17,09
Synthetic indigo	677,712	354,704	18,144	9,30	4,90	68

The quantity of coal tar dyes fell from 7,962,000 lbs to 716,400 lbs or a decrease of 7,246,000 lbs or 91 per cent (aniline—3,607,500 lbs, alizarine—3,595,000 lbs, and others—43,500 lbs). The declared unit value for aniline was R2-9-4 and for alizarine R1-11-4, as against 12 annas 2 pies and 6 annas 6 pies per lb, respectively, in 1914-15. The increase in the declared unit value of coal tar dyes since the outbreak of war has been 266 per cent, and that of synthetic indigo 173 per cent. The chief sources of import of coal tar dyes were (in order of importance) the United Kingdom, Germany, Switzerland, and Belgium. The imports from Germany (136,584 lbs, valued at R4 lakhs) were part of the cargoes of prize vessels.

GLASS AND GLASSWARE.

The total imports of glassware and earthenware increased by R13 lakhs to R1,53 lakhs, of which glass and glassware accounted for R1,06 lakhs and earthenware and porcelain for R47 lakhs, as against R96½ lakhs and R44 lakhs, respectively, in 1914-15. There has been a considerable falling-off under bangles and beads and false pearls on account of the cessation of trade with Austria-Hungary from which they were largely imported. The trade in funnels and globes and sheet and plate glass improved by R9½ lakhs and R6 lakhs to R19½ lakhs and R18½ lakhs, respectively.

Japan has supplied the Indian market with bangles (*reshmi* or silky), beads, bottles, funnels, globes, glass parts of lamps, sheet and plate glass, and tableware to the extent of R60 lakhs against R19 lakhs in 1914-15 and R16 lakhs in

Imports of Glass and Glassware.			
	1913-14. R(1,000)	1914-15. R(1,000)	1915-16. R(1,000)

China	5,07	6,02	8,00
Other countries	2,89	2,44	7,89
TOTAL	1,94,53	96,52	1,06,45

1913-14, the increase being one of R40 lakhs or 205 per cent over 1914-15, while imports from the United Kingdom rose by R3 lakhs or 14 per cent to R24 lakhs. China also contributed R8 lakhs. The changes in the source of imports are illustrated by the table in the margin. These imports consist chiefly of bangles (22 per cent of the total value); funnels, globes, and glass parts of lamps (18 per cent); sheet and plate glass (17 per cent); bottles and phials (16 per cent); beads and false pearls (10 per cent); and tableware, including decanters, etc. (6 per cent).

HARDWARE, IMPLEMENTS (EXCEPT MACHINE TOOLS), AND INSTRUMENTS.

Hardware.

The total value of hardware, excluding cutlery and electro-plated ware, imported during 1915-16 was R2,38 lakhs against R2,56 lakhs in 1914-15, a decrease of R18 lakhs or 7 per cent.

	1914-15 R(lakhs)	1915-16 R(lakhs)
Agricultural implements	12.7	10.1
Buckets of tinned and galvanised iron	6.8	1.5
Builder's hardware	14.2	17.3
Domestic hardware other than enamelled ironware	9.3	7.7
Enamelled ironware	10	8.7
Implements and tools other than agricultural and machine tools	33.8	31.5
Lamps, metal	18.8	22.8
Parts of lamps other than glass	7.6	6
Other sorts	1,42.8	1,32.5
Total	2,56	2,38.1

The imports in 1913-14 were valued at R3,95 lakhs. The head "hardware" is a comprehensive one, including various articles under the different categories noted in the margin. The share of the United Kingdom in the total trade under hardware during 1915-16 was reduced from R1,80 lakhs or 70 per cent in 1914-15 to R1,59 lakhs or 66 per cent in 1915-16, while that of the United States rose from R23 lakhs or 9 per cent to R44 lakhs or 18 per cent. Japan contributed R17½ lakhs or 7 per cent and Sweden nearly R8 lakhs or 3 per cent. The ground lost by Germany and Austria-Hungary has for the present been taken partly by the United States, and partly by Japan and Sweden.

Enamelled ironware was supplied last year by the United Kingdom (R1 lakh) and Japan (R7 lakhs). The countries from which this was imported during the last three years are shown in the margin. The chief imports of enamelled ware consist of bowls, rice dishes, soup-plates, and tumblers, although other descriptions such as cups, saucers, kettles, teapots, tiffin carriers, etc., are imported in smaller quantities. Metal lamps were imported largely from the United Kingdom (R3 lakhs), the United States (R18 lakhs), and Japan (R1 lakh).

Other kinds	4.6	3.8
Total of instruments	133.6	130.3

The head "Instruments, etc.," is a very comprehensive one, and is divided into the minor heads noted in the margin. The total value fell slightly by R3 lakhs to R1,30 lakhs. All these sub-heads showed decreases by about a lakh each, excepting the important sub-heads, electrical and photographic, which improved respectively by R1½ lakhs and R47,300. The share of the United Kingdom in the trade in electrical instruments, etc., was 81 per cent against 87 per cent in the previous year. The United States contributed R12 lakhs or 9 per cent of the total trade, Italy R5 lakhs or 4 per cent, and Holland R2 lakhs. Japan also supplied goods to the value of R2½ lakhs against R61,000 in 1914-15.

LIQUORS.

Liquors.

The total value of liquors imported during 1915-16 was R1,87 lakhs, showing a small increase in value of R5 lakhs, or 2½ per cent, but the quantity decreased by 690,000 gallons or 12 per cent. The descriptions of liquors imported are noted in the margin with their quantity and values.

	1914-15.		1915-16.

TOTAL	5,515	1,82.7	4,826	1,87.4

Ale, Beer, and Porter.

Malt liquors—ale, beer, and porter—declined in quantity by 642,694 gallons, or 18 per cent, and in value by over R2 lakhs, or 4 per cent. They were imported partly in barrels and partly in bottles, namely, 1,561,023

gallons, or 54 per cent, in barrels and 1,360,390 gallons, or 46 per cent, in bottles. It is important to note that no less than 99 per cent of beer in bulk, and 72 per cent of bottled beer, were imported from the United Kingdom. During 1915-16, the imports from Japan amounted to 253,500 gallons, of which 248,000 gallons, or 18 per cent, were bottled beer against 64,000 gallons, or 5 per cent, in 1914-15. In 1915-16, nearly 9 per cent of the total imports of beer were from Japan. There were also imports from Holland and Denmark. The distribution of this trade, according to countries of consignment, during the last three years is shown in the appended table.

Total	274	267	21	22

Wines and spirits were also imported on a restricted scale, the quantity falling by 42,485 gallons in the case of spirits and by 7,705 gallons in wines, but the value rising by R5 lakhs and R1 lakh, respectively. The different descriptions of wines and spirits imported are shown in the marginal table. It will be seen that the imports of whisky were valued at R50 lakhs, an increase of 9 per cent in value, brandy R30 lakhs, an increase of 3 per cent, and champagne R6 lakhs, an increase of 20 per cent.

Wines and Spirits.

The quantity of spirits issued from Indian distilleries for local consumption was 8,950,000 gallons, as compared with 9.7 million gallons in 1914-15.

MACHINERY AND MILLWORK.

The total imports of machinery of all kinds, including belting for machinery, during 1915-16, were valued at R5,26 lakhs, showing a decrease of R1,20 lakhs as compared with 1914-15, and of R3,00 lakhs as compared with 1913-14. This comprehensive head includes a number of subheads, which are noted in the margin.

Imports of machinery and millwork, including belting	1914-15 R (lakhs)	1915-16 R (lakhs)
Primemovers	80.7	51
Electrical	53.1	32.9
Boiler	28.7	21.2
Mining	14.6	19.7
Rice and flour mill	9	5
Sewing and knitting	35.7	29.8
Tea	16.7	13.9
Textile: cotton	1.51	1.20
jute	87.6	93.6
others	2.8	3.9
Typewriters	9.1	7.7
accessories	1.2	1
Other sorts	1,13.8	78
Total	6.04	4.77.7
Belting for machinery	36	46.4
Printing machinery	6.1	1.6
Grand Total	646.1	525.7

All the items contributed more or less to the decrease, except mining and jute mills machinery, which showed an increase of R5.1 lakhs and R6 lakhs, respectively. The total value of textile machinery imported during the year fell from R2,41 lakhs to R2,17 lakhs.

Jute mill machinery, valued at R90 lakhs, was imported from the United Kingdom and R3½ lakhs from Japan, as against R87 lakhs and R8,000, respectively, in 1914-15. The imports from Japan consisted mainly of bobbins for jute mills.

* From prize vessels.

The share of the United Kingdom in the imports of cotton mill machinery was R1,15 lakhs and of Japan R4 lakhs, as against R1.48 lakhs and R1½ lakhs, respectively, in 1914-15. The imports of primemovers, other than electrical, declined in value by R29½ lakhs to R51 lakhs. Electrical machinery also accounted for a decrease of R20 lakhs, the total value being nearly R33 lakhs. The share of the United Kingdom in this trade was 85 per cent against 94 per cent in 1914-15. The United States supplied 5 per cent in place of 2 per cent in the previous year. Rice and flour mill machinery imported was worth only R5 lakhs, against R9 lakhs in 1914-15 and R16 lakhs in 1913-14. The requirements of tea gardens were again reduced by R3 lakhs to R14 lakhs. The value of sewing and knitting machines and parts thereof imported fell by R6 lakhs to R30 lakhs. 4,493 typewriters, valued at R7½ lakhs, were imported last year, against 5,237, valued at R9 lakhs, in 1914-15. The share of the United Kingdom in the last two lines of business was, respectively, 96 per cent and 26 per cent, as compared with 92 per cent and 29 per cent in the previous year. The United States supplied 3,446 typewriters, valued at R5½ lakhs, the value being 74 per cent of the total.

The principal source of supply of machinery and millwork was in 1915-16 the United Kingdom, the share of which was R4.32 lakhs or 90 per cent of the total against R5.58 lakhs or 92 per cent in 1914-15. The output of the United Kingdom was seriously handicapped as firms were engaged on munition work and there was shortage of skilled labour. The United States of America contributed R28½ lakhs or 6 per cent against R26 lakhs or 4 per cent in the previous year. Japan supplied textile machinery worth R7 lakhs, her total share being nearly R8 lakhs against R1½ lakhs in 1914-15. Switzerland for the first time took a share of this trade, her consignments, principally of mining machinery, being valued at R2 lakhs. It may be noted that the head 'machinery and millwork' was generally free of duty prior to 1st March, 1916, when an import duty at 2½ per cent *ad valorem* was imposed on machinery other than cotton spinning and weaving machinery which is still left on the free list.

MATCHES.

Matches.

The imports of matches into India in the year ended 31st March, 1916, were over 18 million gross, valued at approximately R1,38 lakhs or £922,000. The development of the trade in recent years is of more than ordinary interest, and the figures in the following table speak, perhaps, for themselves :—

		Twelve months, April to March.			
		1913	1914	1915	1916
Japan	1000 gross boxes	7,299	7,287	10,478	15,278
Sweden	"	4,226	3,635	2,877	2,321
Norway	"	1,419	865	649	544
Austria-Hungary	"	1,154	1,377	815	...
Belgium	"	347	307	172	33
Germany	"	351	189	96	7
Straits Settlements *	"	248	86	166	96
Other countries	"	81	148	162	26
Total		15,125	13,894	15,415	18,305

From this table several conclusions may be drawn :—(1) In spite of the war and the difficulty of obtaining chemicals by match manufacturers, the imports in the year under review amounted to over 18 million gross, a record figure. This gives a *per capita* consumption for all India of 8 boxes per annum, as against 7 boxes four years ago. (2) Owing to the war the sources of supply have greatly changed since 1913-14. (3) The progress made by Japan since the outbreak of war is noteworthy. As compared with the previous year, for example, the Japanese imports have risen from 10½ million gross boxes, valued at R69 lakhs, to 15½ million gross boxes, valued at R1,06 lakhs, an increase of 46 per cent in quantity and 53 per cent in value. The cheapness of Japanese matches gives them a ready market in every Indian bazar, and makes them the most serious competitors of other countries and of Indian manufacturers. With the gradual reduction in Indian markets of the stocks of cheap European

* Matches imported from the Straits are chiefly of Japanese manufacture.

matches, there has been very substantial revival in the demand for the Japanese product. The declared value in 1915-16 of Japanese matches was 11a. 1p. per gross, as against R1-0-9p. for Swedish matches, and R1-3-10p. for Norwegian matches.

METALS AND METAL MANUFACTURES.

The imports of metals and ores and manufactures of metal amount-

	1914-15		1915-16	
	Tons	R(lakhs)	Tons	R(lakhs)

ed to 443,090 tons, valued at R11,19 lakhs, a decrease of 203,669 tons or 31 per cent in quantity. The details of this major head are shown in the margin. Decreases in volume are recorded in all cases except brass, bronze, and similar amalgams, iron, and lead, which increased to a small extent as will be seen from the table.

Metals and manu-
factures thereof.

IRON AND STEEL.

The quantity and value of iron and steel and manufactures thereof, other than for railways, totalled 424,597 tons, valued at R9,19 lakhs, representing a decrease of 184,038 tons or R58 lakhs as compared with 1914-15. The quantity received from the United Kingdom was 289,351 tons against 421,503 tons in 1914-15, from the United States 114,667 tons against 31,059 tons, from Belgium 6,981 tons against 67,194 tons, and from Sweden 3,777 tons against 2,811 tons.

The outstanding feature of the world's iron and steel trade during the year was the enormous development of the manufacture of war materials of all descriptions for the Government and the Allies, and the corresponding decline in the ordinary commercial output. Manufacturers had neither the labour nor the material available to deal with non-war orders.

Prices advanced to levels hitherto unknown. In the pig iron trade prices moved steadily upward during the year; but while in the case of Cleveland pig the advance barely kept pace with the increasing cost of production, hematite values rose much more rapidly owing to the extraordinary demand for steel making iron. The output of Cleveland pig was in consequence further curtailed, while that of hematite was extended, and the exports of pig iron of all kinds decreased. The dearth of iron and steel imports from the United Kingdom led consuming firms to try fresh markets, especially the United States, which increased its exports to India as compared with the pre-war year by 420 per cent.

Prices in India responded to those in the world's market. The prices of iron bar (Swedish rolled) in Calcutta rose from R8-12 per cwt in January, 1915, to R10-6 in October, and soared to R14 in January, 1916. Prices closed at R15 in March last. Pig iron

Total 1915-16	289,351	114,667	20,579	424,597
1914-15	421,503	31,059	150,073	608,635

from the United States of America increased in 1915-16 to 114,667 tons from 31,059 tons in 1914-15, while those from "Other countries" decreased to 20,579 tons from 156,073 tons in the previous year. Germany and Belgium, which were formerly the principal sources of supply next to the United Kingdom, have ceased to

supply India with these articles, and their place has been mainly taken by the United States of America.

Of the imports during the year 1915-16, the first place is taken by galvanized sheets with 54,919 tons, of which 49,106 tons were supplied by the United Kingdom and 5,764 tons by the United States. The decline in this trade was 65 per cent, largely due to the shortage in the supply of zinc. The position is different with iron and steel bars and channel, since 24,561 tons came from the United Kingdom, 29,708 tons from the United States, and 3,205 tons from Belgium. Steel bars and channel declined by 46 per cent in quantity and by 11 per cent in value. Germany and Belgium had hitherto supplied them. Of 47,400 tons of tinned sheets and plates, the share of United Kingdom was 35,502 tons, and the remainder came from the United States. Of sheets and plates, not galvanized or tinned, of which Germany had hitherto been the foremost source of supply, 35,098 tons were supplied by the United Kingdom, and 5,080 tons by the United States.

In angle and spring of which 21,580 tons were imported, the United Kingdom came first with 12,296 tons, and the United States next with 8,192 tons. The United Kingdom contributed 7,954 tons to the total imports of 23,481 tons of nails, rivets, and washers, the other sources being the United States, Sweden, and Norway. In pipes and fittings (cast) weighing 42,205 tons, the United Kingdom accounted for more than a half, namely, 21,271 tons, and the United States 20,847 tons, as against 27,000 tons and 11,800 tons, respectively, in the previous year. Similarly in tubes and fittings (wrought) the share of the United Kingdom was 10,343 tons or 78 per cent, and of the United States 2,616 tons or 20 per cent. The major portion of the trade in beams, pillars, etc., which was seriously curtailed on account of the suspension of building operations and construction work generally, is also with the United Kingdom which supplied 20,378 tons or 78 per cent of the total. In hoops and strips of which 31,150 tons were imported against 24,309 tons in 1914-15, the share of the United Kingdom was 23,087 tons and of the United States 7,684 tons. These are in great demand for the packing of tea and jute.

The import duty on iron and steel, which was hitherto one per cent *ad valorem*, has been raised to $2\frac{1}{2}$ per cent with effect from 1st March, 1916, and that on other metals, some of which are noted below, was raised at the same time from 5 per cent to $7\frac{1}{2}$ per cent, following the increase in the general rates on imports.

The imports of copper into India declined again heavily from 25,502 tons, valued at R2,77 lakhs, to 5,779 tons, valued at R74 lakhs, the decrease being 77 per cent in quantity and 73 per cent in value. The United Kingdom supplied 3,267 tons of copper, wrought, worth R42 $\frac{1}{2}$ lakhs, against 12,565 tons, valued at R1,38 $\frac{1}{2}$ lakhs, in 1914-15. Imports from France were reduced from 1,555 tons worth R19 lakhs to 20 tons worth about one lakh of rupees. Of unwrought copper in the form of tiles, ingots, cakes, bricks, slabs, etc., Japan supplied 564 tons or 67 per cent, and 265 tons came from the United Kingdom.

Copper.

The total imports of zinc or spelter were 791 tons, as against 6,740 tons in 1913-14 and 2,220 tons in 1914-15. At the beginning of the year the price of spelter was £44-10, in December it was £89, and in March, 1916, £93. Zinc or Spelter.

IMPORTS OF LEAD.	1913-14	1914-15	1915-16
	cwt.	cwt.	cwt.
Unwrought	49,315	31,248	34,231

Sheets, pipes, and tubes .	22,579	16,530	18,139
Sheets for tea chests .	40,199	35,321	53,586
Other sorts	12,311	9,815	9,888

The imports of lead re-
covered from the low level
of 1914-15, and the quantity
imported during the last
three years is shown in
the margin. Lead.

It is interesting to note the increase in the imports of lead sheets for tea chests, 92 per cent of which was imported from the United Kingdom. Although the total quantity of lead excluding ore imported in the year under review was less than that imported in 1913-14, the value rose by nearly R3½ lakhs. Unusually wide price movements were recorded in pig lead. The price in London in March, 1916, was £32, as against £24 in the beginning of the year under review. The declared value per cwt in India was R17-12-1 against R16-10-6 in 1914-15.

IMPORTS OF ALUMINIUM.	1914-15		1915-16	
	Tons	R(1,000)	Tons	R(1,000)
Ingot, blocks, bars .	116	1.54	60	83

The quantity of aluminium imported during 1915-16 was almost the same as in 1914-15, but the value increased from R13 lakhs to R14½ lakhs. The descriptions of the imported metal are noted in the margin. Aluminium.

OILS.

The total trade in imported oil during 1915-16 fell from 108 million gallons, valued at R4.68 lakhs, to 97 million gallons, valued at R4.25 lakhs. The details are shown in the margin. Oils.

Oils—	1914-15		1915-16

Other countries	—	—	33	22
Total .	80,591	3,29.26	68,828	2,99.22

The imports of kerosene oil showed a decrease of nearly 12 million gallons or 14 per cent in quantity and of R30 lakhs or 9 per cent in value. There were no imports from Russia, owing to the closure of the Dardanelles. Supplies from other sources were restricted, as will be seen from the marginal table. Persia accounted for a decrease of over 1½ million gallons, the Straits and Borneo about 2 million gallons each, and the United States 5½ million gallons. Throughout the year, however, supplies from these countries were regular and prices remained steady. The average declared value was 6 annas 11 pies per gallon against 6 annas 6 pies in 1914-15. Prices did not rise much, owing to a decision

by certain oil companies not to advance the price unless absolutely forced by circumstances. The difficulties of sea transport existed, but the freights were not raised to the extent that might have been expected since the oil companies owned their own transports.

The production of petrol and benzine in India, including Burma, in 1915 was 26¼ million gallons, as against 26½ million gallons in 1914. The requirements of India and Burma in 1915 were estimated at 4½ million gallons. The production in 1916 is estimated at 33¼ million gallons. Petrol.

Other kinds of mineral oil imported during the year amounted to over 27 million gallons, valued at R1.02 lakhs, against 26 million gallons, valued at R1.11 lakhs. The important descriptions included in this head were lubricating oils (15½ million gallons, valued at R82 lakhs, against 14½ million gallons, valued

* A class of volatile oil extracted from various plants, fruits or flowers for use in essences, perfumery, etc.
† Mineral oil includes fuel oil, kerosene, lubricating oil, petroleum, paints, solutions, etc. The figures of imported mineral oil refer to imports into India including Burma from foreign countries. Other kinds of mineral oil.

at R78 lakhs, in 1914-15), and fuel oils (over 11 million gallons worth R13½ lakhs against nearly 10 million gallons, valued at R11 lakhs, in 1914-15).

Lubricating oil.

	1914-15		1915-16

Lubricating oils—				
From United States	8,016	41,65	10,210	51,87
„ Borneo	1,879	6,34	2,555	8,59
„ United Kingdom	3,119	24,56	1,974	17,90
„ Sumatra	1,075	3,58	500	1,67
Total (including other countries)	14,356	78,17	15,483	81,95

As regards lubricating oils the United States supplied about 66 per cent, Dutch Borneo 16 per cent, and the United Kingdom 13 per cent. Owing to difficulties of supply some importers had to confine themselves to contracts actually undertaken, and as a result of the pressure of freights and the increase in producers' prices, there was a sharp rise in prices of

nearly all grades of lubricating oil in the latter half of the year. Jute batching oil employed in lubricating raw jute as it passes through the spindles is consumed annually in the Calcutta mills to the extent of about 50,000 tons, and the source of supply is divided between Rangoon, the Straits, and America, with a small quantity of Shale oil from Scotland.

PAPER AND STATIONERY.

Paper and stationery.

There was, generally speaking, a very considerable rise in the prices not only of the imported but also of locally produced paper. Before the outbreak of war inferior German and Austrian writing paper had a large sale in India, because of its cheapness. The imports of paper from enemy countries, as well as from Norway and Sweden, consisted largely of the thinner qualities for printing and press copying, which before the war could not ordinarily be manufactured in India at sufficiently low prices. The total consumption of paper in India is at present estimated at about 80,000 tons per annum, of which over 30,000 tons are manufactured in India, and the balance (chiefly high class stationery) is imported. The war has been of great advantage to Indian paper mills as it has resulted in curtailing the competition from abroad, and Indian mills have accordingly been able, with the decreased supply for consumption, to raise their prices.

The total imports of paper, pasteboard, and stationery in 1915-16 were valued at R2,01 lakhs, an increase of 9 per cent over the previous year. Of the imports paper accounted for R1,35 lakhs, an increase of 8 per cent, pasteboard R9 lakhs, an increase of 26 per cent, and stationery R57 lakhs, or an increase of 9 per cent. The total value of imports of paper, pasteboard, and stationery on private and Government account is given in the marginal table.

	Paper and pasteboard		Stationery	
	Private R (lakhs)	Government R (lakhs)	Private R (lakhs)	Government R (lakhs)
1905-06	70	4	38	4
1910-11	1,13	9	53	5

authorised capital of R49½ lakhs and 4,665 persons employed. The output in 1915 amounted to 30,361 tons, valued at R90 lakhs. The figures in the marginal table are of interest.

RAILWAY PLANT AND ROLLING-STOCK.

Railway plant and rolling-stock.

The head 'Railway plant and rolling-stock' is an important group of

	1913-14	1914-15	1915-16
	R (lakhs)	R (lakhs)	R (lakhs)
Private	10,03	10,08	4,22
Government	4,03	3,41	1,47
Total	14,06	13,49	5,69

Indian imports, but the private trade greatly decreased in 1915-16, namely, by R5,86 lakhs, or 58 per cent, to R4,22 lakhs. The imports on Government account were also reduced from R3,41 lakhs to R1,47 lakhs—a decrease

of R1,94 lakhs, or 57 per cent. The total trade, including Government transactions, amounted to R5,69 lakhs, recording a decrease of R7,80 lakhs, or 58 per cent. The reduction was partly due to the non-supply of English material, owing to the congestion in the workshops at home on account of munition work, and partly to the restriction of all but immediately necessary expenditure in India.

The details of the head are shown in the margin, with the amount of

Imports of Railway plant and rolling stock.	Private		Government		Decrease in 1915-16 as compared with 1914-15 on private and government account	decrease in each case. There was, it will be seen, a considerable falling off in carriages and wagons, rails, chairs, and locomotive engines.

Other kinds	52	28	25	4	45	
Total	10,68	4,22	3,41	1,47	7,80	

The great bulk of the materials (about 98 per cent) came from the United Kingdom. The other sources of supply were the United States (locomotive engines, R1½ lakhs; rails, chairs and fishplates, R5½ lakhs; and sleepers of wood, R2 lakhs); Australia (sleepers of wood, R1 lakh); and Siam (sleepers of wood, R2 lakhs). It may be added that railway materials, including telegraphic apparatus imported for railways, which were formerly on the free list, have been subjected to 2½ per cent *ad valorem* duty with effect from 1st March, 1916.

Imports of salt increased in quantity by 83,246 tons, or 18 per cent, and in value by R51 lakhs, or 69 per cent, to 548,940 tons, valued at R1,25 lakhs.

IMPORTS OF SALT	1914-15	1915-16	1914-15	1915-16
	Tons (1,000)	Tons (1,000)	R (lakhs)	R (lakhs)

Egypt	75	145	15	43
Other countries	40	61	6	9
Total	466	549	74	125

Bengal's share in the total imports was 89 per cent and that of Burma nearly 11 per cent. The chief sources of supply, as will be seen in the marginal table, were Liverpool, Egypt, Spain, and Aden. The imports from the United Kingdom rose by 40 per cent, from Spain by 240 per cent, and from Egypt by 94 per cent, while those from Aden decreased by 46 per cent.

The declared value per ton rose from R15-14 in 1914-15 to R22-12 in 1915-16.

The price of salt since the outbreak of war has been of considerable interest. The price of imported (Liverpool) salt in Calcutta at the commencement of the year under review was 165 per cent higher than at the outbreak of war. Prices of Liverpool salt in Calcutta opened at R135 per 100 maunds on 1st April, 1915. There were some oscillations and prices began to decline from July to the middle of October when R94 was touched, due to increased stocks consequent on larger imports. They then showed an upward tendency and rose to R157 in the first week of January, 1916, and to R226 at the end of February, due to speculative clearances in those months in the expectation of an enhancement of the salt duty. The monthly average prices are given in the marginal table. With effect from 1st March, 1916, the duty on imported salt, and on locally produced salt generally, was raised from R1 to R1-4 a maund. The

consumption of salt in India during 1915-16 declined from 1,885,500 tons in 1914-15 to 1,777,700 tons, and the import duty on foreign salt fell from R1,56 lakhs to R1,35 lakhs.

The imports of raw silk were slightly less than in the previous year, the total being 2½ million lbs, valued at nearly R1,08 lakhs. These imports are 4½

times the value of the raw silk (of Indian produce) exported* from India.

	1914-15	1915-16	1914-15	1915-16
IMPORTS OF RAW SILK.	lbs. (1,000)	lbs. (1,000)	R (lakhs).	R (lakhs).
Straits	62	20	2.7	.9
Siam	94	141	2.9	4.5
China, including Hongkong	1,074	2,054	98.0	1,01.5
Japan	172	24	8.7	.9
Other countries	1	1	.2	.1
Total	2,303	2,240	113.4	1,07.9

Although there were larger imports from China and Siam, those from the Straits and Japan accounted for the total net decrease, as will be seen from the marginal table. Bombay received 1,957,951 lbs or 88 per cent of the total imports, and Burma 225,866 lbs or 10 per cent. The average declared value was

R4-13-1 per lb against R4-14-9 in 1914-15—a decrease of about 2 per cent. Burma had overland imports from Western China, amounting to 196,000 lbs worth R10 lakhs, as compared with 171,000 lbs worth R9 lakhs in the previous year.

Silk goods.

Next with regard to *silk goods*. The depression in the import trade during 1914-15 disappeared in

IMPORTS OF SILK MANUFACTURES.	1914-15		1915-16	
	Quantity (1,000)	R (lakhs)	Quantity (1,000)	R (lakhs)
Yarn . . . lbs.	863	34	887	37
Mixed goods . yds.	3,689	24	4,240	32
Piecegoods . . "	17,690	1.34	25,997	2.03
Other sorts . lbs.	60	2	63	4
Total		1.94		2.76

the year under review, as will be seen from the figures in the margin. Of the total increase of R82 lakhs, silk yarn accounted for R3 lakhs, mixed goods R8 lakhs, and piecegoods nearly R70 lakhs. The value of piecegoods imported almost

reached the record figures of 1912-13, namely, R2,03½ lakhs, although the quantity fell short of the record figures of 1912-13 by nearly 4 millions. The average declared value rose from 12 annas 1 pie in 1914-15 to 12 annas 6 pies per yard in 1915-16. The supplies of pure piecegoods were 59 per cent from Japan, and 36 per cent from China. The increase during 1915-16 in the case of Japan was 76 per cent, and of China 28 per cent, as compared with 1914-15. In silk yarn, noils, and warps the share of Japan was 74 per cent both in 1914-15 and 1915-16. As for goods of silk mixed with other materials, France and Italy contributed R25 lakhs or 76 per cent, and the United Kingdom 14 per cent. The production of silk goods in these markets was somewhat fettered by the scarcity of skilled labour, and the selling price of the manufactured article was much enhanced by the rise not only of silk but also of dye stuffs, of coal, and in the case of mixed goods even of cotton and wool. The higher cost of transport and of insurance was also felt by importers. Of the total imports of silk manufactures the following were the chief sources:—

	Percentage shares.		
	1915-16	1914-15	1913-14
Japan	54	48	47
China	28	31	21
France	6	6	8
United Kingdom	5	6	9
Others	7	9	15
Total	100	100	100

In the total trade Bombay's share was 80 per cent and Burma's 15 per cent, as against 80 per cent and 14 per cent, respectively, in 1914-15. The increase in imports into Bombay was 41 per cent, and into Burma 55 per cent, as compared with 1914-15.

IMPORTED SUGAR.

Sugar.
(1) Imports—
quantity and value.

The total imports of sugar (including confectionery and molasses) during 1915-16 amounted to 642,700 tons, valued at R16,62 lakhs. The returns for the last three years are as follows:—

Year ended 31st March	Quantity Tons	Value R (lakhs)
1916	642,700	16.62
1915	550,100	10.52
1914	896,900	14.96

* Vide remarks on silk exports on page 54.

The value of sugar imported in 1915-16 exceeded the record figure of 1913-14 by R1,66 lakhs or 11 per cent, although the quantity was less by 28 per cent. The increase in value was due entirely to an abnormal rise in prices, owing to the war. Of the total quantity imported, only 27 tons were beet

The imports of sugar, 16 Dutch Standard and above, into India in each month during the last two years, together with the declared value per cwt, are noted in the margin. In 1915-16 the heaviest import was recorded in August and the lowest in May.

With the exception of imported salt, the price of sugar since the outbreak of war has risen more than any other article of food. The wholesale price of Java sugar in March, 1916, in Calcutta was

81 per cent higher than in July, 1914, as against 75 per cent in March, 1915. In the first half of the year the price in Bombay for Mauritius sugar, equal to 16 Dutch Standard and above, fluctuated between R15-2 and R18-2 per cwt, but since October it has remained steady at about R16 per cwt. In the year before the outbreak of war (1913-14) the average price was in the neighbourhood of R9 per cwt.

In Madras the local price of Java white, which was R16-2 per cwt in April, 1915, rose to R19-8 in June, but when the new crop came in sight at the end of August the price fell to R16, and after some fluctuations closed at R17-8 in March, 1916. In March, 1914 and 1915, the price was R9-12 and R16-8 per cwt, respectively. In Calcutta the prices of Java "T. M. O." per cwt ranged between R15-14 (in November, 1915) and R18-5 (in June, 1915). The year opened with R16-1 in April, 1915, and closed at R18-5 in March, 1916, as against R16-1 in March, 1915, and R9-4 in March, 1914.

Serious attempts are being made to improve the cultivation of cane in India. The production of raw sugar in British India* was estimated at 2,636,000 tons on an area of 2,375,000 acres during 1915-16, showing an increase of 3 per cent in area and 7 per cent in yield as compared with 1914-15. The average yield per acre was 2,486 lbs or 22 cwts against 2,130 lbs or 19 cwts, the average of the preceding ten years. Bengal obtained from date and palmyra palm 99,000 tons of raw sugar, as against 96,000 tons in the previous year. Progress in research work continued to be made at the cane breeding stations at Coimbatore and Shahjehanpur and in Bihar, and a large number of new seedlings have been raised. Cuttings from selected canes are being distributed in many cases to cultivators, especially in Northern India, and are being introduced into those localities suited for their

* In Java the outturn of sugar during 1915-16 was estimated at 1,264,000 tons against 1,303,000 tons in 1914-15. The Mauritius crop also declined from 277,000 tons to 215,500 tons in 1915-16, while the production of Cuban sugar advanced from 2½ million tons in 1914-15 to 3 million tons in 1915-16.

cultivation. Side by side with improvements in varieties and cultural methods, the mechanical problems in connection with the manufacture of *gur* are also being investigated.

CHAPTER IV.

Chief Exports in 1915-16.

In the previous chapter the chief imports into India were discussed in alphabetical order. In the present chapter the more important exports are similarly treated. The statistical tables, which give the details of these exports, will be found on pages 78-80 in Part II of the Report. The following statement shows the chief articles of exports in 1915-16, according to their importance:—

	R (lakhs).		R (lakhs)
Jute (raw)	15.64	Hemp (raw)	1.03
„ manufactures, including twist	37.98	Coffee	99
Cotton (raw)	24.93	Spices	93
„ yarn and manufactures	9.61	Metals	79

Re-exports.

Cotton yarn and manufactures	1.10
Wool (raw)	1.02
Fruits and vegetables	43
Sugar	36

Saltpetre.

Under exports the head 'chemicals and chemical preparations' consists chiefly, if not entirely, of potassium nitrate or saltpetre. This trade is of special interest during the war. The amount of saltpetre produced in India during 1915 was 18,098 tons, valued at R56 lakhs, against 15,500 tons, valued at R41 lakhs, in 1914. The exports increased from 16,399 tons, valued at R43 lakhs, in 1914-15, to 20,702 tons, valued at R69 lakhs, in 1915-16. The average value was R16-10-1 per cwt against R13-1-0 in 1914-15. There was a considerable change in the distribution of the exports, about 80 per cent was exported to the United Kingdom, against 55 per cent in 1914-15. The increase of exports from India was due to England's chief sources of supply (Belgium and Germany) being cut off. To meet the requirements for munitions, all exports have now been prohibited except under customs permits, which are so worked as to secure practically the whole output of Indian saltpetre for the use of British, allied or other producers of munitions; some supplies have been shipped with this object to Japan and the United States of America. Exports in small quantities to Australia and New Zealand are still permitted mainly for the preservation of canned meat. Calcutta, which is supplied mainly from Bihar and the United Provinces, is the chief port through which saltpetre leaves India. In 1915-16, 87 per cent was exported from Calcutta, and the remainder (13 per cent) was exported from Karachi and Bombay.

COAL.

Coal.

The exports of coal and coke in 1915-16 showed an increase both in quantity and value as against the previous year. The exports were 805,290 tons, valued at R73 $\frac{3}{4}$ lakhs, a small amount when compared with the

* Excluding rope.

total production. In 1915 the production was about two-thirds of a million Production.

	COAL PRODUCTION	
	1914	1915
	Tons.	Tons.
Bihar and Orissa	10,661,062	10,718,155
Bengal	4,424,557	4,975,460
Assam	305,160	311,296
Central Provinces	244,745	253,118
Punjab	54,803	57,911
Baluchistan	48,234	48,607
N.-W. Frontier Province	94	60
Burma	25
Total	15,738,155	16,359,632
Native States	726,108	744,300
GRAND TOTAL	10,464,263	17,103,932

tons above that of the previous year, as will be seen from the marginal table. 53 per cent was raised from the Jharia coal fields of Bihar and Orissa, and 32 per cent from the Raniganj coal fields of Bengal and Bihar. India is now producing more coal than all other British Dependencies, but Japan is well ahead of her, with an output of 22 million tons in 1914, and is an active competitor in the markets of Ceylon, the Straits, Sumatra, and Java. In spite of the great scarcity of tonnage, the exports of coal from

India to Ceylon were 587,691 tons, or 73 per cent of the total exports, and nearly 50 per cent higher than those of last year. Colombo is still, therefore, the main customer of Indian coal outside India. The exports to the Straits and Sumatra decreased as against the previous year, while those to "other countries" (chiefly Aden, Java, and Egypt) almost doubled. The quantity exported to the Straits was 97,674 tons, to Sumatra 69,696 tons, and to "other countries" 48,897 tons. The decrease in the exports by sea to Indian ports is very noteworthy, a decrease of 1,063,000 tons or 56 per cent as against those of last year. This was due to the great scarcity in tonnage, and the railways, accordingly, made special arrangements to carry the supplies to Bombay, Karachi, and Madras. The exports of coal to Bombay in the calendar years 1914 and 1915 were as follows:—

	1914	1915
	Tons.	Tons.
Shipped from Bengal (mainly Calcutta)	788,000	328,000
Carried by East Indian Railway	713,560*	1,307,000*
" " Bengal Nagpur Railway	42,000	217,000

Exports of coal were restricted from 1st October, 1915, except to the British territory, though special exemptions were permitted to certain neutral countries.

It will be seen from the marginal table that the export trade in the last few years has not increased to the extent that might have been anticipated. The proportion of exports is only one ton to about 21 tons produced in the year under review, and the Calcutta export trade may be said to have remained stationary for nearly a decade. There has, however, been an enormous expansion in the internal demand, following on the extension of railways

and traffic facilities, and also general industrial development. The amount of coal (Indian and foreign) available for consumption in 1915 was approximately, 16,541,000 tons, as against 16,303,000 tons in 1914. Of this amount 31 per cent is consumed by Railways†, 12 per cent by cotton and jute mills, 8 per cent by iron and brass foundries, 5 per cent as bunker coal, and nearly 4 per cent by inland steamers.

* Approximate † For calendar year

†The consumption on Railways in 1915-16 was 5,186,705 tons. It is interesting to note that, while the production has increased, railways have continued to take about the same percentage of production.

(a) Production in 1913

(b) Production in 1914

(c) Production in 1915

The price for first class Jharia per ton into wagon, as quoted by the Bengal Chamber of Commerce, opened in April, 1915, at R3-8, fell to R2-14 in September, and closed at R3-2 in March, 1916. Prices on the whole were lower than in the previous year, and the fluctuation between the lowest and highest prices was less than in 1914-15. Freight rates rose to a phenomenal level during the year, the coasting rate from Calcutta to Bombay was R 9-8 per ton, as against R5-3 in 1914-15. The freight rate from Cardiff to Bombay was 33s. 5d. per ton as against 12s. 9d. in the previous year. Railway freights for coal to Bombay, however, showed no change as compared with 1914-15.

THE COTTON INDUSTRY.⁽¹⁾

(1) Raw Cotton.

Raw cotton in
1915-16.

The year 1915-16 was, like its predecessor, a remarkable one in the history of the cotton trade. In the previous year after the outbreak of war a slump occurred, but before the end of the year an improvement took place. This continued in the year under review and is illustrated in the following chart:—

8. RAW COTTON

(BROACH)

(Per Candy of 784 lbs.)

Good Broach opened at R263 per candy of 784 lbs in April, 1915, but fell to R214 in the middle of May. In the 4th week of October prices rose to R315, the highest quotation during the year. The price again fell to R272 in the 3rd week of November, but rose to R293-8 in the beginning of January. The year closed at R274, an increase of R11 over the beginning of the year. The highest and lowest quotations in each of the months December to March, are given in the margin.

Exports amounted to 442,698 tons, valued at R24.93 lakhs, against 517,452 tons, valued at R33.49 lakhs, in the previous year. This was in other words a decrease of 14 per cent in quantity and 26 per cent in value. The value of the raw cotton exported from India was 33.6 per cent of the total value of raw materials exported, and 13 per cent of the total exports.

⁽¹⁾ See also under imports of cotton manufactures, Chapter III, page 19.

The distribution of raw cotton according to countries is shown in the marginal table. The exports to Japan increased by 73,136 tons or R2,72 lakhs in value to 295,883 tons, valued at R17,03 lakhs. Up to 1889-90 that country took little or no raw cotton from India, but imported a considerable quantity of Bombay yarn. There were increased

Production. Next with regard to production. It is well known that the exports of raw cotton during the official year are drawn partly from the crop of the previous season, and partly from the crop of the year in which the exports take place. The final estimates of outturn for 1914-15 were 5,209,000 bales of 400 lbs on an area of 24,595,000 acres. The crop for 1915-16 was estimated at 3,819,000 bales on an area of 17,967,000 acres, a decrease of 27 per cent both in area and outturn. The details of production according to trade descriptions during the season 1915-16 are given in the margin. The figures are approximate. The estimates for the United States and Egypt were as follows:—

	Area (acres).		Yield (bales of 400 lbs).	
	1914-15	1915-16	1914-15	1915-16
United States of America	36,707,000	30,944,000	20,126,000	13,318,000
Egypt	1,821,000	1,230,000	1,730,000	1,202,000

(2) Cotton Manufactures.

Although there was an improvement in the prices of raw cotton, there was not an equally great improvement in the yarn and cloth markets in the year ending March, 1916. The difficulties experienced on the outbreak of war in regard to the supply of stores, chemicals, and dyeing materials continued as in the previous year. The prices of these necessities of mill production, particularly those required for weaving, were abnormally high, and in some cases prohibitive.

The scarcity of coal caused by the shortage of railway stock was also a matter of anxiety to Bombay millowners. Recent arrangements, however, have somewhat improved the situation. There was fortunately no labour shortage. It may be mentioned here that some of the spinning mills in Bombay went into liquidation in September, 1915, on account of the general depression in the industry following the outbreak of war, and owing to the difficulty of financing mills which during 1914 had suffered from the fall of yarn prices in China. In 1915-16, however, there was a satisfactory off-take of stocks, due to the demand

* "Other countries" include these countries:—Switzerland, the United States of America, Sweden, Indo-China, and Ceylon.

for more costly goods of the coloured and bleached varieties. This did much to resuscitate a depressed market. The stocks in Bombay are given in the marginal table. For the most important class of piecegoods manufactured in India or imported—grey piecegoods—there was during the last two years only a small demand. Since then, however, there have been enquiries for these goods from new as well as from old markets, for example, the African and Persian ports, which were formerly supplied from Continental countries. This opportune demand has employed the plain looms, which do little or no other work except that of the standard qualities of certain well known mills.

Stocks of Piecegoods in Bombay.

	Packages.

" " 1915	145,274
" " 1914	121,757
" " 1913	78,041
" " 1912	41,455

Production of yarn and woven goods.

	Yarn Million lbs.	Woven goods Million lbs.
1911-12	625	267
1912-13	688	285
1913-14	683	274
1914-15	652	277
1915-16	722	352

The outturn of the mills in India during the last five years is shown in the marginal table, from which it will be seen that the production of both yarn and woven goods during 1915-16 increased to the highest quantity ever recorded. Yarn was spun to the extent of 722 million lbs, an increase of 70½ million lbs or 11 per cent, and woven goods amounted to 352 million lbs, an increase of 75½ million lbs or 27 per cent, as compared with 1914-15. The value of the mill production* in 1915-16 is roughly estimated at R31,23 lakhs for yarn and R14,61 lakhs for woven goods, as against R30,57 lakhs and R14,78 lakhs, respectively, in 1914-15. The value of the total imports of yarn and woven goods in 1915-16 was R43,28 lakhs,† i.e., R2,56 lakhs less than the estimated value of Indian production. In 1914-15 the total imports were greater than the total production by R3,65 lakhs.

(A) YARN.

Production of yarn.

The quantity of coarse, medium, and fine yarns produced in Indian mills

	YARN (IN MILLION LBS.)			
	1915-16		1914-15	
	Production	Imports	Production	Imports
Nos. 1-25	660	1	591	1
" 26-40	59	26	58	29
Above No. 40	2	7	2	7
Unspecified	1	6	1	6
TOTAL	722	40	652	43

is compared in the margin with the quantity imported by sea from foreign countries during the last two years. The production of coarse yarn (Nos. 1-25) was 91 per cent, of medium counts (Nos. 26-40) 8 per cent, and of finer counts (above No. 40) less than half per cent, of the total

No.	Million lbs.	Per cent of total production.
20	129	17.9
10	86	11.9
12	63	8.7

Exports of Yarn and piecegoods.

Exports of Yarn.

production. The proportion of the counts imported by sea was Nos. 1-25, 2.5 per cent, Nos. 26-40, 65 per cent, above No. 40, 17.5 per cent, and unspecified 15 per cent, of the total imports. There was no material change in the relative position of the three classes of Indian yarn noted above, and the increase was almost entirely in the lower counts required for heavier goods for which there was an increased demand. The counts of yarn largely spun in India are those given in the margin. Of the total production of yarn, Bombay contributed 510 million lbs or 70.6 per cent, the United Provinces 48 millions or 6.6 per cent, Madras 44 millions or 6 per cent, the Central Provinces 37 millions or 5.1 per cent, Bengal 32 millions or 4.4 per cent, and Native States and foreign territory 39 millions or 5.4 per cent. The total export trade in cotton twist and yarn and piecegoods, as will be seen from the marginal table, considerably improved last year. Although the trade in twist and yarn increased by 20 per cent in quantity and 10 per cent in value to 160 million lbs, valued at R6,92 lakhs, it was still much below the level of 1913-14. The

	EXPORTS.			
	Twist and yarn.		Piecegoods.	
	million lbs.	R (lakhs)	million Yards	R (lakhs)
1913-14	198	9.83	89	2.14
1914-15	134	6.29	67	1.59
1915-16	160	6.92	113	2.47

*This has been estimated by taking the average declared value for twist and yarn and the excise duty of 8½ per cent *ad valorem* on woven goods collected during the year.

† Of this amount yarn accounted for R3,68 lakhs and woven goods R39,60 lakhs.

average declared value per lb was 6 annas 11 pies against 7 annas 6 pies in 1914-15. China¹ is the principal consumer, taking 1.10 million lbs, valued at Rs.95 lakhs, as against 1.17 million lbs, valued at Rs.42 lakhs, in 1914-15. Owing to the war the trade with Asiatic Turkey has considerably suffered. This loss was, however, made good by larger exports to Egypt, to Aden, and to Persia. There was no appreciable change in the exports to the Straits. The United Kingdom received consignments of about 2½ million lbs of yarn and Siam and Java together 1½ million lbs. Bombay accounted for nearly 95 per cent of the total exports abroad, Madras 3½ per cent, and Bengal 1½ per cent.

(B) PIECEGOODS.

The production of grey and bleached piecegoods at the Indian weaving mills showed an increase of 54 million lbs or 214 million yards, and that of coloured piecegoods an increase of 20½ million lbs or 91 million yards. Grey and coloured goods other than piecegoods increased by 800,000 lbs to 2½ million lbs. Hosiery also improved by 70,000 lbs to 356,000 lbs.

Production of Woven goods.

TOTAL	245	1,016	92	196	811	92

It may be noted that cheap cotton blankets, etc., were manufactured during the year by Indian mills to replace those which had formerly been imported from Germany.

At the end of 1915-16 there were in India 261 cotton mills, 6,646,764 spindles, and 108,083 looms at work, employing on an average 275,019 persons. The Bombay Presidency possesses 70.1 per cent of the mills, 70.6 per cent of the spindles, and 78.6 per cent of the looms.

1912-13 has been outstripped in the year of report.

The exports of cotton piecegoods showed a large increase of 69 per cent in quantity and 55 per cent in value. There was, however, a decrease in the declared value per yard from 3 annas 9 pies to 3 annas 6 pies. The exports consisted almost entirely of coloured, printed or dyed goods (52 per cent) and

Exports of Woven goods.

(1) China is the largest market in the world for yarns, followed next by India.

grey unbleached goods (48 per cent). The former increased by 25 million yards or 74 per cent to 59 million yards, and the latter by 21 millions or 64 per cent to 54 million yards. Very large consignments were sent to Asiatic Turkey

Share of principal countries in the exports of cotton piecegoods.

African Ports, and Siam also increased their imports from India during 1915-16, as will be seen in the marginal table.

INDIGO.

Indigo and the War.

Exports.

The removal of the competition of synthetic dyes, owing to the cessation of trade with Germany, has given considerable stimulus to the trade in natural indigo. This branch of the Indian export trade has been enormously benefited by the war. The total exports increased by 24,800 cwts, or 145 per cent, to 41,942 cwts, a level which was last seen in 1904-05; the value of these exports advanced by R1,18 lakhs, or 131 per cent, to R2,08 lakhs,—this height has not been reached for over 15 years, i.e., since 1900-01. The United Kingdom took 30,572 cwts, valued at R1,45 lakhs, as against 15,275 cwts, valued at R84 lakhs, in 1914-15. The United States came next with a very great increase, taking 5,948 cwts, valued at R37 lakhs, as against 210 cwts or R2 lakhs in the previous year. Egypt imported 2,557 cwts, valued at R11½ lakhs, against 399 cwts or R86,800 in the previous year. Russia took 333 cwts, valued at R3¼

Prices.

	India.		United Kingdom.			
	R	a.	£	s.	R	a.
1913	188	1	13	2=	196	8
1914	349	15	34	4=	513	0
1915	492	8	49	19=	749	4

It may be noted that the Indian declared value is the wholesale average market price, while the United Kingdom price is the c.i.f. price. Throughout the year prices were well maintained, and enquiries were fairly numerous, the demand being principally from America. The prices of middle quality realised at the Calcutta sales during the last three indigo seasons, December to March, are noted in the margin.

Price of Indigo 'Goods to fine' R per cwt.

	Dec.	Jan.	Feb.	Mar.

1913-14	255	262	262	262

The following chart gives the monthly declared values of indigo at Indian ports during the last three years.

9.—INDIGO.

(Average declared value at Indian ports)

The area and yield of indigo cultivated in India during 1915-16 showed a considerable improvement as compared with 1914-15.* The total area placed under indigo was 314,300 acres, or 112 per cent in excess of the finally revised acreage (148,400 acres) of the preceding year, and the yield of dye was estimated at 39,900 cwts against 25,200 cwts or an increase of 58 per cent. The exports by sea to foreign countries from the chief ports are given in the marginal table.

	1914-15		1915-16	
	R	cwts. (lakhs)	R	cwts. (lakhs)
Madras	5,393	14	26,171	1,09

Jute, raw	30,83	12,91	15,64
„ goods	28,27	25,82	37,98
TOTAL	59,10	38,73	53,62
Cotton, raw	41,04	33,49	24,93
„ goods	12,12	8,01	9,61
TOTAL	53,16	41,50	34,54

This head is one of the three largest items of the export trade as will be seen from the figures in the margin.

The total value, including wheat exported on Government account, was almost on the same level as in 1914-15, namely, R29 crores (£19½ millions) against R45 crores (£30 millions) in 1913-14, and represented 15 per cent of the total export trade and 55 per cent of class I (Food, drink, and tobacco.) By far the most valuable of the exports included under this head are rice and wheat.

RICE.

The value of rice exported during 1915-16 amounted to nearly R15½ crores or £10 millions, representing 53 per cent of the total value of food grains exported from India, as against 59 per cent in the previous year. The value of the exports abroad fell by R1,70 lakhs or 10 per cent. The quantity exported was 1,367,507 tons against 1,561,969 tons in 1914-15, or a decrease of 12 per cent.

Exports of Rice.		
	Tons (1,000)	Value R (lakhs)
1912-13	2,763	32,56
1913-14	2,450	26,61
1914-15	1,562	17,16
1915-16	1,367	15,46

* The production in the first forecast for 1916-17, which was published on the 18th October, 1916, is estimated at 75,200 cwts on an area of 625,900 acres.

Exports of rice by provinces.

	1914-15		1915-16	
	Tons (1,000)	Per cent	Tons (1,000)	Per cent
Burma	1,126	72.1	960	70.2
Madras	196	12.5	252	18.4
Bengal	171	11	75	5.5

Bombay	25	1.6	31	2.3
Bihar and Orissa	3	.2
Total	1,562	100	1,367	100

Burma exported less than in 1914-15, viz., 959,861 tons or a decrease of 14.7 per cent. The exports from Bengal to foreign countries were 75,457 tons, a decrease, as against 1914-15, of 94,950 tons or 55 per cent, while Madras increased her exports by 56,080 tons, or nearly 30 per cent, to 251,731 tons, Sind by 8,070 tons to 49,479 tons, and Bombay by 5,680 tons to 30,978 tons. The provincial shares and the percentages to the total trade are noted in the margin.

The marginal table shows the principal customers, in the exports of rice⁽¹⁾ from India in the last two years. Ceylon as usual headed the list with 310,300 tons, valued at R4.61 lakhs, there being a marked shortage of stocks in Colombo. The United Kingdom was for the first time the second best customer with 297,100 tons, valued at R2.98 lakhs, thus importing more than the Straits, which took 186,200 tons worth R1.75 lakhs. The United Kingdom seemed to have benefited from the stoppage of exports to Germany and Austria-Hungary, which

	QUANTITY		VALUE	
	1914-15	1915-16	1914-15	1915-16
	Tons (1,000)	Tons (1,000)	R (lakhs)	R (lakhs)
Ceylon	279	310	4.02	4.61
United Kingdom	212	297	2.07	2.98
Straits	233	186	2.21	1.75

Australia including New Zealand	27	35	23	30
Natal	20	17	32	28
Bahrein Islands	8	17	12	26

in the pre-war year 1913-14 took respectively 13 per cent and 9 per cent of the total exports from India. Exports to Holland were only 5,000 tons, valued at R5 lakhs, owing to contraband regulations. There were increased direct exports from Burma to America (especially Cuba), Russia, Sweden, France, and Portugal. The exports to Japan were greatly reduced from 160,646 tons in 1913-14 and 8,104 tons in 1914-15 to 4,054 tons in 1915-16, due partly to good crops and heavy stocks of rice in Japan itself, and partly to high freights.

Exports from
Burma.

In connexion with the fall in the exports abroad from Burma, the increase in the exports coastwise to other parts of India is of considerable interest. In the first year of war, it will be remembered, Burma's rice trade would have been more seriously affected than it was (owing to the falling off in the demand from abroad), had it not been for the increased demand from other parts of India where the rice crop was estimated at over a million tons less than in the previous year. In the second year of the war—the year under review—the demand from abroad was still abnormally low, and crops in India were generally good. There was, therefore, the possible difficulty of finding a good market for Burma rice. Fortunately, however, for Burma, Bengal took 637,000 tons of cleaned rice and 145,000 tons of paddy in 1915-16, and exports abroad since January, 1916, have increased, which, although not sufficient to restore exports to normal, indicate a larger demand from consuming countries abroad.

Prices.

Next with regard to prices. It will be seen from the chart below (1) that the price of Ballam rice, a very representative grade, was in 1915-16 generally higher than that in 1914-15 and (2) that Rangoon rice was very much higher in 1915-16 from July to November than in 1913-14 or 1914-15.

⁽¹⁾ Not in the husk. The exports of rice in the husk are small and are almost entirely to Ceylon. The exports during 1915-16 were 27,622 tons, valued at R16½ lakhs.

10.—RICE (WHOLESALE MARKET PRICES)

(Per md. of 82½ lbs.)

WHEAT.

The wheat position in 1915-16 was no less important and interesting than in the preceding year. Wheat, as is well known, occupies the largest area under crops in India, with the exception of rice. The area was 30 million acres in the year under review. It should be remembered that since harvesting takes place from March to May, the statistics of exports in the official year 1915-16 relate almost entirely to the wheat sown and cropped in 1914-15. The bulk of the exports comes into the London market at a very opportune time of the year, and, therefore, although the Indian production is only 10 per cent of the total world supply, the crop is of no small importance. Indian wheat usually predominates in the imports into the United Kingdom from July to September, just as Russian supplies in October and November, the United States from December to February, the Argentine from March to May, and Canada in June. On an average of the three years previous to the outbreak of war, 10 per cent of the total exports took place in May, 17 per cent in June, 22 per cent in July, 10 per cent in August, and 10 per cent in September. These facts are of importance in studying the wheat position of 1915-16, since the Indian wheat market is tightly linked up to the world wheat market.

The position, so far as India is concerned, was briefly as follows:—The production of the 1914-15 crop was a record one, higher than the heavy crops of 1903-04, 1910-11, 1911-12, and 1912-13. The outturn amounted to 10,087,000 tons or 47,073,000 quarters, an increase in yield of 22 per cent over the crop of the previous year. On the outbreak of war, it will be remembered, wheat prices the world over rose at a phenomenal rate. Indian prices were forced up by the demand abroad on stocks which were then in India unusually short. In the first three months of 1915 prices continued to rise in spite of the limitation of exports. It was found necessary to divorce Indian prices from world prices, and simultaneously to afford an outlet for the surplus crop, alike for the benefit of the Indian producer and for the United Kingdom where wheat was in great demand. The exportable surplus, in short, was taken over by Government in April on terms which put a money premium on early delivery. The scheme has been fully dealt with in the Report of the Wheat Commissioner recently

published. From 1st May, 1916, the scheme for controlling the export of wheat by Government, announced in March, 1915, has been abandoned, and exports are allowed with permits from the Chief Customs Officer. The decision is qualified by the condition that Government will decide the maximum quantity of wheat to be exported in each seasonal period of export and also by individual firms.

Wheat prices.

The fluctuations in Indian wheat prices, read in the light of these facts, are

Wholesale market prices in India

not without interest. The marginal table gives the monthly prices of wheat in Karachi, Bombay, and Calcutta. Wholesale prices* at the end of the year (March, 1916) were 21 per cent less than in the corresponding period of the previous year (March, 1915). Wholesale prices in March, 1916, were 5 per cent, and retail prices 4 per cent, less than at the outbreak of war. It is interesting to compare the fluctuation in the price of Karachi wheat with that of English, Canadian, and American wheat in the London market. It should be noted in regard to these prices that the stocks in the United Kingdom were fair, although the

supply of wheat on passage was somewhat below normal. Australia had a very

short crop, and could spare no wheat for shipment in 1915. The Argentine, although reaping a large crop, was unable to ship it for two months, owing to the most remarkable series of wet weeks on record. New York and Chicago held the market,

and after a short time carried the Canadian markets, including Winnipeg, with them. America and Canada were in fact able to drive up the price of the quartern-loaf in Great Britain to 9d. Prices, however, were bound to fall for various reasons. The Argentine crop amounting to 13 million quarters, although two months late, began to undersell that of the United States and Canada, and in May the Argentine began to dominate the market. Very favourable crop reports from Canada, India, Roumania, and the United States discouraged the holding back of wheat. English prices at the end of the year (March, 1916) were, however, generally higher than at the beginning of the year under review.

Wheat Exports.

The total exports of wheat from India, both on private and Government account, amounted to 652,879 tons (3,046,767 quarters), valued at nearly Rs½ crores, as against 706,383 tons (3,296,453 quarters), valued at Rs½ crores, in the previous year. The marginal table shows the exports from the recent record year 1912-13. The value of wheat exported, it may be

Exports of Wheat

Mauritius, Ceylon, the Straits, Natal, and British East Africa.

against 17 and 4.7 per cent, respectively, in 1914-15. The exports by countries during 1915-16 are given in the margin. As usual most of the exports were from Karachi, which exported 80 per cent of the total, as against 12 per cent from Bombay, and 7 per cent from Bengal. The exports of wheat-flour were 58,608 tons, valued at R1,12 lakhs, an increase of 9 per cent in quantity as compared with last year. More than 90 per cent of the trade in flour was from Bombay and Karachi, and the exports were chiefly directed to Asiatic Turkey (Persian Gulf), Aden, Egypt,

Exports of wheat flour.

OTHER FOOD GRAINS.

The exports of food grains other than rice and wheat were as shown in

	1914-15		1915-16	
	Tons (1,000)	R (lakhs)	Tons (1,000)	R (lakhs)
Barley	29	26	166	1.75
Gram	23	23	32	34
Jawar and bajra	105	1.12	42	13

Other sorts	1	1	3	4
Total	248	2.65	357	4.06

the margin. The trade in barley, pulse, (i.e., beans, dal and peas, lentils, etc.), and gram increased to a great extent, while jawar and bajra fell off both in quantity and value.

The exports of barley are always liable to great fluctuations, according as the British crop is good or bad. The United Kingdom had a very short crop grown on a reduced area of 18 per cent, and India sent a consignment of over 163,813 tons, valued at R1,73 lakhs,

Barley.

against 25,921 tons, valued at R23½ lakhs, in 1914-15, and 149,589 tons, valued at R1,23 lakhs, in 1913-14. Practically the entire exports were directed to the United Kingdom where the price of barley advanced over £1 per quarter of 480 lbs. during the year, from £1 11s. 9d. in April, 1915, to £2 14s. 2d. in March, 1916.

Of pulse 60 per cent, as against 54 per cent in the previous year, went to the United Kingdom. France imported 13,215 tons, valued at R19 lakhs. Ceylon, the Straits, and Mauritius took, respectively, 7,372 tons, valued at R9½ lakhs, 5,808 tons or R8 lakhs, and 3,919 tons or R6 lakhs. British Guiana, British West Indies, and Natal together took over 7,200 tons, valued at R12½ lakhs.

HIDES AND SKINS.

The hide, leather, and allied trades were active during the past year. Owing to the requirements for military purposes and to the necessity of avoiding exports reaching enemy countries through neutrals, various prohibitions on hides were imposed. The exports, however, of raw hides and skins, as well as tanned or dressed hides and skins, increased during the year. The most noticeable fact in regard to raw hides was the very large increase in the exports to Italy and to the United States. During 1913 the total number of cow hides exported from Calcutta and Karachi to Italian ports for the manufacture of boots, equipment, etc., was approximately half a million, while in 1915 it had reached the enormous figure of 4 millions, an export capable of yielding, it is said, 20 million complete pairs of uppers for Army boots. The total exports of raw hides to all countries during the year amounted to 881,885 cwts, valued at R6,79 lakhs, the increase being 24 per cent in quantity and 29 per cent in value as against the previous year. Of the total exports Italy took over 43 per cent (383,360 cwts, valued at R3,29 lakhs, as against 72,199 cwts, valued at R58 lakhs), while the United States took 35 per cent (312,965 cwts, valued at R2,25 lakhs, against 189,173 cwts,

Exports—raw hides and skins.

valued at R1,27 lakhs, in the preceding year). The exports to the chief importing

Total	1,115,747	8,30	713,926	5,25	881,885	6,79

countries are given in the marginal table. It may be noted that the United Kingdom does not buy to any large extent hides and skins, except some half tanned varieties, which are prepared by Indian tanners in Madras and in the Punjab.

The exports of raw skins increased by 24,219 cwts to 432,667 cwts, valued at R2,99 lakhs. Of this amount the United States imported 90 per cent or 385,371 cwts, valued at R2,67 lakhs, as against 325,358 cwts, valued at R1,99 lakhs, in the previous year. The United Kingdom took 8 per cent or 33,993 cwts, valued at R19½ lakhs; and France had only 7,573 cwts, valued at R6½ lakhs.

Exports—tanned or dressed hides and skins.

Out of a total export of 272,002 cwts of tanned or dressed hides, the United Kingdom took 270,648 cwts (an increase of 56,533 cwts as compared with 1914-15). Exports of skins tanned or dressed amounted to 127,322 cwts, valued at R2,55 lakhs, against 117,405 cwts, valued at R2,33 lakhs, in the previous year. The principal customers were the United Kingdom and the United States, which took respectively 83,675 cwts, valued at R1,67 lakhs, and 35,452 cwts, valued at R72 lakhs. The United Kingdom decreased her imports by 10 per cent, while the imports into the United States increased by nearly 170 per cent. It may be noted here that a part of the exports of Indian hides to the United Kingdom is also re-exported therefrom to the United States of America.

Provincial shares in the export trade.

Bengal's share in the exports of raw hides was 74 per cent and in raw skins 38 per cent, while Sind or Karachi's share was 16 per cent of raw hides and 25 per cent of raw skins. Burma dealt with 10 per cent of the trade in hides, and Bombay exported 31 per cent of the total exports of raw skins and Exports of tanned or dressed hides and skins (April to March.)

Madras 6 per cent. Of the total exports of tanned or dressed hides Madras exported 82 per cent, and of tanned or dressed skins 83 per cent, against 74 per cent and 83 per cent in 1914-15. Practically the whole of the remainder was

shipped from Bombay. The exports of tanned or dressed hides and skins to the chief importing countries are shown in the margin.

Prices.

Next with regard to prices. The average prices of hides and skins in Calcutta during the last four years were as follows:—

	1913		1914		1915		1916	
	R	a.	R	a.	R	a.	Highest month	Lowest month
Hides, cow (Patna)—per corgie (i.e., 20 pieces of 10 lbs. each)	106	5	118	3	92	11	Nov.	Mar. to May
Hides, buffalo (per 20 lbs.)	12	0	11	10	9	0	Feb.	Sept.
Skins, goat (per 100 pieces)	130	0	121	4	100	13	Dec.	May-June
								Average January to March
								R a.
								95 0
								9 0
								126 10

The declared value of raw hides exported during 1915-16 was R76-15 per cwt, as against R73-8-9 in 1914-15 and of raw goat skins R68-14-2, as against R61-4-7 in 1914-15. The declared value per cwt of tanned or dressed hides was R112-9-5, as against R111-0-9 in 1914-15.

THE JUTE INDUSTRY.

The year ended 31st March, 1916, was for the jute industry an *annus mirabilis*. Throughout the year the industry was in a particularly healthy condition, owing largely to demands connected with the war for sandbags, grainbags, gunny cloth, etc. In the first three months of the year the industry was in a normally prosperous state. In July and the early part of August war demands from the French and Russian Governments, and then from the British Government, were so considerable that the trade entered on an unique period of prosperity. The natural consequence was that the values of gunnies rose quickly. The mills were also carrying large stocks of cheap jute, much of this jute having been secured during the slump in raw jute after the outbreak of war when the Continental market disappeared. The demand for hessians for the Home Government was so great that the Hon'ble Commerce Member discussed with the trade in Calcutta as to how immediate and prospective orders could be fulfilled. The upshot of the conference with the Indian Jute Mills Association was that the mills undertook to meet Government requirements to the fullest extent. The disappearance of the Continental demand and the absence of freight gave the Calcutta mills a complete hold on the market in raw jute for a long period. The forecast of the 1915* crop gave an estimate of 7,424,000 bales, as against 10,531,000 bales in the preceding year. This reduced outturn barely sufficed to cover the mill consumption during the past year, but from their excess purchases in the season 1914-15 they were still able to carry forward fair stocks of the raw material bought at a price which would afford a fair margin of profit if gunny bags and cloth were to experience a fall in price. Another factor which favoured the mills was the good supply of labour. The stoppage of railway and other large projects owing to the war, and the completion of others, such as the Sara Bridge, released a large mass of labour which drifted to the Calcutta mills. It has been estimated that mills have accordingly been able to increase their normal production from ten to twenty per cent. The following summary table of exports will perhaps throw considerable light on the state of the industry during the twelve months ending March, 1916, as against the corresponding period of 1914 and 1915 :—

Exports.

		1913-14	1914-15	1915-16

Raw jute	tons (1,000)	768	505	600

RAW JUTE.

The area under raw jute during 1915 declined by 29 per cent and the yield by 30 per cent, as will be seen in the marginal table, which shows the area, outturn, mill consumption, and actual exports during the last five seasons (July to June). Although the crop in the 'deshi' areas—the Presidency and Burdwan divisions—was good, and moderately so in Northern Bengal, it was disappointing in Eastern Bengal, especially in low lands where excessive floods occurred in certain districts. Prices, which in December, 1914, had fallen 48 per cent below the pre-war prices, recovered from R37 per bale of 400 lbs for "cracks" in May to R55 in September, 1915. Prices fell again to R49 in December, and, with slight oscillations, the year closed at R59 per bale. In the United Kingdom the price of raw jute rose from about £19 per ton to £26-10 in December, and £35 in March. The chart below illustrates the

Season (1st July 30th June)	Area	Outturn	Mill consumption	Actual exports
	acres (1,000)	bales (1,000)	bales (1,000)	bales (1,000)
1911-12	3,106	8,235	3,756	4,641
1912-13	2,970	9,843	4,435	4,966
1913-14	2,911	8,894	4,374	4,310
1914-15	3,359	10,444	4,944	3,046
1915-16	2,377	7,845	5,770	3,157

*The estimate for 1916 is 8,340,000 bales.

† The total number includes bags of different dimensions and weight.

average Calcutta prices of pucca bales ('double triangle M' group) month by month in the last three years :—

11.—RAW JUTE.

(M GROUP)

(Per Bale of 400 lbs.)

Exports.

The total exports of raw jute amounted to 600,113 tons (3,360,633 bales) against 505,095 tons (2,828,532 bales) in 1914-15, and the value rose from Rs. 13 crores to over Rs. 15½ crores. The increase in quantity was 19 per cent, and in

	1914-15		1915-16	
	Tons 1,000	Rs. (lakhs)	Tons 1,000	Rs. (lakhs)
United Kingdom . . .	266	6.74	339	9.23

Other countries . . .	49	2.04	7	.19
Total . . .	505	12.91	600	15.64

value 21 per cent. The average declared value was Rs. 260-10 per ton, as against Rs. 255-10 per ton in 1914-15. The largest customer was the United Kingdom. The principal importing countries are noted in the margin. It will be seen that the United Kingdom, the United States,* Italy, Spain, and Brazil increased their demands, and therefore shared in the trade that was formerly done with hostile countries. Practically the whole of the trade belonged to Bengal (99 per cent), and the remainder to Madras.

An export duty on raw jute came into force in March, 1916. A general rate of Rs. 2-4 per bale of 400 lbs, approximately equivalent to an *ad valorem* duty of 5 per cent, was imposed. A special rate of 10 annas per bale has been levied on cuttings.

JUTE MANUFACTURES.

The main features of the year as regards jute manufactures have already been described. It remains to describe the fluctuation in English and Indian prices for the manufactured article, and also the direction and extent of the exports.

Firstly, with regard to prices.—In Calcutta the price for 40"—10½ oz. hessians per 100 yards was Rs. 14-8 in April, 1915, and gradually rose to Rs. 21 in July. In November the price fell to Rs. 18, after which date an upward movement took place. In the middle of February, 1916, the price was Rs. 27, the highest price since the outbreak of war. Similarly the price of "A" Twill bags 44" × 26½", 2¼ lbs. hemmed, per 100 bags opened

*The large increase, it may be noted, in the exports of raw jute to the United States coincided with a decrease in the quantity of jute manufactures exported thereto.

at R31-12, rose to R38 in July, 1915, and dropped to R32-4 in August. In the latter part of the year prices moved in an upward direction, and were R41 in March, 1916, as against R31 in March, 1915. The average price for the year was R19-3-8 for 40"-10½ oz. hessians as against R12-8-6 in the previous year, and R34-15-2 for "A" Twill bags as against R32-7 in the year before. The present classification of gunny bags and cloth in the trade returns has been, it may be noted, improved by subdividing each of the heads into hessians and sacking. This change has been introduced with effect from 1st April, 1916.

Next with regard to exports.—The exports of gunny bags and cloth reached ^{Exports.} in 1915-16 a record figure. The

Exports of Gunny bags and cloth in 1915-16.

	Gunny bags.		Gunny cloth.	
	No. (millions)	R (lakhs)	Yards (millions)	R (lakhs)
Allies—				
United Kingdom	297	4.84	182	2.81
Russia	86	2.58	19	30
France	86	1.65	33	51
Japan	7	24	4	4
Total	476	9.31	234	3.62
Neutrals—				
United States	44	90	661	9.20
Spain	1	1
Total, including other countries.	794	20.15	1,192	17.67

The marginal table shows the exports of gunny bags and cloth (1) to the allies, and (2) to certain neutral countries. It will be seen that of R20,15 lakhs worth of gunny bags exported, 46 per cent (R9,31 lakhs) went to the allies, chiefly to the United Kingdom, Russia, and France. Of gunny cloth exported, 52 per cent went to the United States of America, and 16 per cent to the United Kingdom. The total value of gunny bags exported rose

from R12,59 lakhs in 1914-15 to R20,15 lakhs and of gunny cloth from R13,11 lakhs to R17,67 lakhs. The chief importing countries are as follows, the previous year's figures being given in brackets:—(i) *Gunny bags* (in millions); the United Kingdom 297 (47); Russia 86 (8); Australia 59 (54); the United States of America 44 (73); Chile 38 (27); West Indies 22 (14); China 22 (18); Java 20 (20); and Egypt 15 (9). (ii) *Gunny cloth* (in millions of yards)—the United States of America 661 (706); the United Kingdom 182 (68); the Argentine 180 (187); Canada 63 (35); and Australia 27 (30). It may be noted that with effect from 1st March, 1916, an export duty of R16 per ton on hessians and R10 per ton on sacking has been imposed. This corresponds in each case to the taxation, at 'raw jute' rates, of the material used in the production of the goods.

During the year 1915-16 there were 70 jute mills*, which employed 254,143 ^{Jute mills and shares.} persons, 39,890 looms, and 812,421 spindles. In the previous year there were 70 jute mills, employing 238,274 persons, 38,379 looms, and 795,528 spindles.

The share lists include 39 companies with a paid up capital of R6,73 lakhs.† One of them declared a dividend of 110 per cent, one 70 per cent, two 55 per cent and over, two 50 per cent, twelve 30 per cent and over, six 20 per cent and over, eight 10 per cent and over, three 5 per cent and over, and one less than five per cent. Three only declared no dividend. The leading feature of the Calcutta stock exchange in the year under review was the increase in the price of jute shares. The average value of the shares in jute mill companies in 1915-16 for each hundred rupee share was for the year ended 31st March:—

	1913	1914	1915	1916
R100 Share	R	R	R	R

quantity and value of such articles imported and exported by sea during 1915-16 as compared with 1914-15 are noted in the margin. The exports of manures, including oilcake of all kinds and saltpetre, during 1915-16 amounted to 231,162 tons, valued at R2,27 lakhs, of which over 50,600 tons were in the form of bones, the United Kingdom and the United States of America being India's two best customers. The export of bones

that annually leave the country is noteworthy.

METALS AND ORES.

Exports of metals and ores.

India's exports of metals and ores are relatively small, as India is not so far a great producer of minerals. Her exports during the year of iron, steel, lead, manganese ore, wolfram, etc., were valued at R2,18 lakhs, of which metals represented 83,883 tons, valued at R79 lakhs, and ores 478,187 tons, valued at R1,39 lakhs. As the Director of the Geological Survey recently pointed out, with reference to the Indian mining industry, "One of the most striking of the many revelations brought home to us by the war is the enormous hold that Germany had obtained over the world's metal markets and the vast ramifications of the German metal ring. For years past Germany had been gradually acquiring control not only of metals but of the raw materials for their production; her activities extended all over the world and embraced not only Europe but America, Australia, and India. Thus, for example, she had acquired control of the zinc ores of Australia, where the Zinc Corporation had contracted to sell her their concentrates until the year 1919. The whole of the wolfram output of Burma went to Germany, and the world was dependent on her for a great part of its supply of tungsten and of ferro-tungsten. Again, the monazite sands of Travancore were controlled by her, and she regulated the price and output of the mineral and the production from it of thorium nitrate, thereby controlling also the gas-mantle industry. These are only three of the many instances that might be adduced to show the thorough but insidious manner in which Germany had gradually acquired an industrial position of extraordinary power."¹

Manganese Ore.

The exports of manganese ore amounted to 472,563 tons, valued at R83 lakhs, in 1915-16 against 440,590 tons, valued at R75 lakhs, in 1914-15. The United Kingdom took 380,967 tons (or over 80 per cent of the total exports), valued at R66 lakhs, against 227,281 tons (or 51 per cent of the total exports), valued at R40 lakhs, in the previous year. The exports to the former principal customers

(a) Represent the total exports of oilcake for manures, fodder, etc.

* Shown in the trade returns under "Chemicals."

¹ Presidential Address—Mining and Geological Institute of India, 1916, H. H. Hayden, F.R.S.

—the United States and France—were reduced by 26,103 tons and 26,326 tons to 47,400 tons and 20,000 tons respectively. The average declared value per ton was R17-9-3 against R17-1-5 in 1914-15. The effects of an embargo on exports to certain countries are seen in the above figures of exports.

Next with regard to wolfram. On the outbreak of war, as already noted, a serious situation arose with regard to the production of tungsten. Germany at that time held a monopoly for the production of tungsten in Europe. Half the world supply of ore, the world's supply being about 8,000 tons per annum of concentrates carrying from 60 to 70 per cent of tungstic trioxide, WO_3 , was absorbed by Germany which produces the metal. The United Kingdom was, therefore, dependent on that country for the supply of tungsten for the manufacture of high-speed tool-steel. The steel manufacturers in Great Britain after the outbreak of war took steps to produce their own tungsten, and a company known as the High Speed Steel Alloys was formed for the purpose. The British Government, in order to avoid the detrimental effects of competition and speculation, fixed the price at 55s per unit of WO_3 for 65 per cent ore; this gave a large profit to the producer of wolfram, who received £180 and £190 per ton of ore of the average quality produced in Burma, as against £100 before the war. None of the ore produced in the British Empire, it may be noted, is at present sold to producers of tungsten who are not British. The tungsten industry, therefore, has been taken out of the hands of Germany and a new British industry has been established. In Burma special steps have been taken to supervise the industry of Tavoy, which is one of the chief producing districts of the world. The result has been a remarkable increase in production. Several months, however, must still elapse before the steps taken to increase the output have borne fruit. The Director of Geological Survey believes that Burma should be able to increase its production to between 4,000 to 5,000 tons of wolfram per annum.

The exports of tungsten (wolfram ore) are given in the marginal table. The largest customer is the United Kingdom, which took 2,617 tons, valued at R51 lakhs, against 1,118 tons in 1914-15. The average declared value was R1,924 per ton against R1,376 in 1914-15, an increase of 41 per cent.

	Tons	R (lakhs)
1912-13	1,763	24
1913-14	1,379	27
1914-15	1,916	26
1915-16	2,787	54

The development of the iron or steel industry in India practically began in 1875 by the

Barakar Iron Works Company, which was formed into the Bengal Iron and Steel Company, Limited, in 1889. The operations of this Company have developed and progressed rapidly, and are confined to the manufacture of pig iron and castings, such as railway pot sleepers and chairs, fencing posts and sockets, columns for buildings, and cast iron pipes and spinals for water and irrigation works. The quality of the iron produced at these works is equal to the imported article. The Tata Iron and Steel Company, Limited, floated in 1906,

	1914-15	1915-16
	Tons	Tons
Pig iron	235,791	250,553
Steel	98,074	114,846
Blooms	83,048	99,985

Bars	3,762	26,553
Pipes	6,869	9,158
Railway Sleepers and chairs	8,653	17,899
Mill columns and castings	6,387	9,524
Total	504,564	584,775

have also gone far towards the further development of the industry in India. Prior to 1915 the output of steel from these works was converted into rails and structural sections to the British standard specification, but more recently over 85 per cent of the output has been commandeered by Government for munition steel. The daily average number of persons employed by these Companies during 1915-16 was 12,524 men and 4,217 women, of whom 178 were Europeans and 16,563 Indians. The Indian production, so far as known, is shown in detail in the margin.*

The quantity, it is said, is sufficient to supply the present requirements of India and to leave a fairly large tonnage available for the markets of Australia and the Far East, where the brands are beginning to be well known and command favourable prices.

* During 1915-16, Indian pig iron was exported to Japan, Hongkong, Australia, the Philippines, New Zealand, Shanghai, the Straits, Java, Ceylon, Siam, and Italy, and structural steel was exported to Japan and the Straits.

Iron or steel.

The exports of iron or steel amounted to 72,682 tons, valued at R40 lakhs, against 52,800 tons, valued at R28 lakhs, in 1914-15, and were directed mainly to Japan, Australia, and China.

Exports of iron or steel

Lead.

Lead is produced from the Bawdwin mines in Burma. The amount of lead extracted in 1914 was 10,548 tons against 5,858 tons in 1913. The output of the ore at the mines last year was far larger than in the previous year, as will be seen from the figures of exports, namely, 10,848 tons, valued at R36 lakhs, against 6,518 tons, valued at R17 lakhs. This metal is now in great requisition for munition purposes. The countries of shipment are shown in the margin. The exports to Japan were permitted under license.

OILS AND OILSEEDS.

(1) Oils.

Oils.

The slow but steady progress in the exports of oils continued last year, and the increase amounted to 2½ million gallons in quantity and R16½ lakhs in value, the total exports in 1915-16 being 33 million gallons, valued at R1,22 lakhs.

The marginal table shows India's chief exports of non-essential oilseeds,

	SEEDS		OILS		OILCAKES	
	1914-15	1915-16	1914-15	1915-16	1914-15	1915-16

TOTAL	14,51	9,88	70	83	1,06	1,14

and their oils and oilcakes in the last two years. It will be seen that the exports of oils are very much less in value than the exports of oilseeds. The exports of oilseeds, which were mainly directed before the outbreak of war to Continental countries,* have naturally been curtailed, and the trade in oils has, on the other hand, shown signs of improvement. In connexion with the export of oils, the feature of the year was the

abnormally large exports, notably to the United Kingdom, of castor oil and to the United States of coconut oil.

Mineral oil (petrol, etc.).

The export trade in mineral oils, which is almost entirely confined to Burma, increased by nearly 2 million gallons to 28 million gallons, valued at R27½ lakhs, against 26 million gallons, valued at R25½ lakhs in 1914-15. During the calendar year 1915 the total output of petroleum in Burma alone was estimated

Production of petroleum in Burma.

Mineral oil available for consumption in India

	Production million gallons	Imports million gallons	Exports million gallons	Available for consumption million gallons
1913-14	277	95	22	350
1914-15	259	107	26	340
1915-16	287	96	28	355

at 282½ million gallons against 254½ million gallons in 1914; showing an increase of 28 million gallons or 11 per cent. This was an increase of 10 million gallons over the 1913 record figure of 272½ million gallons. The Yenangyang field remains the chief source of production, although a still

Benzine, Petrol, etc.

further increase is anticipated in the production of the Singu field to make up for any possible falling-off in the output of the older field. In recent years the trade in petrol has advanced by leaps and bounds. Of the total exports of mineral oil,

* In normal years before the outbreak of war, about 95 per cent of the exports of oilseeds went to belligerent countries, and the sudden closing of some of these markets and the curtailment of the demands of others led at first, especially as regards copra and groundnuts, to a serious situation.

amounting to over 28 million gallons, over 25 million gallons were benzine, petrol, and other motor spirit, valued at R22½ lakhs, against 21½ million gallons, valued at R20½ lakhs, in 1914-15, and other kinds including fuel oil, lubricating oil, etc., nearly 3 million gallons, valued at R4½ lakhs, against over 4½ million gallons, valued at nearly R5 lakhs, in the previous year. Exports of benzine rose by over 3½ million gallons or 17 per cent and were consigned to the United Kingdom. 86,000 gallons were shipped from Bombay for the Expeditionary Forces in East Africa and Mesopotamia. Other kinds of mineral oil, which include Navy fuel, declined by 1½ million gallons or R1½ lakhs to about 2½ million gallons, valued at R2 lakhs. Shipments were confined to the United Kingdom and Egypt. There was an improvement under lubricating oils, the total exports rising by 67,300 gallons to 221,660 gallons, mainly to Australia and Ceylon.

Lubricating oil.

(2) Oilseeds.

The total exports of seeds in the year under review again decreased by 27 per cent to 699,963 tons, which were valued at R10,12 lakhs. The decrease as compared with 1913-14 was 882,678 tons or 56 per cent in quantity and R15,55 lakhs or 61 per cent in value. This was due mainly, if not entirely, to the cutting off of the enemy markets, and to the curtailment of the demands of other Continental countries.

Oilseeds exports.

	1913-14			1914-15			1915-16		
	Tons (1,000)	Rs (lakhs)	Value per cwt Rs	Tons (1,000)	Rs (lakhs)	Value per cwt Rs	Tons (1,000)	Rs (lakhs)	Value per cwt Rs

seen from the marginal table. The exports from Bombay showed a decrease of 31 per cent, from Bengal of 52 per cent, and from Sind of 4 per cent, while those from Madras increased by nearly 11 per cent.

The exports during 1915-16 were drawn partly from the crops of the season

Production.

	1914-15		1915-16	
	Acres (1,000)	Tons (1,000)	Acres (1,000)	Tons (1,000)

Linseed	3,325	397	3,317	474
Sesamum	5,565	551	5,170	501
Groundnuts	2,413	947	1,935	1,011

with the belligerents interfered with larger sowings under each of the crops, although the outturn was in most cases higher in 1915-16 as compared with 1914-15.

The special features of the trade are briefly noted in the following paragraphs:—

The quantity of linseed exported is on the average of the past five years about 71 per cent of the total production. The condition of the crop of the season 1914-15, which came into statistical consideration in the year of report, was on the whole fair to good, except in Bihar and Orissa, Bengal, and in the southern and eastern districts of the United Provinces, where the crops were adversely affected by drought. The area sown was 3,325,000 acres or an increase of 294,000 acres or 10 per cent over 1913-14, and the yield was estimated at 397,000 tons or an increase of 3 per cent. The crop of the present season has been estimated at 474,000 tons on an area of 3,317,000 acres, showing an increase of 19 per cent in yield, but a decrease of 0.2 per cent in acreage as compared with 1914-15.

Linseed.

Shipments of linseed from India during the year were much below those

Other Countries .	18,777	15,209	9,643
TOTAL	277,907	138,322	175,443

The trade in groundnuts, which was seriously affected by the war in 1914-15, improved in the year of report. The exports increased by 37,120 tons or 27 per cent to 175,443 tons, valued at R2,50 lakhs—France, the principal customer, taking 165,800 tons, valued at R2,37 lakhs, or 94 per cent of the total exports against 109,108 tons, valued at R1,83 lakhs in 1914-15.

The total area under the crop returned for 1915-16 was 1,935,000 acres or a decrease of 478,000 acres or 20 per cent, and the estimated yield 1,011,000 tons of nuts in shell or an increase of 64,000 tons or 7 per cent, as compared with the 1914-15 crop. The season was on the whole favourable for the crop. The price per cwt of groundnut at the end of January, 1916, was R7-13-4 at Madras, which shipped 86 per cent of the exports, against R5-4-8 and R9-0-4 on the corresponding date of 1915 and 1914. Freights from Madras to Marseilles, which receives about four-fifths of the total exports, were £4 7s 6d per ton in April, 1915, but on account of scarcity of tonnage and the depredations of enemy submarines in the Mediterranean, rates increased to £6 5s in November, £8 in January, and £9 in March, 1916.

Rapeseed.

The exports of rapeseed decreased to 95,214 tons, valued at R1,41 lakhs,

Exports of Rapeseed

	1913-14	1914-15	1915-16
	Tons	Tons	Tons
United Kingdom .	14,099	24,381	47,473
Germany . . .	58,199	8,107	...
Belgium . . .	98,869	26,861	...
France . . .	53,943	20,593	40,280
Italy . . .	13,727	14,758	6,375
Other countries .	10,168	1,912	1,086
TOTAL	249,005	96,912	95,214

against 96,912 tons, valued at R1,63 lakhs, in the previous year. The crop of 1914-15, which mainly contributed to the exports during 1915-16, was estimated at 1,219,000 tons on an area of 6,507,000 acres. This was 12 per cent better than the previous crop. The conditions of the crop were fair to good in the southern parts of the United Provinces, Bengal, and Bihar and Orissa, but unfavourable elsewhere, owing to insufficient winter rains. The area sown in 1915-16 is reported to be 6,373,000 acres, and the estimated yield

1,083,000 tons, showing a decrease of 2 per cent in acreage and 11 per cent in outturn as compared with 1914-15. The proportion of exports to the total production is about 15 per cent in normal years. The United Kingdom and France took nearly double the quantity they had taken in 1914-15, because none could be obtained from Russia, while the exports to Italy were reduced by a half as will be seen from the figures in the margin. The declared value per cwt declined by a rupee to R7-6-3. The wholesale prices per maund in Calcutta ranged between R6-8-0 in March, 1915, and R5 in August, closing at R5-8-0 in March, 1916.

The trade in cotton seed, which is almost entirely exported to the United Kingdom, was considerably reduced by 112,125 tons, and R84 lakhs, to 95,664 tons, valued at R67 lakhs. Egyptian cotton seed is believed to be ousting the product of the East. This large falling-off was not due to a bad crop, but to the abnormally high rates of freight, which leave so small a price to the Indian grower that he has kept the seed for home consumption. Prices rose from £6-5-5 in January, 1915, to £7-12-6 in March, to £9-2-6 in September, to £13 in December, 1915, to March, 1916. Although the present price at Hull is the record one of £13, no less than half the amount goes in freight and expenses. Large supplies are not likely to be exported until freights are considerably reduced.

TOTAL	38,192	31,846	15,678

by 16,168 tons or 51 per cent and R66 lakhs or 53 per cent to 15,678 tons, valued at R57 lakhs. No shipments, of course, to Germany have been made since August, 1914. Belgium and Russia used to be the principal buyers of copra. In the year under review the United Kingdom took no less than 43 per cent and France 55 per cent, as

against 27 per cent and 15 per cent in 1914-15. The shortage of tonnage and higher rates of freight interfered with the trade, and average prices fell from R19-6 in 1914-15 to R18-4 per cwt last year. Copra crushing factories have been started in the United Kingdom, as a result of the war, for the manufacture of margarine from copra. As regards exports to France, the Madras Presi-

" Other countries	353	7	598	10
TOTAL	10,856	1.76	8,786	1.47

valued at R1,47 lakhs, as compared with 10,856 chests, valued at R1,76 lakhs, in 1914-15. The exports were entirely from Bengal as in the previous year. The importing countries are shown in the margin. The average price

of opium realised at auction sales in 1915-16 was R1,719 per chest against R1,568 in 1914-15, and R2,120 in 1913-14.

* A chest of opium is 140½ lbs

In addition to the exports of opium noted above, the Governments of the Straits Settlements and Hongkong receive direct from India the amount which they require. The amount of opium which is announced for auction excludes the requirements of these two Governments.

SILK EXPORTS.

Raw and manufac-
tured silk.

The trade in Indian silk, raw and manufactured, is at present of no more than historic interest, as the trade has been greatly reduced in the past thirty

I. Exports of raw silk including chasam and cocoons

		lbs (1,000)	R (1,000)	Vari- ation

years from R66½ lakhs in 1885-86 to R15½ lakhs in 1914-15. As a result of the war, however, the trade showed last year in some degree signs of revival from its decadent condition, both as regards its volume and value. The value of exports during 1915-16 improved by R12 lakhs to R27½ lakhs, of which raw silk accounted for R24 lakhs. Raw silk exports, both from mulberry and non-mulberry feeding silk worms, advanced by 42,454 lbs or 51 per cent and R4¼ lakhs or 53 per cent to 125,166 lbs and R12¼ lakhs, the declared value per lb of raw silk rising from R9-10-7 to R9-12-4; and chasam (waste) and cocoons from 433,570 lbs and R4 lakhs to 1,137,637 lbs and R12 lakhs. The increase in total exports was due to larger shipments to the United Kingdom, France, and Italy.

The value of silk manufactures exported during 1915-16 stood almost

	Million lbs	Million lbs	Million lbs
India	72	813	307
Ceylon	210	195	192
Java	90	71	65

The special feature in tea of the year 1914-15, namely, a large outturn coupled with remarkably high prices, also characterised the year under review. The record figures for 1913 and 1914 as regards production and consumption were again exceeded last year, as will be seen from the marginal table. The exports rose by nearly 38 million lbs to 338½ millions, valued at R19.98 lakhs.

The total production of tea in India was 372 million lbs in 1915, being some 59 million lbs or 19 per cent over the figures of the previous year. The total area under tea increased from 624,500 acres to 636,200 acres, but 51,350 acres were not plucked. This unplucked area represents new tea, chiefly in Assam, the

as against 691 lbs in 1914.

Prices.—A feature throughout the year was the strong demand for common and medium descriptions of tea, resulting in a somewhat limited enquiry for the finer kinds. Prices responded so that an average of 10 annas 6 pies, about 2 annas above the normal, was registered at the early sales, and this rose by regular gradations until it reached the high level of 11 annas 11 pies per lb. There were no difficulties in the way of supplies. The increase in quantity brought about a sharp fall in prices for standard qualities, and the average price was below 8 annas per lb in September. Offerings were then moderated until the strong demand steadied the market and brought prices back to the level above those of previous normal years. The average for the huge quantity sold at the Calcutta auction sales was nearly 9 annas per lb, as against 7 annas 6 pies in 1914-15, and 7 annas 10 pies in 1913-14. The fact that tea advanced in the London market nearly 50 per cent in price was largely due to the anticipatory duty payments in February and March, 1915. The apprehension of scarcity resulted in an average price being reached in June for Indian and Ceylon teas of 1s 0 $\frac{3}{4}$ d per lb against 8 $\frac{3}{4}$ d in the preceding year. When the new crops began to arrive, prices steadily receded until in several cases a fall of 4d to 5d per lb was recorded in November. Since then the market again firmed up and in the beginning of 1916 a recovery of nearly 2d per lb was quoted for the lowest qualities. The average values for the whole year of the different growths were: India 10.98d, Ceylon 11.1d, and Java 10.7d, against 9.3d, 9.1d, and 8.6d, per lb, respectively, in 1914. The Indian average is higher than it has been since 1891 when it was 10 $\frac{1}{4}$ d and the Ceylon is the highest since 1889 when it was 11 $\frac{1}{4}$ d.

Freights.—The rate of freights for tea from Calcutta to London was £1 13s 9d at the end of March, 1915, which advanced to £2 7s 6d on 20th May, 1915; since then this rate remained stationary for the remainder of the year under review. The Liners' Conference has, as is well known, an agreement with the Indian Tea Association in regard to freights. The present rate is 36 per cent over that at the outbreak of war.

Exports.—Of the total exports by sea of 338 $\frac{1}{2}$ million lbs, valued at R20 crores, the United Kingdom took 250 $\frac{1}{4}$ million lbs, valued at R14 $\frac{3}{4}$ crores, an increase of 13 million lbs or over 5 $\frac{1}{2}$ per cent as against the previous year. The shipments from Calcutta direct to other consuming countries showed a satisfactory increase and so reduced the quantity for 'dumping' in the London market. Russia showed a large increase in offtake—over 36 $\frac{1}{2}$ million lbs against 20 million lbs in 1914-15, as also did the Persian Gulf Ports (Persia and Asiatic Turkey) from 3 million to 9 million lbs. The United States of America, Ceylon, and China took moderately increased quantities. Australia, however, showed a falling-off. Canada also curtailed her demands direct from India. According

Last autumn was unusually favourable for a prolific yield, but under the stimulus of high prices ruling in the London market for common tea during the summer months, the temptation to sacrifice quality to quantity was too great and coarse plucking on a large scale was the consequence. The quality of Indian tea brought on the London market was distinctly below the average, and the danger of this policy at a time of increasing competition from Java and the new countries of production where more care in plucking and manufacture has often been noticeable, ought to be brought to the notice of garden managers. The average production in India (excluding Burma) was 637 lbs per acre, as against 554 lbs returned in the preceding two years. The highest production was as usual in Darrang, which was 798 lbs in 1915,

to the Board of Trade returns for the calendar year 1915, the United Kingdom

Exports by land	1,786	1,943	...	8	10
GRAND TOTAL	302,519	340,413	...	15.61	20.08

imported 433 million lbs of tea against 372 millions in 1914, of which over 317 million lbs were entered for home consumption as in the previous year. 65½ million lbs were re-exported during 1915 against 68½ millions in 1914; and of this British East Indies tea represented 24½ million lbs against 30½ millions in 1914. In this trade the share of Russia was less than a million, and of other European countries 11 millions. The United States took 2½ million and Canada 4½ million lbs. The outstanding feature of the year in tea at Home was the advance of the customs duty to 1s per lb from 21st September, 1915, the highest levied since

the budget of 1864.

In addition to the increased duty levied in the United Kingdom, tea has been used as a medium towards the raising of revenue in this country, in the form of a small export duty of R1-8 per 100 lbs with effect from 1st March, 1916.

It may be added that the value of the total imports of tea chests, mainly of wooden chests, amounted to over R81 lakhs. The marginal table shows the principal countries from which wooden chests were imported during, 1914-15 and 1915-16.

Tea chests.

	1914-15 ₹(1,000)	1915-16 ₹(1,000)
United Kingdom	39.68	65.27

The exports of wood and timber other than railway sleepers and wood

Teak Exports

Teak.

	Cubic tons	₹ (lakhs)	Average value per cubic ton
1912-13	61,421	95	155
1913-14	50,737	79	155
1914-15	44,626	85	190
1915-16	32,403	61	187

manufactures were valued at R78½ lakhs against R92½ lakhs in 1914-15. The exports of teakwood decreased from 44,626 cubic tons, valued at R85 lakhs, in 1914-15, to 32,403 cubic tons, valued at over R60½ lakhs. The United Kingdom took 25,845 cubic tons, valued at R49 lakhs, and Ceylon and Cape Colony together 1,665 cubic tons worth R2½ lakhs.

Sandalwood.

Exports of sandalwood were valued at R15½ lakhs against R5½ lakhs in 1914-15. This increase was due to the clearance of the accumulated stocks in the Mysore forests. The United States and the United Kingdom received sandalwood to the extent of R8½ lakhs and R5 lakhs, respectively.

WOOL.

Wool.

The wool trade during 1915 was completely dominated by the war. The mobilisation of many millions of allied troops created a phenomenal demand upon the world's woollen industry. This demand stimulated larger exports of raw wool from India, which amounted to over 65 million lbs, valued at R3.79 lakhs, representing an increase of nearly 21 million lbs in quantity and R1.42 lakhs in value. The exports and re-exports are given in the marginal table.

Exports of raw wool.

	1913-14	1914-15	1915-16
Exports—	(1,000) lbs	(1,000) lbs	(1,000) lbs
To United Kingdom	47,489	43,755	64,501
„ United States of America	809	621	334
„ Other countries (chiefly to France, Italy and Japan)	624	234	188
Re-exports (i.e., wool imported across the border by land and re-exported)—			
To United Kingdom	8,879	8,690	15,398
„ United States of America	1,351	1,211	1,432
„ Other countries	16	23	13
Total Exports and Re-exports	59,168	54,534	81,866

The raw wool re-exported (*i.e.*, wool chiefly imported by land across the border into India and exported by sea), during 1915-16, amounted to nearly 17 million lbs, valued at R1,02 lakhs, of which the United Kingdom accounted for 15½ million lbs, valued at R91½ lakhs, and the United States of America 1½ million lbs, valued at R10½ lakhs. The re-exports from Bengal, mainly Thibetan wool, amounted to 373,800 lbs, valued at R2½ lakhs; from Bombay 1,335,908 lbs, and from Karachi 15,132,329 lbs. Practically the whole trade was with the United Kingdom, which accounted for the increase.

Re-exports of raw wool.

The embargo on the export of Thibetan wool, which was withdrawn in September, 1915, was reimposed with effect from 21st January, 1916. The position at the end of the year was that the Thibetan and Madras (black and grey) varieties of wool might not be exported from British India, while wool of other descriptions might be exported under license subject to limits of quantity. With effect from 1st February, 1916, exports of wool including animal hair and wooled and haired (sheep or goat) skins from India to the United States have been restricted, inasmuch as they should not be allowed except when consigned to the Textile Alliance or to certain banking houses on its behalf. Under the Defence of India (wool purchase) rules, 1916, the purchase or delivery of wool which has been brought into British India from or through the State of Sikkim is not allowed without licenses.

Restriction on the exports of raw wool.

The value of woollen manufactures exported during 1915-16 was R24 lakhs against R17 lakhs in 1914-15. These are chiefly carpets and rugs, of which the quantity rose by 538,097 lbs, or 51 per cent, to 1,582,000 lbs, and the value by R6½ lakhs, or 42 per cent, to nearly R22 lakhs. The share of the United Kingdom was nearly 70 per cent and of the United States over 11 per cent of the total trade. The other chief importing countries were Cape Colony, Natal, Australia, and New Zealand. There are also woollen manufactures imported by land into India, chiefly from Afghanistan and Tibet, and exported abroad by sea. They are chiefly in the form of carpets and shawls. They were valued at over R4 lakhs in 1915-16, as against nearly R3 lakhs in 1914-15, and R4 lakhs in 1913-14.

Exports of woollen manufactures.

Re-exports of woollen manufactures.

In 1915 there were six woollen mills at work with an authorised capital of R2,71 lakhs, 1,151 looms, and 40,712 spindles, which employed 6,566 persons.

The Indian Woollen Industry.

	1913	1914	1915
No. of mills	7	7(a)	6
Capital (R lakhs)	53	1,45	2,71
Looms	1,181	1,201	1,151
Spindles	40,770	40,864	40,712
Persons employed	4,053	4,664	6,566

Comparative figures for the last three years are given in the marginal table. The production was estimated at over 10 million lbs, valued at R1,23 lakhs, showing an increase of 4 million lbs, or R43 lakhs over the figures for 1914.

CHAPTER V.

Customs, Shipping, and Freights.

CUSTOMS REVENUE IN 1915-16.

The outstanding feature of the year was the amendment in March, 1916, of the Indian Tariff Act of 1894 to enable the Government of India to obtain increased revenue from customs duties. The general tariff rate of 5 per cent on imported articles, which remained unchanged from its imposition in 1894, has been raised to 7½ per cent, the rate of one per cent on certain descriptions of iron and steel has been enhanced to 2½ per cent, special increased duties have been levied on arms and ammunition, beer, wines and spirits, cigars, cigarettes, and other manufactured tobacco, sugar, and silver plate and other manufactures, and the number of articles on the free list has been considerably curtailed by the imposition of import duties on hitherto free articles, *e.g.*, machinery (except cotton spinning and weaving), railway materials, food grains, coal, printing materials, etc. The import duty of 3½ per cent *ad valorem* on woven cotton goods has not been revised in the new Act, but has been classified under special duties in the revised schedules. The import tariff

General.

(a) One mill, however, did not work.

schedule may, therefore, be roughly divided into a free list, a special rates list, a $2\frac{1}{2}$ per cent list, and a $7\frac{1}{2}$ per cent list. In the export trade hitherto rice was the only dutiable article, but in the revised list, export duties have also been levied on jute and tea.

The amended Act has been introduced from 1st March, 1916, and the revenue collected during the eleven months (April 1915 to February 1916) of the past official year was according to the old rates. The revised tariff schedules are printed in Part II, table 57, on pages 102 to 105.

Total revenue.

In 1896-97, the net customs revenue (imports) amounted to R3,45 lakhs. Last year the net revenue reached R7,22 lakhs. The gross revenue from imports, salt excluded*, was R7,37 lakhs—a decrease of nearly 9 per cent as compared with the revenue (R8,07 lakhs) realised in the previous year.

Principal articles.

Customs Revenue.

Articles subject to Special rates of duty—	Rates of duty†	1913-14	1914-15	1915-16
		R(lakhs)	R(lakhs)	R(lakhs)
Liquors	Varying from as.3 to R13 per Imp. gal. and also 5 per cent <i>ad valorem</i> .	1,34	1,22	1,18
Petroleum	One anna and 6 pies per Imp. gal. and 5 per cent <i>ad valorem</i> .	71	86	72
Silver bullion and coin	4 annas per ounce.	99	1,55	96
Tobacco	Varying from R1 to R1-10 per lb. and also R3-2 per 1,000 of cigarettes weighing less than 3 lbs.	29	27	28
Articles subject to General Import duties—				
Cotton manufactures .	$3\frac{1}{2}$ per cent <i>ad valorem</i>	2,13	1,54	1,35
Other manufactured articles.	5 per cent <i>ad valorem</i>	1,53	1,08	1,22
Sugar	5 per cent	92	44	61
Metals (excluding silver) and manufactures thereof.	Varying from 1 to 5 per cent.	73	49	37
Oils, excluding petroleum.	5 per cent	2	2	2
Raw materials and unmanufactured articles.	14	14	14
Articles of food and drink (excluding sugar).	Varying from $2\frac{1}{2}$ to 5 per cent.	30	29	32
Chemicals, drugs, dyes, etc.	Varying from $2\frac{1}{2}$ to 5 per cent.	18	14	15

The principal items from which the revenue was derived in 1913-14, 1914-15, and 1915-16 are noted in the margin. The articles in the Indian tariff on which any revenue of importance is collected, are spirituous liquors, petroleum, sugar, metals, silver bullion and coin, and cotton goods. The only noticeable increases were under sugar and other manufactured articles, and the most important decreases occurred under silver bullion and coin, metals, cotton manu-

factures, and petroleum, mainly attributable to the abnormal trade conditions consequent on the war.

Excise duty.

The excise duty on cotton goods produced in the mills in British India, which is $3\frac{1}{2}$ per cent *ad valorem* as the import duty, was R49 $\frac{1}{4}$ lakhs, and in Native States about R2 lakhs, as against nearly R49 $\frac{1}{2}$ lakhs and R2 $\frac{1}{2}$ lakhs respectively in the previous year.

Export duty.

The export tariff schedule was limited until 1st March, 1916, to rice and rice flour only, the rate of duty being 3 annas on each maund of 82 $\frac{1}{2}$ lbs. The duty realised on rice was R76 lakhs as against R83 lakhs in 1914-15, the decrease being due to smaller shipments, mainly on account of war conditions, including scarcity of shipping and heavy freights.

On rice.

On tea and jute.

The new export duty on tea during March, 1916, amounted to R93,000, and on jute, raw and manufactures, to R1,74,000.

Tax on jute.

The export tax on raw jute and jute manufactures, which was introduced in 1912 for the benefit of the Calcutta Improvement Trust, yielded over R10 lakhs, being nearly R2 lakhs more than in the previous year.

Tea Cess.

Since 1903 a small tax of $\frac{1}{4}$ pie per lb has been levied on all Indian tea exported at the request of the tea industry for promoting its sale and consumption, and this tax yielded in the year under review R3.2 lakhs. Government, it will be noted, merely acts as a revenue collecting agency in regard to this duty.

* While the proceeds of the import duty on salt are credited to "salt" and not to "customs," the revenue from the excise duty on cotton manufactures is included under "customs" receipts. With effect from 1st March, 1916, the salt duty has been slightly raised from R1 to R1 $\frac{1}{4}$ per maund, a rate still less than that levied nine years ago.

† These rates were in force up to 29th February, 1916. For revised rates from 1st March, 1916, see table 57, pages 102 to 105.

SHIPPING.

Shipping statistics, which afford a useful, though not a definite, measure of Foreign shipping, the volume of trade, were of special interest in 1915-16. The nationality, the number, and tonnage of vessels engaged in the foreign seaborne trade will be found in table 59 on page 106.

The shipping clearances with cargoes in the foreign trade from the ports of British India during 1915-16, as compared with the two preceding years, were as follows:—

Tonnage clearances (1) with cargoes in the twelve months, April to March.

	1913-14 Peace conditions.	1914-15 (8 months of which under war conditions).	1915-16 War conditions.
	Tons	Tons	Tons
British ships (including British Indian)	6,281,915	4,553,336	4,898,462
Foreign ships	1,970,272	1,130,242	924,372
Total	8,252,187	5,683,578	5,822,834

Under war conditions the total tonnage clearances declined 29 per cent. Under peace conditions the British tonnage was 76 per cent and foreign tonnage 24 per cent of the total; under war conditions, the British tonnage increased to 84 per cent, while foreign tonnage fell to 16 per cent. These figures do not, it is important to remember, include the large number of steamers hired by Government for transport purposes.

The proportion of steamer tonnage to total tonnage increased steadily from about 97 per cent in 1904-05 to 99 per cent of the total in 1914-15. In 1915-16 the proportion was 98 per cent. The number of steamers that entered and cleared was 5,747 with an aggregate burden of nearly 12 million tons, the average tonnage per steamer being 2,071, as against 2,258 in 1914-15 and 2,683 in 1913-14. In the preceding year the number of steamers that entered and cleared was 5,611 with an aggregate burden of nearly 13 million tons. The entries from and clearances to the United Kingdom were over 3 million tons, being 28 per cent of the total tonnage, as against 3 million tons or 27 per cent in 1914-15, and 3½ million tons or 21 per cent in 1913-14. Entries from and clearances to British Possessions other than the United Kingdom amounted to nearly 4 million tons, representing 32 per cent of the total. The tonnage, therefore, from and to the United Kingdom and British Possessions amounted to 60 per cent of the total tonnage.

The vessels which enter and clear the ports of India for the most part fly the British flag, the tonnage of vessels under that flag representing about 83 per cent of the whole, of which 2 per cent is the tonnage of vessels under the British Indian registry. The number of vessels, which entered and left Indian ports last year, was 6,449* (excluding Native craft), of which vessels of foreign nationalities were 843. Japan had the largest share followed by Norway, Holland, Italy, Russia, and Sweden.

Nationality of Vessels entered and cleared.†	1911-12	1912-13	1913-14	1914-15	1915-16
British	5,117	5,131	4,951	4,827	5,067

FREIGHTS.

The control of shipping.

The pressure of the shipping problem in the year under review was as perplexing and as insistent as ever. The Indian freight market, in sympathy with other freight markets, stood at an abnormally high level, especially towards the close of the year ending the 31st March, 1916. Lord Curzon, speaking in the House of Lords‡ some time ago in his capacity of Chairman of the Control Committee, in answer to a series of important questions put by Lord Beresford,

(1) Include steamers, sailing vessels and Native craft.

* Exclusive of those engaged in the coasting trade. The figures for the coasting trade are: 13,011 vessels entered and cleared with cargoes, excluding native craft.

† Exclusive of Native craft, of which, in 1915-16, there were 2,185 entries and clearances.

‡ Hansard (House of Lords, Volume 21, No. 28. The Depletion of Mercantile Tonnage—3rd May 1916.)

explained very clearly the reasons for the rise in freights, and at the same time made public some very startling figures. He pointed out that the whole of the British mercantile marine, which amounts to one-half of the gross tonnage of the whole world, was under control, and was being administered by the British Government at the present time in the interest of the allied cause. Over 43 per cent of the British shipping, which is suitable for overseas employment, was requisitioned by His Majesty's Government for the naval and military and the essential civil needs of the Allied Governments; 14 per cent was occupied in carrying foodstuffs, war material, etc., on behalf of His Majesty's Government and the Allies; and the remaining 43 per cent was left to the British shipowners and was under State regulation which ensured its employment in the interests of the Allies. Lord Curzon also pointed out that out of a total number of between 3,000 and 4,000 of ocean-going steamers, that is, steamers above 1,600 tons—the Home Government dedicated over 500 of these ships to the exclusive use of France, Italy, and Russia.

This explains clearly why some Indian freight rates in March, 1916, were more than twice the rates that prevailed in the corresponding period of last year and about 12 times the pre-war rates. The average rate from Calcutta to the United Kingdom was 7 times, from Karachi $10\frac{1}{2}$ times, and from Calcutta to the Far East 6 times (in the case of a British Company) and thrice (in the case of a subsidised non-British Far Eastern line), the rate that prevailed at the outbreak of war. The deck passage rates from Calcutta to Rangoon and the Eastern ports did not show any increase as compared with the previous year, although they were considerably higher than the pre-war rates. It is unnecessary to quote here the fluctuations in freights, which, in tables 60 to 65, are given in detail. The chart below shows the rise in freights from the outbreak of war to the end of the financial year ended 31st March, 1916.

12. MONTHLY FREIGHTS OF JUTE AND WHEAT FROM JULY 1914.
(Per ton)

CHAPTER VI.

Frontier Trade.

Frontier trade is carried on with adjoining foreign countries across a land frontier of approximately 6,800 miles.*

	1913-14	1914-15	1915-16
	R(lakhs)	R(lakhs)	R(lakhs)
Imports—			
Merchandise . . .	10,86	10,07	10,37

Total . . .	9,42	9,50	9,50
Total land trade .	21,44	20,94	21,34

The value is comparatively small, being in 1915-16 about 6 per cent of the total sea-borne trade. The effect of the war is noticeable in the heavy imports of raw wool from Afghanistan, which was chiefly re-exported to the United Kingdom and the United States of America. There was also a heavy decline in the trade with Persia for want of transport at Nushki. The Political Agent, Chagai, is of opinion that the war has afforded an opportunity of capturing a

large trade with the north-east of Persia and the west of Afghanistan.

The principal imports across the land frontier of India are rice, oilseeds, provisions (chiefly in the form of ghi and pickled tea), cattle, sheep and goats, which are imported largely from Nepal; horses, ponies, and mules, chiefly from the Shan States; teak from Siam and Karennee in the eastern frontier of Burma; other timber from the north-west frontier (Tirah, Dir, Swat, and Bajaur, and Waziristan); raw wool†, mainly from Afghanistan and Tibet; and fruits and vegetables, chiefly from Afghanistan. The principal exports from India are cotton manufactures‡ and yarn, mostly of foreign origin; the other exports, among which spices, metals, sugar, tea, and salt are the most important, are on a much smaller scale. The following table§ summarises the import and export trade of principal transfrontier countries:—

	1913-14	1914-15	1915-16

For the detailed trade with each of the frontier countries, a reference should be made to table 67, on page 109.

* Taken from the 32 mile Map of India prepared by the Survey of India Department, the figure is approximate, the frontier in many places being indefinite.

† Vide table No. 69, page 109. ‡ Vide table No. 68, page 109.

§ Imports and exports exclude treasure.

SHARES OF PROVINCES.

Shares of Provinces.

It is interesting to note the shares of the various provinces in the total land frontier trade of 1915-16, which are given in the margin. It will be seen

Shares of Provinces in the Frontier Trade.

	Exports.	Imports.	Total.	Percentage.
	R (lakhs)	R (lakhs)	R (lakhs)	
Burma	3,50	3,88	7,38	34.6
Bihar and Orissa	1,60	2,57	4,17	19.5
N. W. Frontier Province	2,02	1,31	3,33	15.6
United Provinces	63	1,37	2,00	9.4
Sind and British Baluchistan	95	1,51	2,46	11.5
Bengal	37	75	1,12	5.3
Punjab	16	17	33	1.5
Assam	10	13	23	1.1
Kashmir	17	15	32	1.5
TOTAL	9,50	11,84	21,34	100

that most of the frontier trade is with Burma (35 per cent) and with Bihar and Orissa (19 per cent), which taken together account for more than half of the total frontier trade. The frontier trade of other provinces is of minor importance—the percentages being 16 in the case of the North-

West Frontier Province, 9 per cent in the United Provinces, 11 per cent in Sind, and 5 per cent in Bengal.

CHAPTER VII.

Coasting Trade.

General features.

The main points of interest in connexion with the coasting trade in 1915-16, as will be seen from the appended tables, are briefly as follows:—

Merchandise and treasure (Private and Government).

	IMPORTS.				EXPORTS.				GRAND TOTAL.	
	MERCHANDISE.		TREASURE.		MERCHANDISE.		TREASURE.		TOTAL.	
	1914-15	1915-16	1914-15	1915-16	1914-15	1915-16	1914-15	1915-16	1914-15	1915-16
	R (lakhs)	R (lakhs)	R (lakhs)	R (lakhs)	R (lakhs)	R (lakhs)	R (lakhs)	R (lakhs)	R (lakhs)	R (lakhs)
Bengal	14,25	14,01	19	8	8,54	7,51	31	28	23,29	21,88
Bihar and Orissa	20	17	18	16	38	33
Bombay	20,53	19,61	7	10	16,10	17,00	1,06	18	37,76	36,89
Sind	6,37	6,49	5	5	3,00	4,05	...	5	9,42	10,64
Madras	7,61	6,67	4	3	5,59	4,94	4	8	13,28	11,72
Burma	10,13	10,49	1,15	85	20,27	19,64	19	51	31,74	31,49
Total	59,09	57,44	1,50	1,11	53,68	53,30	1,60	1,10	1,15,87	1,12,95

(1) The total value was slightly less than in the preceding year, both as regards private and Government merchandise, and also as regards treasure. The aggregate total value declined by R3 crores to R113 crores. (2) The total coasting trade of Bombay remained almost the same as in the previous year, while that of Sind increased. The coasting trade of Burma, Madras, Bengal, and Bihar and Orissa declined. (3) The export coasting trade increased in the case of Bombay and Sind, and decreased in the case of Bengal, Bihar and Orissa, Madras, and Burma. (4) The import coasting trade increased in the case of Sind and Burma and decreased in the case of Bengal, Bombay, Madras, and Bihar and Orissa. (5) The share of Bombay in the total trade was 33 per cent, Burma 28 per cent, Bengal 19 per cent, Madras 10 per cent and Sind 9 per cent. (6) The greater part of the trade was carried on between Burma and Bengal, and between Bombay and Sind. The principal articles of export were from Bengal jute manufactures and coal, from Bombay cotton manufactures, from Sind raw cotton, and from Burma rice, mineral oil, and teak.

The total value of India's coasting trade in merchandise, including bullion and specie, represented about 32 per cent of her total seaborne trade. The marginal table shows the total value of the coasting trade during the past five years, both as regards merchandise and treasure. These figures represent the combined value of imports and exports, and do not show the actual value of the coasting trade as coastwise exports from one province to other provinces are repeated more or less as imports into those provinces. The actual value of the coasting trade may, however, be calculated by adding to the value of the total imports into British ports, the value of the exports from British ports to non-British ports only, the latter transactions being recorded once only at the British ports, since trade is not registered at the non-British ports. The marginal table shows the calculated values for 1915-16 and the four preceding years.

	Merchandise only			Treasure	Grand total
	Private	Government	Total	Private and Government	
	Rs (lakhs)	Rs (lakhs)	Rs (lakhs)	Rs (lakhs)	
1911-12	1,03,50	2,24	1,05,74	11,00	1,16,74
1912-13	1,13,66	2,38	1,16,04	15,33	1,31,37
1913-14	1,18,72	2,05	1,20,77	13,55	1,34,32
1914-15	1,10,72	2,05	1,12,77	3,10	1,15,87
1915-16	1,09,24	1,50	1,10,74	2,21	1,12,95

province to other provinces are repeated more or less as imports into those provinces. The actual value of the coasting trade may, however, be calculated by adding to the value of the total imports into British ports, the value of the exports from British ports to non-British ports only, the latter transactions being recorded once only at the British ports, since trade is not registered at the non-British ports. The marginal table shows the calculated values for 1915-16 and the four preceding years.

Merchandise and treasure.			
	Merchandise	Treasure	Total actual value
	Rs (lakhs)	Rs (lakhs)	Rs (lakhs)
1911-12	59,35	41	99,76
1912-13	63,68	59	1,22,67
1913-14	68,44	1,02	69,46
1914-15	63,00	49	63,49
1915-16	62,00	51	62,51

lated values for 1915-16 and the four preceding years.

The values of the principal articles

Principal articles. Exports of India
Merchandise, coastwise.

	1913-14	1914-15	1915-16
	Rs (lakhs)	Rs (lakhs)	Rs (lakhs)
Coal	2,17	1,87	78
Cotton, raw	2,10	1,74	2,33
" twist and yarn	1,77	1,52	1,25
" piecegoods	4,00	3,71	4,17
Rice, in the husk	2,14	2,32	1,92
" not in the husk	7,49	9,97	10,06
Jute bags	2,78	1,77	1,45
Oil—kerosene	3,74	3,66	3,67
Teakwood	1,23	1,20	1,35

of exports of Indian merchandise (coastwise) are noted in the margin. As compared with the previous year, there were decreases in coal (—Rs 89 lakhs), cotton twist and yarn (—Rs 27 lakhs), rice in the husk (—Rs 40 lakhs), and jute bags (—Rs 32 lakhs). Important increases were noticed in raw cotton (+Rs 59 lakhs), cotton piecegoods (+Rs 46 lakhs), rice, not in the husk (+Rs 9 lakhs), and teakwood (+Rs 15 lakhs).

Principal articles.

It is interesting to analyse the reasons for the variations, as compared with the previous year, in the coasting trade of each province. The coasting trade of Bengal both as regards imports and exports and total trade showed a decrease as compared with the previous year, owing to the continued scarcity of tonnage. Coal, pig iron, gunnies, and tea, which would ordinarily have gone by the cheaper sea-routes, were despatched by rail. The decrease in the imports into Bengal was due largely to smaller imports of groundnuts from Madras, as also of raw cotton and cotton goods mainly from Bombay.

Variations in the coasting trade province by province.

It is curious that the total coasting trade of Bombay should be the same as last year, notwithstanding the decrease in its import coasting trade. The increase in the export trade of Bombay was due to larger shipments of cotton piecegoods to Burma and Sind and of sugar to Sind and Kathiawar. Shipments of grain and pulse also increased due to greater demands for jawar and bajra from Cutch and Kathiawar, and for gram and pulse from Madras.

The import, export, and total trade of Sind increased. The increase was due to larger imports from Bombay of cotton goods (both foreign and Indian) and Mauritius sugar and to larger exports of cotton raw to Bombay, and jawar and bajra to non-British Indian ports. A large portion of cotton goods produced in the Indian mills in Bombay found their way to the Karachi market, and there was a good demand throughout the year.

The trade of Madras decreased, owing to smaller arrivals of grain and pulse under imports, and to smaller shipments of groundnuts and coconut oil under exports. The import trade of Burma increased, owing mainly to larger receipts

of cotton manufactures, tobacco, and coal, and the export trade decreased owing chiefly to smaller exports of raw cotton and paddy.*

Tables,

Detailed tables of coasting trade will be found in Part II of this Report, tables 70—73, page 110.

Shipping.

The marginal table shows the entries and clearances of Japanese vessels in

Japanese vessels (coasting trade).

	Entered				Cleared			
	1914-15		1915-16		1914-15		1915-16	
	Vessels.	Tons.	Vessels.	Tons.	Vessels.	Tons.	Vessels.	Tons.
Bengal	29	102,181	51	152,165	29	100,884	46	136,450
Bombay	4	12,343	6	19,488	9	31,011	13	38,635
Sind	1	3,248	3	9,096
Madras	23	63,830	9	23,936	13	32,240	3	7,232
Burma	29	100,689	49	149,738	33	112,473	58	174,316
Total	86	282,291	115	345,327	87	285,704	120	356,663

the coasting trade of the several maritime provinces of British India during 1914-15 and 1915-16. The number

of vessels entered with cargoes increased from 86 with a tonnage of 282,291 to 115 with a tonnage of 345,327 and that of vessels cleared from 87 with a tonnage of 285,704 to 120 with a tonnage of 356,663. The increase is noticeable, especially in the trade between Bengal and Burma.

CHAPTER VIII.

Inland trade.

Inland Trade.

It is unnecessary to repeat the description which was given in the previous year's Review of the system of inland trade registration. Nor need we refer to the drawbacks in dealing with this branch of trade, namely, the fact that complete figures for the year under review are not yet available, and secondly, that values are not shown in the Imperial Accounts of Inland Trade. Careful estimates have, therefore, to be made for the total trade of the year both for quantity and value as explained in the footnote to table 74 on page 110. The method followed has been identical with that in the previous year. The imports and exports are each 32,530,000 tons, valued at R403 crores (£269 millions), as against 31,673,000 tons, valued at R393 crores (£262 millions), in the previous year (1914-15) and 33,751,000 tons, valued at R447 crores (£298 millions), in 1913-14. In order to get the total imports and exports these figures would require to be doubled as in table 74 on page 110. The same merchandise in the Inland Trade appears, as is well known, once as imports into one block and again as exports from another block⁽¹⁾, and the total imports and total exports of India accordingly correspond.

It is important to note the recovery in the Inland trade as compared with the previous year, when the outbreak of war produced a considerable shock in India's internal markets, especially in regard to those commodities which the belligerents purchased to a very large extent. The imports from up-country into the ports comprise chiefly such produce as grain, raw cotton, and oilseeds. Calcutta also receives a large quantity of coal and coke, raw jute, gunny bags and cloth, hides and skins, and tea; Bombay (port) receives also metallic ores, such as manganese; Karachi raw wool; and the Madras ports hides and skins. The exports from the ports inwards consist chiefly of foreign merchandise imported by sea, such as cotton manufactures, metals and metal manufactures, kerosene oil, sugar, railway plant and rolling-stock, salt, etc. Bengal's position in the inland trade is high on account of its large production of jute, rice, and other food grains, oilseeds, coal, and tea. Bihar and Orissa is important for its enormous production of coal. Tea is the staple product of Assam; cotton, wheat, and seeds of the Bombay Presidency (including Sind); cotton and groundnuts of the Madras Presidency; food grains such as wheat, gram, and oilseeds of the United Provinces and the Punjab.

*The exports of rice, however, increased.

(1) The trade within each block is not registered, only the trade with one block and another.

TRADE FLUCTUATIONS IN 1915-16 AS AGAINST 1914-15.

Complete figures of the quantity of certain agricultural staples imported by rail and river into Indian Ports from the interior are available from the monthly returns* of imports into the chief ports, and the general conclusions that may be drawn from these returns are briefly as follows:—The imports into the ports by rail and river in 1915-16 showed (in round numbers) a rise of 17 per cent in raw cotton (3,672,000 bales in 1915-16 as against 3,127,000 bales in 1914-15), 27 per cent in rice, including paddy, (669,000 tons as against 529,000 tons), 21 per cent in gram and pulse (412,000 tons as against 339,000 tons), 4 per cent in rape and mustard seed (164,000 tons as against 158,000 tons); and a fall of 1 per cent in wheat (1,016,000 tons in 1915-16 as against 1,025,000 tons in 1914-15) and 18 per cent in linseed (222,000 tons as against 270,000 tons). The imports into Calcutta of jute increased by about 28 per cent (5,897,000 bales in 1915-16, as against 4,612,000 bales in 1914-15) and of tea by 13 per cent (277,971,000 lbs as against 245,488,000 lbs).

TRADE FLUCTUATIONS IN 1915-16 AS AGAINST 1913-14, (PRE-WAR PERIOD).

When compared with 1913-14, the imports into the ports in 1915-16 showed a decrease in all articles, about 8 per cent in raw cotton (3,672,000 bales in 1915-16 as against 3,997,000 bales in 1913-14), 34 per cent in wheat (1,016,000 tons as against 1,544,000 tons), 10 per cent in rice, including paddy, (669,000 tons as against 742,000 tons), 10 per cent in gram and pulse (412,000 tons as against 460,000 tons), 52 per cent in linseed (222,000 tons, as against 458,000 tons), and 30 per cent in rape and mustard seed (164,000 tons, as against 233,000 tons). Imports into Calcutta of jute declined from 5,954,000 bales in 1913-14 to 5,897,000 bales in 1915-16, or by 1 per cent, but those of tea advanced from 202,825,000 lbs to 277,971,000 lbs or by about 37 per cent. The detailed figures will be found in tables 75 to 82 on pages 111-112.

RAILWAY EARNINGS.

Railway earnings are in this connexion a valuable indication of the general movement of trade throughout the country. The earnings for the year under review were Rs 63,74 lakhs, as against Rs 60,42 lakhs in 1914-15, an increase of Rs 3,32 lakhs. It is interesting to analyse the main contributions to the total of Rs 63,74 lakhs. The areas which these Railways tap are, of course, well-known. The figures in brackets are the earnings in the preceding year:—East Indian Railway Rs 10,50 lakhs (Rs 10,36 lakhs), Great Indian Peninsula Railway Rs 9,02 lakhs (Rs 7,72 lakhs), North Western Railway Rs 8,37 lakhs (Rs 8,17 lakhs), Bengal Nagpur Railway Rs 4,38 lakhs (Rs 4,10 lakhs), Eastern Bengal Railway Rs 3,48 lakhs (Rs 3,32 lakhs), Madras and Southern Mahratta Railway Rs 4,10 lakhs (Rs 3,73 lakhs).

Railway earnings
an indication of
the movement of
internal trade.

CHAPTER IX.

SUMMARY AND CONCLUSION.

The main features of the year's trade have already been described, and it is, therefore, unnecessary again to refer to these, except in the briefest possible way. In the year under review over 46 per cent of the total trade was with the United Kingdom, 14 per cent with other parts of the Empire, and 40 per cent with foreign countries. The United Kingdom was by far the greatest consignor of goods to this country, as no less than 59 per cent of the imports were from this source. Other parts of the Empire supplied 8 per cent, and foreign countries nearly 33 per cent. In regard to exports there is one noticeable fact which emerges from an examination of the exports to the British Empire and Foreign countries. It has hitherto been usual for Indian exports

* These are furnished by Steamer Companies, Railway Audit offices, the Commissioners of the Port of Calcutta, etc., and include imports of these staples by rail and river into Calcutta, Bombay port, Karachi and Madras ports.

to be exported to countries outside the Empire. In the year under review, however, as will have been seen from the table on page 12, exports were consigned chiefly to the British Empire—55·4 per cent of the total as compared with 44·6 per cent to foreign countries.

Exports ⁽¹⁾ as compared with the previous year showed an increase of 11 per cent; imports ⁽¹⁾ a decrease of 10 per cent. Total trade increased by nearly one per cent. If a comparison be made with the pre-war year (1913-14), the decrease in exports was 19 per cent, in imports 36 per cent, and in total trade 27 per cent. The exports of merchandise were approximately on the level of 1910-11; imports of merchandise on that of 1907-08, and the total trade in merchandise on that of 1910-11. The following table* shows the trade in millions sterling:—

	1913-14. £ millions.	1914-15. £ millions.	1915-16. £ millions.
Imports of merchandise	127·5	96·8	91·7
„ „ treasure	29	14·5	8
Total Imports	156·5	111·1	99·7
Exports of merchandise†	166	121·5	133
„ „ treasure	4·7	3·5	5·5
Total Exports	170·7	125	138·5
Total Imports and Exports	327·2	236·1	238·2

It is interesting to note that since exports to Germany and Austria-Hungary (which in the pre-war year were valued at £24,000,000, out of a total of £166,000,000) were cut off, the exports of jute, raw cotton, seeds, rice, hides and skins, etc., have sought other and profitable markets, especially in the United Kingdom and in the United States. In the pre-war year Germany took the following percentages of the total exports:—raw jute 22 per cent; gunny bags 1½ per cent; raw cotton 15 per cent; seeds 16 per cent; rice 12 per cent; hides and skins 27 per cent. The following table in this connexion is, perhaps, of interest. The commodities selected in the first table are the six chief exports to Germany and Austria-Hungary in the pre-war year:—

Six chief articles exported to Germany and Austria-Hungary.	Total exports elsewhere than to Germany and Austria-Hungary in 1913-14 (pre-war year).	Exports to Germany and Austria-Hungary in 1913-14 (pre-war year).	Increase (+) or Decrease (–) to all countries except Germany and Austria-Hungary	
			in 1914-15, as compared with 1913-14 (column 2).	in 1915-16, as compared with 1913-14 (column 2).
(1)	(2)	(3)	(4)	(5)
	£	£	£	£
Jute (raw)	14,732,000	5,819,000	–7,345,000	–4,304,000
„ manufactures	18,689,000	209,000	–1,507,000	+6,680,000
Cotton (raw)	21,411,000	5,951,000	–3,481,000	–4,792,000
Seeds	13,798,000	3,321,000	–4,795,000	–7,048,000
Rice, not in the husk	14,133,000	3,466,000	–4,183,000	–3,940,000
Hides and skins (raw) total	4,428,000	3,363,000	–438,000	+2,091,000
Cow hides	1,270,000	2,667,000	+196,000	+2,473,000
Goat skins	2,003,000	82,000	–478,000	–167,000
Other kinds	1,155,000	614,000	–156,000	–215,000
Lac	1,101,000	210,000	–126,000	+44,000

Imports, which formerly came from enemy countries, have to some extent been supplied by other countries, notably by the United States, Japan, and

(¹) Merchandise and treasure (private and Government). Regarding the increase in the exports of merchandise only and the decrease in the imports of merchandise, *vide* Chapter I, pages 2, 4-5.

* Merchandise and treasure include Imports and Exports on Government as well as on private account.

† Including re-exports.

Java. The following table shows the six chief imports from Germany and Austria-Hungary in the pre-war year :—

Six chief articles imported from Germany and Austria-Hungary.	Total imports from countries other than Germany and Austria-Hungary in 1913-14 (pre-war year).	Imports from Germany and Austria-Hungary in 1913-14 (pre-war year).	Increase (+) or Decrease (—) from countries other than Germany and Austria-Hungary	
			in 1914-15 as compared with 1913-14 (column 2).	in 1915-16 as compared with 1913-14 (column 2).
(1)	(2)	(3)	(4)	(5)
	£	£	£	£
Metals (excluding ores)	11,995,000	2,688,000	-3,957,000	-4,660,000
Cotton manufactures (including twist and yarn)	43,030,000	1,170,000	-10,573,000	-14,204,000
Woollen manufactures	1,775,000	793,000	-719,000	-1,201,000
Dyeing and tanning substances	319,000	623,000	-89,000	-42,000
Hardware	1,926,000	706,000	-463,000	-352,000
Sugar, 16 D. S. and above	8,521,000	926,000	-2,322,000	+1,949,000

One or two interesting conclusions may be drawn from these tables. In the first place exports of jute manufactures, raw hides and skins, and lac to all countries, except Germany and Austria-Hungary, have increased in value during the year under review, as compared even with the pre-war year 1913-14. Secondly, imports of sugar from all countries, except Germany and Austria-Hungary, have also increased in value. Thirdly, the improvement in exports of raw and manufactured jute, rice, hides and skins, and lac in 1915-16 as compared with the previous year to countries other than Germany and Austria-Hungary is very noticeable, as is the improvement in the imports of dyeing and tanning substances, hardware, and sugar.

The percentages of exports in 1915-16 to the total estimated production were as follows, the figures of the previous year are given in brackets :—Rice 4 (6); wheat 6 (8); raw cotton 65 (56); rape and mustard 8 (9); linseed 49 (83); sesamum 2·5 (11); indigo 105* (69); raw jute 46 (27); and sugar 2 (2). These are for the crops for which forecasts are prepared, and therefore for which production is calculated. The percentages of exports to total production for the quinquennium ending 1913-14, that is, the year before the outbreak of war, when no abnormal features were present, are given in brackets against the percentage figures for the quinquennium ending 1915-16 in the marginal table. The exports of food grains, as compared with the total production, are small, and in years of famine these dwindle almost to nothing. The table shows that in ordinary years about half the cotton and jute crops, and three-fourths of the linseed crop are exported, as against only 9 per cent of the total rice crop grown in India. It may be noted that of the exports of Indian wheat the United Kingdom in 1915-16 took nearly 93 per cent of the total, as against 85 per cent in 1914-15, and 75 per cent in the quinquennium ending 1913-14. In normal years the next best customers for wheat are Belgium and France. More than three-fourths of the exports go ordinarily from Karachi, the natural outlet of the principal wheat-growing provinces, while Calcutta and Bombay divide the balance. The purchasing power of India under existing conditions is, it will be seen, dependent to a peculiar extent on the produce of agriculture, and the prosperity, the maintenance, and the development on economic lines of agriculture are, therefore, not merely matters of importance to agriculturists, or to the population generally, or even to the Government, but concern the Empire as a whole.

	Percentage of exports by sea to production in the quinquennium (1911-12 to 1915-16)		
	Exports by sea 1,000 tons	Production 1,000 tons	Percentage of exports
Rice	2,153	29,494	7 (9)
Wheat	1,117	9,657(a)	12 (15)
Cotton (raw)	445	785	57 (55)
Rape and mustard	183	1,225(a)	15 (23)
Linseed	361	508(a)	71 (77)
Sesamum	69	468(a)	15 (25)
Cotton seed	185	1,835(a)	10 (14)
Sugar	9	2,485	4 (5)
Indigo	1	2	50 (50)
Groundnuts	205	695(a)	30 (38)
Jute, raw	712	1,599	45 (50)

nary years about half the cotton and jute crops, and three-fourths of the linseed crop are exported, as against only 9 per cent of the total rice crop grown in India. It may be noted that of the exports of Indian wheat the United Kingdom in 1915-16 took nearly 93 per cent of the total, as against 85 per cent in 1914-15, and 75 per cent in the quinquennium ending 1913-14. In normal years the next best customers for wheat are Belgium and France. More than three-fourths of the exports go ordinarily from Karachi, the natural outlet of the principal wheat-growing provinces, while Calcutta and Bombay divide the balance. The purchasing power of India under existing conditions is, it will be seen, dependent to a peculiar extent on the produce of agriculture, and the prosperity, the maintenance, and the development on economic lines of agriculture are, therefore, not merely matters of importance to agriculturists, or to the population generally, or even to the Government, but concern the Empire as a whole.

* Owing to the holding back of part of the previous year's production in view of the then rapidly rising prices, the percentage export to total production is in the case of indigo an inflated one.
(a) Relates to the quinquennium ending 1914-15.

The Industrial
Commission.

This review would be incomplete without a reference, however brief, to the Commission that has been appointed to consider the question of the expansion and development of Indian manufactures and industries. In the analysis of imports and exports in this report it has been evident that the rate of progress in some cases has not been so rapid as might have been expected, and that the trade too in these cases has continued to be small. As indicated in the previous year's Review, India is in comparison with her vast resources still in the preliminary stages of her industrial development, and the war has brought in its train circumstances which are clearly bound to be lasting in ways still incalculable. The abnormal conditions that have prevailed in trade since the war cloud broke have deepened the growing conviction (1) that the country is far too dependent upon its export of raw products, and (2) that these should be utilised to a much greater extent for industrial processes within India itself. It has been an accepted axiom that the overwhelming dependence of her peoples upon agriculture—a dependence so serious in years of deficient rainfall and consequent unemployment intensifying famine conditions—should be lessened by the diversity of occupations which manufacturing activity brings. While industrial statistics show that a considerable development has taken place in the last twenty or thirty years, especially in the two great textile industries of cotton and jute, the war has brought into relief the high importance of a definite policy for the encouragement of industries, notably by the profitable employment of Indian capital.

G. FINDLAY SHIRRAS,

Director of Statistics.

The 21st October, 1916.

No. 43.—ABSORPTION OF GOLD (BOTH COIN AND BULLION) IN INDIA

(in thousands of £ sterling)

	AVERAGE OF 5 YEARS ENDING													AVER- AGE OF 5 YEARS ENDING 1913- 14	1914- 15	1915- 16
	1873- 74	1878- 79	1883- 84	1888- 89	1893- 94	1898- 99	1903- 04	1908- 09	1909- 10	1910- 11	1911- 12	1912- 13	1913- 14			
1. Net annual addition to the stock of the country	1,000	600	3,200	2,400	2,000	2,500	6,000	8,400	16,000	13,000	27,000	25,000	13,000	20,800	7,000	1,600
2. Progressive total of additions to the stock	1,000	4,000	12,200	25,600	40,000	46,600	72,400	110,800	144,000	162,000	189,000	214,000	232,000	188,200	239,000	240,600
3. Held in mints and Government Treasuries and Currency and Gold Standard Reserves	400	8,400	4,400	6,000	6,000	16,000	20,000	15,000	12,600	10,000	8,000
4. Net annual variation in item 3	400	1,800	-2,200	6,000	..	10,000	4,000	-5,000	3,000	-5,000	-2,000
5. Net progressive absorption	1,000	4,000	12,200	28,000	46,000	46,200	64,000	106,400	138,000	156,000	173,000	194,000	217,000	175,600	229,000	232,600
6. Absorption of the year	1,000	600	3,200	2,400	2,000	2,400	4,200	10,600	10,000	13,000	17,000	21,000	23,000	17,800	12,000	3,600

NOTE:—Item 1 shows the amount of gold produced in India plus the net imports (i.e., imports minus exports). In 1915-16 the gold produced was £2,360,845 minus net exports £739,412 = £1,600,000 in round figures. Item 2 shows the progressive total of the figures in item 1 to the end of each year. Total at end of 1914-15 £239 millions plus figure for 1915-16 £1,600,000 = £240,600,000 at the end of 1915-16. Item 3 shows the reserve held in India in each year. Item 4 shows the annual variations in the actual amount held in the mints and in the reserves in India. Amount held in 1915-16 £3 millions minus that held in 1914-15 £10 millions is equal to -£7 millions shown against this item in 1915-16. Item 5 shows the difference between item 2 (progressive total) and 3 (amounts held in the mints, etc.). £240,600,000 minus £8 millions = £232,600,000 during 1915-16. Item 6 shows the difference between two successive figures in item 5. £232,600,000 minus £229 millions = £3,600,000 during 1915-16; or, in other words, the difference between item 1 (annual addition to the stock) and item 4 (net variation in item 3); £1,600,000 minus (-£2,000,000), i.e., £3,600,000 is the net absorption of the year.

II.—Raw materials and produce and articles mainly unmanufactured—		" " pipes and tubes and fittings therefor, such as bends, bopps, elbows, tees, sockets, flanges and the like.	
METALLIC ORES AND SCRAP IRON OR STEEL FOR RE-MANUFACTURE.		" " rails, chairs, sleepers, bearing and fish-plates, spikes (commonly known as dog-spikes), switches and crossings, other than those described in No. 63, also lever-boxes, clips and tie-bars.	
54	IRON OR STEEL, old.	" " sheets and plates, all sorts excluding discs and circles which are dutiable under No. 104.	
55	FIREWOOD.	" " wire, including fencing wire and wire-ropes, but excluding wire-netting which is dutiable under No. 104.	
WOOD AND TIMBER.		61	STEEL, angle.
III.—Articles wholly or mainly manufactured—		" bar, rod, and channel, including channel for carriages.	
CHEMICALS, DRUGS AND MEDICINES.		" cast including spring blistered and tub steel.	
56	COPPERAS, green.	" ingots, blooms, billets and slabs.	
HARDWARE, IMPLEMENTS AND INSTRUMENTS.		METALS OTHER THAN IRON AND STEEL.	
57	TELEGRAPHIC INSTRUMENTS AND APPARATUS, and parts thereof, imported by or under the orders of a railway company.	62	LEAD sheets, for tea-chests.
MACHINERY.		RAILWAY PLANT AND ROLLING STOCK.	
58	MACHINERY, namely, prime-movers and component parts thereof, including boilers and component parts thereof; also including locomotive and portable engines, steam-rollers, fire engines, and other machines in which the prime-mover is not separable from the operative parts.	63	RAILWAY MATERIAL for permanent-way and rolling-stock, namely, cylinders, girders, and other material for bridges, rails, sleepers, bearing and fish-plates, fish-bolts, chairs, spikes, crossings, sleeper fastenings, switches, interlocking apparatus, brake gear, couplings and springs, signals, turn-tables, weigh-bridges, engines, tenders, carriages, wagons, traversers, trolleys, trucks, and component parts thereof; also the following articles when imported by or under the orders of a railway company, namely, cranes, water cranes, water tanks, and standards, wire and other materials for fencing:
MACHINERY (and component parts thereof), meaning machines or sets of machines to be worked by electric, steam, water, fire or other power not being manual or animal labour, or which, before being brought into use, required to be fixed with reference to other moving parts; and including belting of all materials for driving machinery:		Provided that for the purpose of this entry "railway" means a line of railway subject to the provisions of the Indian Railways Act, 1880, and includes a railway constructed in a Native State under the suzerainty of His Majesty, and also such tramways as the Governor-General in Council may, by notification in the Gazette of India, specifically include therein.	
Provided that the term does not include tools and implements to be worked by manual or animal labour, and provided also that only such articles shall be admitted as component parts of machinery as are indispensable for the working of the machinery and are, owing to their shape or to other special quality, not adapted for any other purpose.		Provided also that only such articles shall be admitted as component parts of railway material as are indispensable for the working of railways and are, owing to their shape or to other special quality, not adapted for any other purpose.	
Note.—This entry includes machinery and component parts thereof made of substances other than metal, but excludes the articles exempted under No. 17, No. 18 and No. 19.		MISCELLANEOUS.	
METALS—IRON AND STEEL.		64	PRINTING AND LITHOGRAPHING MATERIAL, namely, presses, type, ink, brass rules, composing sticks, chases, imposing tables, and lithographic stones, stereo-blocks, roller moulds, roller frames and stocks, roller composition, standing screw and hot presses, perforating machines, gold blocking presses, stereotyping apparatus, metal furniture, paper folding machines, and paging and numbering machines, but excluding paper (see No. 106).
59	IRON, angle.	65	RACKS for the withering of tea leaf.
"	" bar, rod and channel, including channel for carriages.	66	SHIPS AND OTHER VESSELS for inland and harbour navigation, including steamers, launches, boats and barges, imported entire or in sections.
"	" pig.	67	TEA-CHESTS of metal or wood, whether imported entire or in sections, provided that the Collector of Customs is satisfied that they are imported for the purpose of the packing of tea for transport in bulk.
"	" rice bowls.		

PART IV.—Articles which are liable to duty at 7½ per cent *ad valorem*.

No.	Names of Articles.	No.	Names of Articles.

No. 60.—STATISTICS OF AVERAGE MARITIME FREIGHTS, IN 1895, 1905, 1914, 1915 AND 1916.

(b) Bombay Chamber of Commerce Price Current. (d) Karachi Chamber of Commerce Price Current.

Note.—The rates in this table from October 1914 to March 1916 are inclusive of surcharges.

The following rate is ascribed to the well known agreement between the Liners' Conference and the Indian Tea Association that the freight would be fixed at 10/- per cwt. for tea from April 1912. At the beginning of the tea season (1st June 1915) this rate was increased after much correspondence to 12/- per cwt. for the destination of Calcutta and 14/- per cwt. for the destination of London measurements. In fixing this rate the Conference undertook to do their best to provide freight at a reasonable rate for the usual proportion space on all steamers loading outward and homeward was promised.

No. 61.—STATISTICS OF AVERAGE MONTHLY FREIGHTS FROM JANUARY 1915 TO MARCH 1916 COMPARED WITH THOSE ON JULY 1914 (PREWAR PERIOD).

No. 74.—QUANTITY AND VALUE OF TOTAL MERCHANDISE IMPORTED INTO AND EXPORTED FROM PROVINCES, NATIVE STATES, AND CHIEF SEAPORTS, BY RAIL AND RIVER.

Years	TOTAL IMPORTS AND EXPORTS.		REMARKS.
	Quantity (in thousands of tons)	Value (in lakhs of rupees.)	
1906-07	47,328	6,73,10	NOTE—(1) Owing to the creation of the Province of Bihar and Orissa and other administrative changes with effect from 1st April 1912 the totals for the last four years (1912-13, 1913-14, 1914-15 and 1915-16) will not be quite comparable with those for the previous years. (2) Prior to 1908-09 trade between one native state and another was not recorded. (3) Quantity figures for 1915-16 represent actuals for 9 months, April to December 1915, and estimated figures for the three months January to March 1916, the estimates being based on the average proportion of the preceding ten years. The values have been obtained by adding the total imports and exports in the provincial reports, except the value for 1915-16, which has been calculated on the rate obtained from the total quantity and value for 1914-15.
1907-08	49,998	7,14,01	
1908-09	46,740	6,70,60
